The leaseholders propose to cease the use of currently approved cages on bottom, and instead deploy two types of floating cage gear arranged in rows approximately 160 feet in length that are marked at each end with low drag buoys. The applicants propose to cultivate and harvest both Eastern oysters (*Crassostrea virginica*) and Atlantic bay scallops (*Argopecten irradians*) using methods approved by the Department. Lease corners will continue to be marked in accordance with Code of Maryland Regulation 08.02.23.03. A map of the existing lease area is available on the Fishing and Boating Services Public Notice web page, dnr.maryland.gov/Fisheries/Pages/Pub_Notices.aspx.

The Department will hold a public informational meeting upon written request from a member of the public. In addition, any person who has a specific right, duty, privilege, or interest that is different from that held by the general public and may be adversely affected by the proposed gear modification may file a Petition of Protest with the Department. Petitions that meet the requirements of Natural Resources Article §4-11A-09(g) shall be forwarded to the Office of Administrative Hearings for adjudication. Comments, written requests for a public informational meeting, and/or Petitions of Protest, must pertain only to the proposed gear modification, rather than the existing lease footprint or currently authorized lease activities, and must be received by the Department of Natural Resources Aquaculture and Industry Enhancement Division 580 Taylor Avenue E-4 Annapolis, MD 21401 by July 28th, 2025.
