

2023 STRIPED BASS VOLUNTEER ANGLER SURVEY

RESULTS

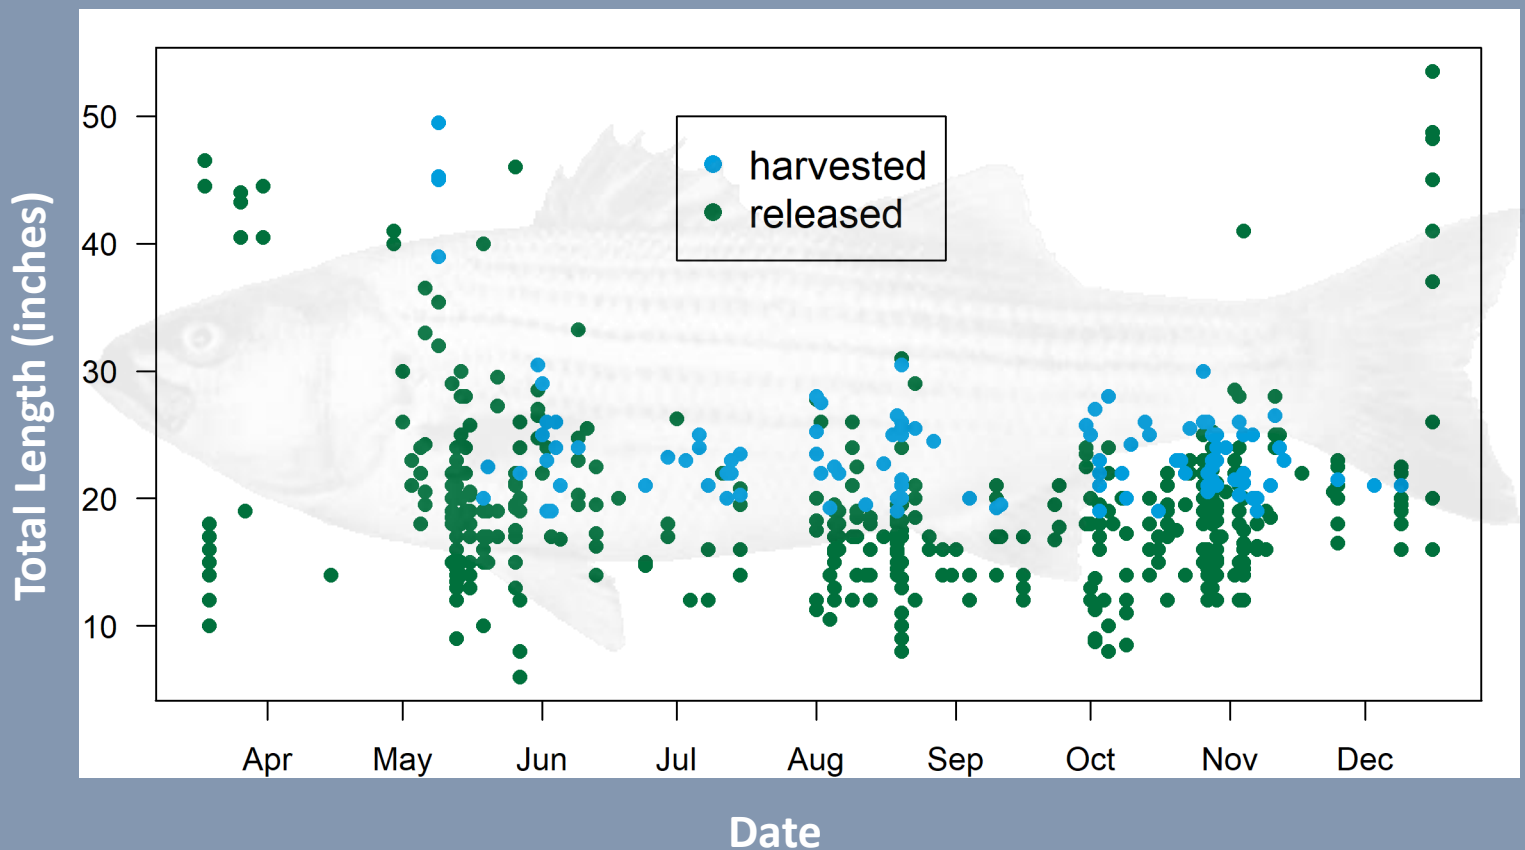

In 2023, anglers reported **579 striped bass lengths** from **189 fishing trips** through the Volunteer Angler Survey. Thank you for your continued participation!

The Volunteer Angler Survey can now be accessed through the **AccessDNR** mobile app, available for both iPhone and Android devices. Your data directly supports fisheries managers in Maryland.

Lengths of striped bass reported in 2023

579 striped bass lengths were reported in **2023**:

- **20%** were **harvested** (average length **23.8** inches)
- **80%** were **released** (average length **19.3** inches)

Volunteer angler survey data helps fisheries scientists to characterize the sizes of striped bass harvested or released by recreational anglers in Maryland throughout each year.
