

The fishery management plan for scup specifies the threshold that governs trawl mesh size. The mesh size of a net determines what size fish are captured by a net. The larger the mesh size, the larger the size of the fish that are retained by the net. Mesh size regulations are used to decrease retention of fish smaller than the legal size. The goal is to retain only legal size fish. Trawl catch mesh thresholds are put into place to decrease bycatch of sub-legal fish. Only a small incidental catch of the target species is allowed to be retained before a required mesh size is regulated to be used. The threshold is that amount of fish that may be retained before the required mesh size or larger must be used. Maryland is required to comply with the provisions of the fishery management plan. The proposed action updates the thresholds that require a certain mesh size in a trawl. This change will keep Maryland in compliance with the Atlantic States Marine Fisheries Commission Summer Flounder, Scup, and Black Sea Bass Fishery Management Plan and consistent with federal waters.

The Department has a specific format for how public notices are issued when rules are established or changed to implement a fishery management plan. This includes publishing the notice on the Department's website, notification at least 48 hours in advance, and dissemination of the notice in other manners (text, social media, email, and the Maryland Register) so that user groups can be aware of the change. The proposed action updates the format for public notices issued to implement the Atlantic States Marine Fisheries Commission's Fishery Management Plan for Scup. This change makes scup consistent with other species managed by a fishery management plan.

Comparison to Federal Standards

There is no corresponding federal standard to this proposed action.

Estimate of Economic Impact

The proposed action has no economic impact.

Economic Impact on Small Businesses

The proposed action has minimal or no economic impact on small businesses.

Impact on Individuals with Disabilities

The proposed action has no impact on individuals with disabilities.

Opportunity for Public Comment

Comments may be sent to Scup Regulations, Regulatory Staff, Department of Natural Resources Fishing and Boating Services, 580 Taylor Avenue, B-2, Annapolis, MD 21401, or complete the comment form at <https://dnr.maryland.gov/fisheries/Pages/regulations/changes.aspx#scup>. Comments will be accepted through June 8, 2020. A public hearing has not been scheduled.

.22 Scup.

- A. (text unchanged)
- B. Commercial Gear Restrictions.

[(1) Trawls.

(a) Except for a person landing less than a total of 500 pounds of scup from November 1 through April 30 or 100 pounds of scup from May 1 through October 31, a person may not use a trawl with:

- (i) Mesh less than 5 inch stretched mesh size;
 - (ii) More than 25 meshes in the codend with more than 100 continuous meshes of 5 inch mesh forward of the codend; or
 - (iii) Mesh size less than 5 inches throughout the trawl net for trawl nets with codends less than 125 meshes.
- (b) A person may not use a roller rig trawl with a roller diameter in excess of 18 inches to catch scup.]

(1) *Except as provided in §B(2) of this regulation, a person may not use a trawl with mesh less than 5 inch diamond mesh applied throughout the:*

(a) *Codend for at least 75 continuous meshes forward of the end of the net; or*

(b) *Entire net for codends with less than 75 meshes.*

(2) *A trawl shall meet the requirements specified in §B(1) of this regulation unless the individual:*

(a) *Possesses less than:*

(i) *1,000 pounds of scup per trip during the period October 1 through April 14;*

(ii) *2,000 pounds of scup per trip during the period April 15 through June 15; or*

(iii) *200 pounds of scup per trip during the period June 16 through September 30; and*

(b) *Stores the scup separately from all other species.*

(3) *A person may not use a roller rig trawl with a roller diameter in excess of 18 inches to catch scup.*

[(2)] (4) (text unchanged)

C. (text unchanged)

D. General.

(1) The Secretary may *establish or modify* [or set] a season, *size limit*, or catch limit [by publishing notice in a daily newspaper of general circulation at least 48 hours in advance of the modification, stating the effective hour and date] *in order to implement the Atlantic States Marine Fisheries Commission Interstate Fishery Management Plan for Scup by issuing a public notice on the Department's website.*

(2) *The public notice shall state its effective hour and date and shall be published on the Department's website at least 48 hours in advance of the effective hour and date.*

[(2)] (3) (text unchanged)

(4) *A violation of the restrictions set by the Secretary in accordance with this section is a violation of this regulation.*

Secretary of Natural Resources

Subtitle 02 FISHERIES SERVICE

08.02.15 Striped Bass

Authority: Natural Resources Article, §4-215, Annotated Code of Maryland

Notice of Proposed Action

[20-090-P]

The Secretary of Natural Resources proposes to amend Regulations **.09**, **.10**, and **.12** under **COMAR 08.02.15 Striped Bass**.

Statement of Purpose

The purpose of this action is to implement Addendum VI to Amendment 6 of the Atlantic States Marine Fisheries Commission Interstate Fishery Management Plan for Atlantic Striped Bass. The proposed action amends the catch limit, size limit, and season to reduce total removals of striped bass during the recreational and charter boat summer and fall fishery in Maryland's Chesapeake Bay and its tidal tributaries.

The 2018 benchmark stock assessment for striped bass indicated the striped bass stock is overfished and experiencing overfishing. Based on these findings, the Atlantic States Marine Fisheries Commission (ASMFC) determined that conservation measures are needed. Addendum VI to Amendment 6 of the Atlantic States Marine Fisheries Commission Interstate Fishery Management Plan for Atlantic Striped Bass (Addendum) was finalized by ASMFC in October of 2019. The Addendum requires all states to reduce total removals (harvest + dead discards) by 18 percent beginning in 2020. The conservation goal set by ASMFC is to reduce the total number of

striped bass that are killed by fishing activities. This means reducing the number of fish that are harvested and the number of fish that die after being caught and returned to the water, known as dead discards.

The Addendum specifies the actions necessary for the recreational fishery; however it allows states to file plans that will provide equivalent conservation. The proposed action implements a plan that will provide equivalent conservation to the option prescribed by the Addendum. The option selected is based on public comment and Maryland's goal to reduce total removals paying particular attention to decreasing dead discards during the summer and fall season. The option was submitted to the ASMFC Technical Committee in November 2019 and approved by the ASMFC Striped Bass Management Board in February 2020.

The proposed action reduces the creel limit from two to one striped bass per person per day. The creel limit applies to all open seasons beginning May 16, 2020. Changing the creel limit removes the need for a limit on the second striped bass; therefore, the proposed action removes the upper limit and re-words each regulation to make it clear that a person may not keep a striped bass that is less than 19 inches in total length.

The proposed action establishes a closure period of August 16, 2020 through August 31, 2020. Dates are inclusive, which means both August 16 and August 31 would be closed. A closure period is being established in an effort to reduce dead discards during the summer when water quality conditions in the Chesapeake Bay increase this mortality. Striped bass require cool, well-oxygenated water to thrive.

Based on current information, expectations of fishery participants, and measures approved by ASMFC, the proposed action specifies that the closure is only for the year 2020. During the summer months, as water temperatures increase and oxygen conditions worsen, striped bass become more stressed. Data will be gathered and analyzed during the 2020 season to determine the effectiveness of the closure period and inform future decisions.

During the closure period in August, anglers may not target striped bass. "Target" means that a person may not catch, harass, harm, pursue, hunt, shoot, wound, or attempt to catch striped bass or striped bass hybrids. Anglers would still be allowed to fish for other species, but all efforts must be made to avoid interacting with striped bass during the closure period.

The proposed action requires that, while fishing, all striped bass in a person's possession shall meet the size and possession limits set forth in regulation for that area. Anglers that fish the mainstem and tributaries of the Potomac River need to be aware of the rules for where they are fishing. Season and limits can be, and sometimes are, different in the mainstem of the river and its tributaries.

The proposed action changes the end of the season to December 10. This is a 5-day shortening of the season. The proposed action also removes the provision that allows the captain or the mate to keep a striped bass during a charter trip. Both measures are needed to achieve the desired reduction in total removals in Maryland's conservation equivalency plan.

Part of the Department's conservation equivalency plan allows charter captains licensed under Natural Resources Article, §4-701, Annotated Code of Maryland, to voluntarily participate in a pilot program. The program is not available for the Susquehanna Flats and Northeast River from May 16 through May 31. Participating captains will be required to use FACTS (an electronic reporting system) and will be allowed to keep two fish per person per day. Only one of those two fish may be greater than 28 inches. FACTS is an e-reporting system that will provide real-time data on harvest, discards, and fishing activity. Electronic reporting in Maryland requires that participants send a Trip Start Hail before they leave the dock and a Trip End Hail before they return to the dock. The pilot program will be implemented in accordance with COMAR 08.02.01.10.

Due to the timing of the ASMFC Management Board approval and implementation date, the Department will manage the size, creel, and season for the fishery by public notice until a regulation is adopted for all parameters. Except for the prohibition on targeting in August, all rules will be implemented by a public notice. The public notice will be issued in accordance with COMAR 08.02.15.12.

The public notice and proposed action ensure Maryland's compliance with the Atlantic States Marine Fisheries Commission Interstate Fishery Management Plan for Atlantic Striped Bass.

Comparison to Federal Standards

There is no corresponding federal standard to this proposed action.

Estimate of Economic Impact

I. Summary of Economic Impact. The proposed action may have an economic impact on the Department, charter boat operations, bait stores, tackle stores, and marinas. Given the ongoing COVID-19 pandemic and the recent closure of recreational fishing for non-subsistence activity, it may be difficult to discern between the economic impacts from the COVID-19 pandemic and the proposed action. For example, catch and release is currently prohibited by regulation at the same time it is prohibited by Executive Order.

II. Types of Economic Impact.	Revenue (R+/R-)	
	Expenditure (E+/E-)	Magnitude
A. On issuing agency:		
License sales	(R-)	Indeterminable
B. On other State agencies:	NONE	
C. On local governments:	NONE	
	Benefit (+) Cost (-)	Magnitude
D. On regulated industries or trade groups:		
(1) Recreational anglers	(-)	Indeterminable
(2) Charter boat — creel limit	(-)	Indeterminable
(3) Charter — August closure	(-)	Indeterminable
(4) Charter — shortening of season	(-)	Indeterminable
E. On other industries or trade groups:		
Bait stores/tackle stores/marinas	(-)	Indeterminable
F. Direct and indirect effects on public:	NONE	

III. Assumptions. (Identified by Impact Letter and Number from Section II.)

A. There is a potential loss of revenue from fishing license sales. NOAA Fisheries Marine Recreational Information Program (MRIP) data from 2012—2016 shows that approximately 760,000 anglers make 2.5 million fishing trips annually in Maryland waters. It is unknown if or how many of these individuals will choose to not purchase a license to fish in Maryland due to restricted striped bass rules; therefore, the actual impact is indeterminable.

D(1). NOAA Fisheries Marine Recreational Information Program (MRIP) data from 2012-2016 shows that approximately 760,000 anglers make 2.5 million fishing trips annually in Maryland waters. It is unknown how many of these individuals only fish for striped bass, how much money they have invested in equipment (fishing gear, boats, etc.), or if they have trips planned during the closure that centered around striped bass. It is unknown if they will continue to fish in Maryland for other species, make fewer trips to Maryland, or not fish at all due to restricted striped bass rules. The actual impact to recreational anglers is indeterminable.

D(2). Decreasing the catch limit to one fish per person per day will likely have a negative impact on charter businesses. Over the last 5 years, the average number of trips that charter captains have reported is 1,723 for May; 1,893 for June; 2,007 for July; 1,676 for August; 992 for September; 722 for October; 439 for November; and 159 for December. Decreasing the catch limit may mean that some anglers may not hire a chartered trip. It is unknown how many of those trips were taken strictly for striped bass or how many anglers will not book a trip if they can only catch one striped bass. We are not able to predict the actions of anglers or businesses, so the actual impact cannot be determined.

D(3). The prohibition on targeting (catching or attempting to catch) striped bass from August 16 through August 31 in the Chesapeake Bay and its tidal tributaries will likely have an indeterminable negative impact on charter businesses. Over the last 5 years, charter captains have reported an average of 524 trips per year where they landed striped bass during that time period. Losing those days in August will likely result in lost opportunities to book trips. The actual impact is indeterminable because it is unknown how many trips during that time period are taken strictly for striped bass. Instead of fishing for striped bass they could plan trips for other species. We are not able to predict the actions of anglers or businesses, so the actual impact cannot be determined.

D(4). Decreasing the season by 5 days in December means that the charter industry could be negatively impacted if customers stop scheduling trips. The charter industry may change their business model at the end of the season. Instead of harvesting striped bass they could plan trips for catch and release or switch to other species in December. We are not able to predict the actions of anglers or businesses, so the actual impact cannot be determined.

E. Reducing the creel to one fish for recreational anglers, prohibiting the targeting (catching or attempting to catch) of striped bass during mid to late August and the season closing earlier in December will likely have an impact on bait shops, tackle shops, and marinas. Anglers will likely have less need for tackle and will take fewer trips during these closure periods, resulting in less marine fuel being purchased and the loss of other incidental sales. It is not possible to know how many fewer trips will be taken, as anglers could choose to pursue other species during the striped bass closure, so the total economic impact is not determinable.

Economic Impact on Small Businesses

The proposed action has a meaningful economic impact on small businesses. An analysis of this economic impact follows.

The proposed action may have an economic impact on charter boat operations, bait stores, tackle stores, and marinas. These types of businesses are generally considered small businesses. Please see the Assumptions in the Estimate of Economic Impact for how it could impact the businesses.

Impact on Individuals with Disabilities

The proposed action has no impact on individuals with disabilities.

Opportunity for Public Comment

Comments may be sent to Striped Bass Regulations, Regulatory Staff, Department of Natural Resources Fishing and Boating Services, 580 Taylor Avenue, B-2, Annapolis, MD 21401, or complete the comment form at <https://dnr.maryland.gov/fisheries/Pages/regulations/changes.aspx#sb> summer. Comments will be accepted through June 8, 2020. A webinar or similar remote conference to discuss the details of the proposed action will be held May 11, 2020. Details will be announced at a later date.

.09 Recreational and Charter Boat Summer and Fall Fishery in the Chesapeake Bay and Its Tidal Tributaries.

A. Early Season.

Secretary of Natural Resources

Title 09

MARYLAND DEPARTMENT OF LABOR

Subtitle 23 BOARD FOR PROFESSIONAL ENGINEERS

09.23.06 Continuing Professional Competency Requirements

Authority: Business Occupations and Professions Article, §14-314, Annotated Code of Maryland

Notice of Proposed Action

[20-093-P]

The Board for Professional Engineers proposes to adopt new Regulation .15 under **COMAR 09.23.06 Continuing Professional Competency Requirements**. This action was considered by the Board for Professional Engineers at a public meeting held on November 14, 2019, notice of which was given by publication on the Board's website pursuant to General Provisions Article, §3-302(c), Annotated Code of Maryland.

Statement of Purpose

The purpose of this action is to clarify that a licensee may satisfy continuing competency requirements regardless of whether the educational credits were earned in or outside the State of Maryland.

Comparison to Federal Standards

There is no corresponding federal standard to this proposed action.

Estimate of Economic Impact

The proposed action has no economic impact.

Economic Impact on Small Businesses

The proposed action has minimal or no economic impact on small businesses.

Impact on Individuals with Disabilities

The proposed action has no impact on individuals with disabilities.

Opportunity for Public Comment

Comments may be sent to Joseph Cullingford, Executive Director, Professional Licensing Boards, Department of Labor, 500 N. Calvert Street, Baltimore, MD 21202, or call 410-230-6262, or email to joseph.cullingford@maryland.gov, or fax to 410-962-8483. Comments will be accepted through June 8, 2020. A public hearing has not been scheduled.

Open Meeting

Final action on the proposal will be considered by the Board for Professional Engineers during a public meeting to be held on June 11, 2020, at 500 N. Calvert Street, 3rd Floor, Baltimore, MD 21202.

.15 CPC Units Earned in Other States.

The Board will accept CPC units earned for qualifying activities completed in other jurisdictions, provided that:

A. The activity is consistent and complies with the requisite criteria set forth in this chapter;

B. An out-of-State licensee provides evidence of attending and completing a qualifying activity in another state, together with the applicable number of CPC units earned; and

C. An out-of-State licensee otherwise fulfills all other applicable license renewal requirements in the State of Maryland.

DAVID MONGAN, P.E.

Chairman

State Board for Professional Engineers

Title 32

MARYLAND DEPARTMENT OF AGING

Subtitle 03 GRANTS AND SUBSIDIES

32.03.03 Senior Assisted Living [Group Home] Subsidy Program

Authority: Human Services Article, §10-211, Annotated Code of Maryland

Notice of Proposed Action

[20-095-P]

The Maryland Department of Aging proposes to amend Regulations .01—, .03, .05, .07, and .08 under **COMAR 32.03.03 Senior Assisted Living Subsidy Program**.

Statement of Purpose

The purpose of this action is to generally update the Senior Assisted Living Subsidy (SALS) Program regulations by removing references to outdated cross-references, removing ancillary references, and providing new definitions.

More substantial changes to the SALS Program include increasing the subsidy amount, raising the resource limit, clarifying provisions relating to artificial impoverishment, expanding monthly personal expense allowance, and allowing for funeral and burial expenses.

Increasing the subsidy amount allows the Department of Aging to move away from one Statewide maximum subsidy amount for the SALS Program to a localized maximum subsidy amount. The proposed change will permit local jurisdictions to set the maximum at a number between \$650 and \$1,000 that best serves their locale. Additionally, this \$650 to \$1,000 range will be tied to the Consumer Price Index (CPI) so that it will adjust with inflation. The hope is that by allowing flexibility in the subsidy amount at the local level, jurisdictions will be able to maximize participation in the Program.

The resource limit for the SALS Program has not changed since 1994. The purposes of raising the resource limit are: updating the outdated resource limit; tying the new resource limit to the CPI so it will adjust for inflation moving forward; and disqualifying people who artificially impoverish themselves by giving away or re-arranging assets. The establishment of a 5-year look back and 5 percent limit for disposition or transfer of resources is prudent to prevent individuals or couples from hiding resources in order to become eligible for the SALS subsidy.

Expanding the monthly personal expense allowance and tying this figure to the CPI establishes an expense allowance that is in accord with the current cost of living and ensures this figure will remain accurate into the future.
