

AREAS OF SMITHVILLE LAKE TO BE CLOSED

Attention Anglers:

This fall and winter certain areas of Smithville Lake FMA will be closed to the public for repairs to the lake's water control structure and its drainpipe. The contractor will be utilizing the gravel parking area at the intersection of Noble and Possum Hill Roads as a staging area. The gravel parking lot and adjacent areas near the dam breast will be closed to public use. The approximate closed area is indicated by the red dashed lines in the map below. The boat ramp area will remain open, and the lake is still open for use. However, please keep away from the work area.

The closure will begin on or about October 15, 2023. The work should be completed by February 15, 2024. Please contact the Eastern Regional Manager Brett Coakley with any questions or concerns at 410-928-3643 (x104) or brett.coakley@maryland.gov.
