

REASONS TO BUY A FRESH MARYLAND CHRISTMAS TREE

MARYLANDSBEST.NET

FRESH AIR & WATER

Growing trees absorb carbon dioxide while emitting fresh air. They also reduce stormwater runoff.

SUSTAINABILITY

Trees biodegrade naturally. They can be reused as habitat or recycled into mulch.

HOLIDAY SPIRIT

Visiting a tree farm is great fun for the entire family. Plus, live trees look and smell wonderful.

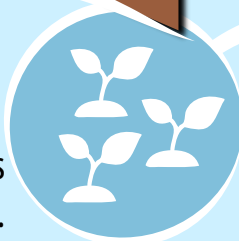

ECONOMIC BOOST

Tree farmers keep land open and productive. Money spent locally circulates through the economy.

THE CIRCLE...

Live trees stabilize soil, protect water supplies and provide habitat & scenery.

...OF LIFE

Growers plant up to three new seedlings for every harvested tree, rarely needing fertilizer.
