

Maryland Shooter Qualification Sessions Calendar – 2025

Requirements:

Applicants selected for managed hunts must demonstrate proficiency with the weapon to be used during the hunt. A standardized shooting proficiency certification has been established for managed hunts, as well as selected managed hunting programs conducted by other local, state and federal agencies. This certification system allows a hunter to satisfy the shooting proficiency requirement by qualifying at a single site, even if selected for more than one managed hunting program. It is recommended that you contact the organization offering the qualification session prior to the event for more information. Some locations may require you to bring your own personal protective equipment (PPE) including eye and ear protection. In addition, some of the locations may charge a fee.

Additional information regarding these proficiency-testing requirements will be made available to successful applicants.

Special qualification sessions have been scheduled as follows:
