TREE-MENDOUS MARYLAND -- FALL 2009 ORDER FORM

Shemin Nurseries provides TREE-MENDOUS MARYLAND with high quality native trees and shrubs at reasonable prices for public land planting. **Your pre-paid order may be picked up at Shemin Nurseries.** For an additional charge, Shemin Nurseries will deliver your order directly to your planting site. (Minimum delivery 25 trees.) Please arrange your delivery directly with Shemin Nurseries 301-421-1220 after receiving an order confirmation card from us.

A single delivery at no additional charge will be made early in the season to DNR sites to assist your pick-up in outlying regions; Washington (Greenbrier SP), Queen Anne's - (Tuckahoe SP) & Southern Prince George's (Cedarville State Forest) counties. If you wish to be included in one of these outlying deliveries, please place your order before OCTOBER 1ST. For specific information, call 410-260-8510.

CHECKS should be made PAYABLE to: Shemin Nurseries

& mailed with this order form to:

TREE-MENDOUS MARYLAND

DNR Forest Service

580 Taylor Avenue E-1

Annapolis MD 21401

or charge your order on VISA, M/C, AMEX, and fax it to us at 410-260-8595 (See front ---->)

After processing your order, a **Confirmation Card with your Order #** and species ordered will be sent to you. All plants must be picked up by November 20th. **NOTE:** Be sure to count your trees & shrubs at Shemin BEFORE you leave the grounds. Shortages discovered later will NOT be replaced.)

Please bring your confirmation card with you to pick up your order.

This is NOT a program for planting on PRIVATE PROPERTY. All trees must be planted on public land including parks, community open spaces, rights-of-ways, government facilities, and school grounds.

TREE-MENDOUS MARYLAND, a program of the Maryland Forest Service, remains one of our most popular programs aimed at helping citizens restore tree cover on public land and community open space in Maryland. To date, we have assisted more than 3,000 towns and communities, parks, and schools planting trees and shrubs to help clean the water, clean the air, and keep our towns and cities inviting, livable, and environmentally viable places to live.

Maryland **PLANT** Community Award (**People Loving And Nurturing Trees**), sponsored by the MD Urban & Community Forest Committee (MUCFC), rewards towns, homeowner associations, schools, and other entities that are actively involved in tree planting and care programs. For more information about **PLANT**, visit <http://www.dnr.state.md.us/forests/programs/plantinfo.html> or call 410-260-8510.

The MD Urban and Community Forest Committee of the MD Forestry Boards offers **grants** of up to \$1,500 for schools, parks, cities and towns, homeowner associations, and other groups involved in environmental tree planting and care projects on public land. Download the grant application directly at: www.dnr.maryland.gov/forests/programs/urban/grantapp.pdf. For more information contact Wanda MacLachlan 410-531-5973 wtm@umd.edu.

Consider the following species for your fall planting:

★ **Pink dogwood, 'Cherokee Brave'** – (*Cornus florida*) one of the most popular pink dogwood because of its stunning larger than normal deep rose blooms with white center, brilliant deep red fall color and ample berries. Blooms late spring, is fast growing, and resistant to powdery mildew and other dogwood pests and diseases. Reaches 20 to 30'. Excellent understory tree or specimen. Prefers part shade, moist but well-drained soil. Do not plant in heavy, wet soils. Excellent for wildlife.

★ **Fringe tree (*Chionanthus virginicus*)** great for woodland or understory, easy to grow, beautiful spreading small (12' to 20') native multi-stem shrub. Can be trained to grow as single stem small tree. Prefers sun and medium moisture, but tolerates shade and adapts to a variety of soil conditions. Covered with slightly fragrant, eye-catching fringing white blooms after dogwoods fade in May. Medium-dark green lustrous leaves turn bright yellow in fall. Excellent for wildlife.

★ **Virginia sweetspire (*Itea virginica*)** is an open, upright deciduous shrub growing 3'-4' tall. Slightly fragrant clusters of cascading 3"-6" white flowers in early summer. Leaves are glossy green turning red-purple in autumn. Semi-evergreen leaves may remain on the plant through December. Amazingly adaptable to a wide range of conditions, including full sun to part shade, and moist to dry soils. Provides protective cover for birds and attracts butterflies and other pollinators. Easily transplanted and very easy to grow with no serious insect or disease problems.
