**MARYLAND STREAM INFORMATION EXCHANGE**  
A Tale of Two Streams: Floodplain Reconnection in the  
Piedmont & Coastal Plain

**SAVE THE DATE: November 15th, 2017**

The Exchange will be held at the  
Smithsonian Environmental  
Research Center

647 Contees Wharf Road  
Edgewater, Maryland

Please join your fellow Natural Resource professionals for a dialogue about the monitoring programs and data synthesis being conducted for Muddy Creek in Anne Arundel County, and Big Spring Run in Lancaster PA. The goal of this one day exchange is to provide natural resource planners, scientists, and other environmental professionals with a better understanding of two different stream restoration techniques - both designed with the similar goal of floodplain reconnection - and what the monitoring efforts are telling us about their respective performance.

*The Exchange will be conducted in the classroom and in the field.*
