D. Withdrawal for Purposes Other than Eligible Costs.

(1) Except as authorized under §§D(2)(a) and (3) of this regulation, if the account holder withdraws any funds for which a subtraction has been claimed from the account for a purpose other than eligible costs for the purchase of a home:

(a) The funds shall be taxed as ordinary income of the account holder for the tax year in which they were withdrawn; and

(b) The account holder shall pay a penalty to the State equal to 10 percent of the amount withdrawn.

(2) Rollovers.

(a) An account holder may withdraw money from the account and deposit the money in a new first-time homebuyer savings account held by a different financial institution or the same financial institution.

(b) An account holder who withdraws funds from an account but does not deposit the funds in a new first-time homebuyer savings account within 60 days of withdrawal shall be subject to the tax and penalty described in §D(1) of this regulation.

(3) A disbursement of any assets of a first-time homebuyer savings account under a filing by an account holder for protection under the United States Bankruptcy Code, 11 U.S.C. §§101—1330, does not subject the account holder to the liabilities described in §D(1) of this regulation.

(4) A use of the account funds to pay a financial institution’s administrative costs is not be considered a withdrawal from the account subject to the provisions of §D(1) of this regulation if the administrative costs:

(a) Are disclosed by the financial institution, in writing, to the account holder at the time the account is opened; and

(b) Do not inure to the benefit of the account holder.

Title 08
DEPARTMENT OF NATURAL RESOURCES
Subtitle 02 FISHERIES SERVICE

08.02.03 Blue Crabs

Authority: Natural Resources Article, §§4-215 and 4-803, Annotated Code of Maryland

Notice of Proposed Action
[22-011-P]

The Secretary of Natural Resources proposes to amend Regulation .07 under COMAR 08.02.03 Blue Crabs.

Statement of Purpose

The purpose of this action is to clarify the crab pot line at the mouth of St. Jerome Creek in St. Mary’s County and to remove duplicative language that currently exists in the regulation.

Currently the regulatory line which governs crab pot use at the mouth of St. Jerome Creek is defined in COMAR 08.02.03.07E(3) as “thence along shores to Cedar Point to Point No Point and to Point Lookout.” “Along the shore” in this instance, is intended to be from point of land to point of land, as the purpose of the crab pot lines is to restrict crab pots to the mainstem Chesapeake Bay. Due to differing definitions of “along the shore” within this regulation, the Department is proposing to directly reference the points of land at the mouth of St. Jerome Creek to make it explicit that the tributary is closed to crab pots. The new language will reference St. Jerome Point and Deep Point (the two points on either side of the mouth of St. Jerome Creek) between Point No Point and Point Lookout.

Additionally, the action will remove the statement “A person who owns or is in charge of operating a vessel used to catch crabs for commercial purposes with crab pots shall be licensed by the department”, as it is duplicative of commercial licensing requirements elsewhere.

Comparison to Federal Standards

There is no corresponding federal standard to this proposed action.

Estimate of Economic Impact

The proposed action has no economic impact.

Economic Impact on Small Businesses

The proposed action has minimal or no economic impact on small businesses.

Impact on Individuals with Disabilities

The proposed action has no impact on individuals with disabilities.

Opportunity for Public Comment

Comments may be sent to Crab Pot Line Regulations, Regulatory Staff, Maryland Department of Natural Resources, Fishing and Boating Services, 580 Taylor Ave., E-4, Annapolis, MD 21401, or call 410-260-8300, or fill out the comment form at https://dnr.state.md.us/fisheries/Pages/regulations/changes.aspx#bcrap. Comments will be accepted through February 2, 2022. A public hearing will be held online only on January 13, 2022, at 1 p.m. Join with Google Meet, meet.google.com/cue-azno-yds. JEANNIE HADDAWAY-RICCIO
Secretary of Natural Resources

Subtitle 02 FISHERIES SERVICE

08.02.05 Fish

Authority: Natural Resources Article, §4-215, Annotated Code of Maryland

Notice of Proposed Action

[22-009-P]

The Secretary of Natural Resources proposes to amend Regulation .02 under COMAR 08.02.05 Fish.

Statement of Purpose

The purpose of this action is to adjust the commercial hook-and-line fishing line in the Susquehanna River. Currently, the line is at the mouth of Deer Creek. The action moves the line for this gear type to the tip of Rowland Island. The current line would remain for all other gear types.

The current commercial gear line in the Susquehanna River was put in place during the 1990s as part of the department’s striped bass regulations. Over time, the area between Deer Creek and the Conowingo Dam was opened for recreational angling. However, hook and lining commercially was not allowed. Since the restrictions were lifted for recreational anglers, the commercial striped bass fishery has moved to an individual transferable quota system (ITQ). This means that the licensee will harvest a set amount of fish in any locations open for commercial harvest. Because of this and other changes in the fishery over time, the department does not have any concerns about commercial hook-and-line use in this 3.5 mile stretch of the river. The change would remove the only area of tidal water where any commercial activity is currently prohibited. It will also make the rules for hook-and-line use the same between recreational and commercial users. Commercial licensees using hook-and-line gear will also be able to harvest other species such as invasive flathead catfish and snakeheads.

Additionally, the action updates references within the regulation and to other regulations that are no longer accurate.

Comparison to Federal Standards

There is no corresponding federal standard to this proposed action.

Estimate of Economic Impact

I. Summary of Economic Impact. This action will allow commercial licensees who use hook-and-line gear additional area to commercially harvest fish. The impact is indeterminable, but positive.

II. Types of Economic Impact.

A. On issuing agency: NONE

B. On other State agencies: NONE

C. On local governments: NONE

D. On regulated industries or trade groups:

   Commercial Hook-and-Line Harvesters (+) Indeterminable

E. On other industries or trade groups: NONE

F. Direct and indirect effects on public: NONE

III. Assumptions. (Identified by Impact Letter and Number from Section II.)

D. A small number of commercial harvesters will likely take advantage of the newly-opened area to commercially harvest fish with hook-and-line gear. However, due to the hydrology of the river, it is likely to remain a small number. That area requires specialized boats in order to safely navigate, so those individuals who already have that equipment may benefit, but the benefit will likely not be so great to incentivize other individuals to acquire that gear.

Economic Impact on Small Businesses

The proposed action has a meaningful economic impact on small business. An analysis of this economic impact follows.

Commercial finfish harvesters who use hook-and-line gear will have an additional 3.5 miles of the Susquehanna River from which to harvest fish. It is indeterminable how much of a financial impact this
