

## Anne Arundel County – Marley Creek

### What is the current regulation for the area?

The request is to create a new regulated speed area in Marley Creek. There is no current regulation in the area.

### What was requested?

The Department received a request to create a 6-knot speed zone in Marley Creek to be effective at all times during the boating season.

## Why was this change requested?

The requestor stated:

“Since many of the other creeks near Marley Creek the boats and jet skis like to come speed up and down our creek. This is creating large wake that is disrupting shoreline. There are many grassy habitats in this creek that need to be protecting. Potential noise from boats speeding up and down all summer could also disrupt habitat.”

## Who will this affect?

- All Vessels.
