I. SUMMARY & FAQS

What was proposed?

The Department has established harvest hours for shellfish aquaculture and has adopted the following times:

1. October through May - Sunrise to sunset. This is not a change to the times that were previously allowed.
2. June and September - Sunrise to the end time specified in the *Vibrio parahaemolyticus* Control Plan (“*V.p.* Control Plan”), which is codified in Maryland Department of Health regulations at COMAR 10.15.07.06. The plan requires that harvest must end no later than 11:30 a.m. in June and 12:30 p.m. in September. This is not a change to the times that were previously allowed.
3. July and August - 30 minutes before sunrise to the end time specified in the *V.p.* Control Plan. Previously, the time period allowed in July and August was sunrise to 10:30 a.m. This will allow an additional 30 minutes of harvest time compared to the times that were previously allowed.

Why is this change necessary?

House Bill 857 of the 2024 Session of the Maryland General Assembly requires the Department to establish the hours for harvesting shellfish within leased areas. During months when the *V.p.* Control Plan is in effect, harvest hours for shellfish aquaculture harvesters are restricted to comply with public health measures designed to keep harvested oysters protected from elevated air and water temperatures. Previously, harvesters were allowed to begin at sunrise and end at a curfew stipulated in the *V.p.* Control Plan. For the months of July and August, that curfew is 10:30 a.m. As sunrise happens later throughout the summer months, harvesters are limited to a decreasing amount of time to harvest and land their product by the curfew. Allowing shellfish aquaculture harvesters to begin harvesting 30 minutes before sunrise in July and August allows additional flexibility during these months while maintaining compliance with the public health control measures of the National Shellfish Sanitation Program.

Who will this affect?

This change will affect Shellfish aquaculture harvesters who harvest activities during summertime months regulated by the *V.p.* Control Plan.

What is the specific regulatory action?

Amend Regulation .04 under COMAR 08.02.23 Shellfish Aquaculture and Leasing.
