

# *Reasons to Buy* **A Fresh Maryland Christmas Tree**

## **Fresh Air & Water**

Growing trees absorb carbon dioxide while emitting fresh air. They also reduce stormwater runoff.

## **Sustainability**

Trees biodegrade naturally. They can be reused as habitat or recycled into mulch.

## **Economic Boost**

Tree farmers keep land open and productive. Money spent locally circulates through the economy.

## **Holiday Spirit**

Visiting a tree farm is fun for the entire family. Plus, live trees look and smell wonderful.

## **The Circle of Life!**

Live trees stabilize soil, protect water and provide habitat and scenery. Growers plant up to three seedlings for every harvested tree, rarely needing fertilizer.
