Chapter 1

INTRODUCTION AND FRAMEWORK

Parks, recreation, and open space remain key components of a community's quality of life. As part of the Baltimore, MD metropolitan area, Harford County continues to develop an outstanding parks and recreation system to serve a growing population. Aided by State and Federal funding programs, a strong network of local recreation councils and partnerships with other public and private organizations, the Harford County Parks and Recreation Department works to meet the leisure service needs of residents well beyond County resources. Opportunities for team sports, individual recreation and special events are available to the community at the many parks and facilities in the County. As the community grows and changes in the future, it is important to plan for future parks and facilities and for meeting the recreation needs of the population. This plan sets forth the goals and policies which will guide the actions of the Department of Parks and Recreation over the ten-year planning period. These goals and policies will be implemented through the capital project recommendations for the short, medium and long range planning periods.

To fulfill the requirements of Maryland's Program Open Space (POS), the *2018 Harford County Land Preservation, Parks, and Recreation Plan* describes the County's current status and efforts not only in recreation and parks, but in agricultural preservation and natural resource conservation as well. The following introduction to the plan presents the context for the plan, including local policies that have directed land preservation, parks, and recreation efforts and other circumstances that have significant impacts on County leisure services.

RELATIONSHIP TO THE COMPREHENSIVE PLANNING PROCESS

Harford County Master Plan

The Harford County Charter requires the Department of Planning and Zoning to "prepare and propose Master Plans". Furthermore, the Charter requires the inclusion of a series of elements or components in the Master Plan which "further advance the purposes" of the Master Plan. Each of these elements needs to "describe how it relates to the other elements" in achieving the overall goals of the Master Plan.

Harford County's Master Plan establishes an overall vision for the County to guide its future growth. In 2009, the state launched Smart, Green and Growing, a multi-agency initiative that clarified the role of the local comprehensive plans, required accountability by local jurisdictions, and added to the state planning visions. As part of the Smart, Green, and Growing legislative package, Harford County must submit an annual report that addresses specific smart growth measures and indicators that support the statewide land use goal of targeting development within designated Priority Funding Areas and minimizing development outside of these areas. Harford County's 2012

Master Plan and Land Use Element Plan built upon various state and regional planning initiatives, including all of the elements previously mentioned.

In 2016, Harford County developed the HarfordNEXT County Master Plan which unites the County's element plans into one streamlined document and introduces a thematic approach to organize policies and implementation strategies. HarfordNEXT combines multiple Element Plans that were updated on different timetables into one overarching plan.

Element Plans

Previously, Harford County's Master Plan and Land Use Element Plan were supported by several standalone element plans; such as the Transportation Element Plan, Natural Resource Element Plan, Historic Preservation Element Plan, and the Priority Preservation Area Element Plan. In an effort to streamline the Master Plan and coordinate policies and implementations across different disciplines, the Department of Planning and Zoning conceived a contemporary approach that organizes the plan around six overarching themes. This thematic approach covers the same fundamental topics as previous element plans; compiling the elements into a single document allows for more comprehensive and coordinated planning across the 25-year planning horizon of HarfordNEXT.

The six themes represent a holistic perspective on broad planning topics; the six themes are Grow with Purpose, Preserving Our Heritage, Mobility and Connectivity, Promoting Healthy Communities, Environmental Stewardship, and Economic Vitality. Each theme is structured around a number of principles and goals that correspond to implementation strategies to guide county policies over the life of the plan.

Seven community planning areas were established to facilitate strategic implementations at the community level. The Community Areas include Churchville-Creswell, Edgewood, Fallston, Greater Bel Air-Forest Hill-Emmorton, Greater Havre de Grace-Aberdeen-Bush River, Joppa-Joppatowne, and the Northern Tier.

PURPOSES OF THE PLAN

2017 State Guidelines

Since 2003, the *Guidelines for Local Land Preservation, Parks, and Recreation Plans* (LPPRP's) have included agricultural and natural resources sections in local LPPRP's in addition to the traditional emphasis on recreation and parks. The purpose was to help clarify for State and local stakeholders the relationships and distinctions between these areas of public interest. For all areas, the goal was to examine the set of State and local efforts, determine if they are complementary or conflicting, identify shortcomings, and recommend improvements for State and local administrations and lawmakers. Completion of the LPPRP is a prerequisite for county participation in Maryland's Program Open Space (POS) Localside program. The *2017 Guidelines* were revised to

define current program goals and objectives accordingly, to update major components of the 2013 plan, and provide an understanding of the County's goals, strategies, and priorities for investing to improve parks and recreation facilities and open spaces for public benefit. Additionally, the 2017 LPPRP Guidelines require the County to utilize Geographic Information System (GIS) mapping efforts to identify County parks and facilities in terms of proximity to population, as well as, park equity mapping for specific identified groups. The plan is divided into three element chapters:

Recreation and Parks Element: The major focus of the 2018 LPPRP, this element will address the recommendations for parks and recreation made in the 2013 State LPPRP.

Agricultural Land Element: Update on the progress of local programs since the 2013 LPPRP

Natural Lands/Resources Element: Brief update on the progress of local programs since the 2013 LPPRP.

Local Agency Preparation of the Plan

The Harford County Parks and Recreation Department is the lead agency and driving force behind the *2018 Harford County Land Preservation, Parks, and Recreation Plan*. The department is the plan coordinator and will have the primary role in implementing recommendations related to recreation and park services. The section of the LPPRP which focus on agricultural preservation and natural resource conservation are drawn from existing sources, including HarfordNEXT and County policies. Implementation of recommendations regarding agricultural preservation and natural resource conservation will fall primarily to the Harford County Department of Planning and Zoning. The Department of Parks and Recreation and the Department of Planning and Zoning coordinate efforts regarding priorities for acquisition of passive parkland and environmental preservation easements.

PUBLIC PARTICIPATION

The Department of Parks and Recreation serves as the lead agency for the Land Preservation, Parks, and Recreation process. Public participation is a critical element of the planning process. The goal of the public participation process for the Land Preservation, Parks and Recreation Plan is to obtain input from a broad base of the population regarding their recreation and land preservation priorities and interests.

Engaging the public on the Plans and the process is a crucial step in a successful public participation process. With the wide use of the internet to provide information and solicit feedback, the Department of Parks and Recreation developed a survey to receive public comment regarding the local park system and recreation programs. Respondents were asked questions and could provide information on any or all of the following topical areas; team and active sports facilities; environmental and nature programming;

community facilities and individual activities; facilities and programs for senior citizens; and facilities and programs for individuals with disabilities.

Invitations to participate in the survey were extended via email to County Advisory Board, the Recreation Council Presidents, County employees, the Therapeutic Recreation Community, the County Office on Aging program participants, and other recreation interest groups. Additionally, access to the survey was highlighted on the Harford County website, its social media pages, and a press release also was forwarded to the media to provide information to the general public.

The draft plan was distributed for review. Presentations were given at public meetings of the Parks and Recreation Advisory Board, the Environmental Advisory Board, and the Recreation Council Presidents. The final draft was forwarded to the Harford County Council for review and adoption. Additionally, the Harford County Council held a public hearing as part of the legislative approval process.

DEFINITIONS USED IN THE PLAN

County land preservation and recreation plans in Maryland analyze recreational land in several ways, including acreage, service area, and acres per thousand residents served. The following terms, some applicable to land preservation and some applicable to recreation/parks, are used throughout the *2018 Harford County Land Preservation, Parks, and Recreation Plan*:

- **Agricultural Land Preservation District:** an area in which normal agricultural activities are protected and encouraged, and which is formally established through Article XVI of the Harford County Code.
- **Community Parks:** Lands providing active and passive recreational opportunities for all neighborhoods within either a specific, geopolitically-defined area or a radius containing a large, developed area. Can also serve specific, organized sports groups.
- **Regional or Countywide Parks:** Large, multipurpose parks that draw participants from throughout the County. Provide organized and unorganized sports, active and passive recreation and preservation of sensitive natural areas.
- **Development Right:** The right to develop one residential unit on a parcel in the AG Agricultural zoning district, as prescribed in section 267-53(D)(4) of the *Harford County Zoning Code*.
- **Easement:** An encumbrance on land that restricts the owner's rights to develop or otherwise use the land for other than specified uses, such as agriculture, recreation, or open space.

- **Green Infrastructure:** The use of vegetation, soils, and other elements and practices to restore some of the natural processes required to manage water and create healthier urban environments. At the County level, green infrastructure is a patchwork of natural areas that provides habitat, flood protection, cleaner air, and cleaner water.
- **Neighborhood Parks:** Parks of smaller size with limited opportunities for active and/or passive recreation (usually playgrounds) that draw participants only from the immediate area—usually walking distance.
- **Purchase of Development Rights:** A transaction resulting in compensation to an owner of land in the AG Agricultural zoning district in return for placing an easement on the property prohibiting the exercise or sale of development rights from the property.
- **Semipublic Recreation:** Recreational opportunities which are privately-owned and require a membership to participate. Membership is open to the general public, and fees are set so as not to exclude large segments of the population.
- **Transfer of Development Rights:** The ability to develop properties within the residential, business and industrial districts using development rights from parcels within the AG zoning district.

FRAMEWORK

The framework for any plan describes the area for which the plan is written. The framework for the *2018 Harford County Land Preservation, Parks, and Recreation Plan* includes information in five important areas:

- **Physical Characteristics**—Information on the County's forests, woodlands, streams, wetlands, Critical Areas (associated with the Chesapeake Bay), soils, steep slopes, unique natural areas, and development patterns will help guide decision on future park sites and recreation services.
- **Demographic Characteristics**—Information on the County's population, such as growth in number of residents, age, gender, and income will help analyze current and future demand for recreation services.
- **Planning Framework**—Information on the planning policies and regulations governing Harford County is essential background material to understand the factors in park location and development.

PHYSICAL CHARACTERISTICS

Harford County is located northeast of Baltimore, Maryland, near the source of the Chesapeake Bay. The County is bordered on the north by the Maryland/Pennsylvania State line, on the east by the Susquehanna River, and on the south by the Chesapeake Bay.

Information on the physical characteristics of Harford County is presented below. The following features are mapped to provide graphic information on the basic environment of the County. This is a starting place for decision making about planning and land use.

- Water features.
- Woodlands and steep slopes.
- Prime agricultural soils.
- Unique natural areas and Critical Areas.
- Preserved lands.

The *Harford County Critical Areas Plan* and the *2009 Natural Resources Element Plan* contain more detailed information and inventories of the County's natural features and habitats of rare, threatened, and endangered species.

Water Features

Water features are significant for all three components of the *2018 Harford County Land Preservation, Parks, and Recreation Plan*. Wetlands, both tidal and nontidal, must be preserved. Floodplains should also be preserved, wherever possible. Structures in floodplains should be severely restricted, with only infrastructure and low-intensity uses allowed. Occasionally, diamonds and athletic fields with no accessories may be located within floodplains. Hydric soils cannot percolate water as well as other soils, which also severely limits development for septic systems and for facilities which need well drained soils.

Most of Harford's water features are located in the southern portion of the County (Map 1.1). Floodplains and tidal wetlands are found along many of the creeks, particularly as the waterways branch out from the bay.

Woodlands and Steep Slopes

Woodlands cover large land areas scattered throughout Harford County (Map 1.2). Woodlands provide wildlife habitat, ecological balance, and, in some cases, recreation opportunities for residents. Much of the woodland cover is part of the Susquehanna State Park, along the Susquehanna River, and Rocks State Park, in the area of Jarrettsville.

Prime Agricultural Soils

Preserving agricultural land is a principal goal of both the *Harford County Master Plan* and the *2018 Harford County Land Preservation, Parks and Recreation Plan*. Harford County has a significant amount of undeveloped prime agricultural soils, considering the development pressure outward from Baltimore. Prime soils are located throughout the

County (Map 1.3), particularly near the Chesapeake Bay, in the Bel Air-Emmorton area, and in the northern sections of the County.

The classic land use dilemma centers on the fact the best land for agriculture is also the best land for development. Development along the I-95 corridor, where County policy focuses future growth, competes with agriculture for much of the prime land in the southern part of the County.

Unique Natural Areas and Critical Areas

Some lands should be preserved for unique natural characteristics or value in preserving special assets (Map 1.4). The Chesapeake Bay Critical Areas Program is required by State law to manage land use within 1,000 feet of tidal waters and tidal wetlands. The program accomplishes two major purposes:

- Protects both water quality and natural habitat.
- Accommodates future growth while still respecting environmentally sensitive areas.

Critical Areas are divided into three management areas:¹

- Intensely Developed Areas
- Limited Development Areas
- Resource Conservation Areas

Each area permits varying types and intensities of development. The complete program is described in the *Harford County Critical Area Management Program* (Harford County Department of Planning and Zoning, February 2011).

Unique natural areas (Map 1.4) are home to species of plants and animals that are rare, threatened or endangered. Several areas in Harford County are habitats that are important to the local culture and history. In addition, large areas in the northern and central parts of the County and along major waterways are identified as Sensitive Species Project Review Areas (SSPRA), which are "...general locations of documented rare, threatened and endangered species".²

The Deer Creek Scenic River District (Map 1.4) is the area within 150 feet of either side of the creek. The district is established through the Maryland Wild and Scenic Rivers Program to preserve the natural beauty of the creek environment.

- Intensely Developed Areas

Development—Preservation Pattern

Land in Harford County is developed along two highway corridors (Map 1.5):

- I-95/U. S. 40, an east-west corridor through the southern part of the County
- MD 24, a north-south corridor from I-95 to the Bel Air area

The County has identified a “Development Envelope”, anchored by the two corridors. County policy strongly encourages development to take place within the Development Envelope to make maximum, efficient use of public infrastructure, including water and sewer services, and roads.

The U. S. Census Bureau defines “urban” and “rural” areas in terms of population density.³

- An “urban” area is a collective term referring to all areas that are urban. For Census 2010, there are two types of urban areas: urban clusters and urbanized areas. An “urbanized area” is an area consisting of a central place(s) and adjacent territory with a general population density of at least 1,000 people per square mile of land area that together have a minimum residential population of at least 50,000 people. An “urban cluster” is a densely settled territory that has at least 2,500 people but fewer than 50,000. The urban development pattern in Harford County is centered on the Development Envelope (Map 1.5).
- A “rural” area is any territory, population, and housing units not classified as urban.

Urban and rural areas typically have different recreation needs. Urban areas frequently have a sizeable population to participate in activities, but the denser development pattern makes land for recreation facilities much more scarce and valuable than in rural areas. In contrast, rural areas often have sufficient land for recreation facilities. However, the facilities often have only a small nearby service population, and many users must travel significant distances to use the facilities.

The population of Harford is more rural than in other parts of Maryland (Table 1.1). However, both Harford County and Maryland as a whole increased in urban population and decreased in rural population since 2000. In Harford, as elsewhere in the nation, the urban area continues to increase as the rural area decreases. One of the primary reasons for the increase in urban population is the location near to public services, such as recreation.

Source: U. S. Census

County policy also strongly encourages land preservation outside of the Development Envelope. Both the State of Maryland and Harford County have programs that preserve agricultural land through easements. The Harford County program also includes “agricultural districts” in which farmers voluntarily enroll for possible tax abatements, eligibility to have development rights purchased, and other benefits. Several other programs utilize easements and other means to preserve land, including the Rural Legacy Program and the Maryland Environmental Trust. The Agricultural Preservation section of this plan provides detailed information on these program efforts since the 2013 Plan.

Demographic Characteristics

Demographics describe the people of an area using statistics. The *2018 Harford County Land Preservation, Parks and Recreation Plan* includes information on Harford County’s current and forecasted population, age, gender, income, and housing. Presentation and analysis of this information is needed by geographic area of the County. Where appropriate, the information is broken down and presented by recreation council service areas. Recreation councils are nonprofit organizations charged with assessing public needs, operating recreation programs, coordinating volunteer efforts, and identifying capital needs at recreation facilities throughout the County. Fifteen of the twenty recreation councils recognized by the Department of Parks and Recreation provide a variety of sports and other recreation activities for a defined geographic area. These areas are depicted on Map 1.6 and utilized for discussion of the demographics at a community level. Some of the information is reported by recreation council, using the geography noted on Map 1.6.

Population

The total population of Harford County was 244,826 in 2010 (Table 1.2). Population is larger in the southern portion of the County (e.g., Emmorton, Edgewood, Bel Air) in and along the development envelope near I-95 and proximity to the County seat of Bel Air.

Belcamp, Hickory/Fountain Green, Forest Hill and Emmorton remain the fastest growing recreation council areas since 2000, while Dublin-Darlington and Jarrettsville have grown the least. Several communities throughout the County experienced slower population growth (Table 1.2) due primarily to reduced household sizes associated with smaller families and an aging population.

Recreation Councils

Recreation councils are critical partners in the recreation system of Harford County. Harford County has a total of 20 recreation councils. Fifteen of the councils are based geographically⁴—the council is responsible for operating programs and scheduling facilities in a specific geographic section of the County (Map 1.6). The information concerning population and demographic characteristics that is presented throughout the rest of this chapter based on the recreation council boundaries that are depicted on Map 1.6.

⁴ Council jurisdictions are general in nature. The boundaries shown on Map 1.6 are approximate and not legally defined. Furthermore, all programs are open to all County residents.

Emmorton, Edgewood, and Bel Air will continue to be the recreation council areas with the highest population through 2030 (Table 1.3). Total County population is expected to increase by 11.6 percent by 2030. The largest numeric increases should occur in Aberdeen, Belcamp, Emmorton, Edgewood, and Havre de Grace, likely because of development in the I-95 corridor.

Past growth in Harford County has, not surprisingly, followed a pattern of expanding the existing urban areas, such as Bel Air, often along major transportation arteries, such as MD 24 or U.S. 1. As a suburb of the Baltimore metropolitan area, Harford County has been concerned with rapid growth for several decades. From 2000 to 2015, the County's population grew by 14.4 percent. While this growth rate is slower than previously expected, it is the second fastest growth rate in the Baltimore Metropolitan Counties. From 1990 to 2004, for example, the County's population grew by almost 30

percent, the second fastest rate among the six governments in the Baltimore Metropolitan Council. While the growth rate is lower than anticipated, Harford County continues to grow (Table 1.4). Larger future population will require more recreation resources—such as land, facilities, programmers, and funding sources—to meet greater demand for leisure activities.

Age

Age is a significant factor in recreation and parks planning. The recreation needs of young children and teens differ from those of adults and seniors. For instance, young children use playgrounds and often participate in activities and programming with their parents or guardians. School age children utilize a myriad of recreation activities, programs, and facilities, particularly sports or other team designed activities and programs. Adults and senior citizens spend more time participating in individually focused activities and programming, including pickle ball, running, fitness, hiking or biking on trails. Emmorton, Edgewood, and Bel Air—the three recreation council areas with the greatest total population—also have the greatest number of children, teens, young adults, and adults (Table 1.5).

Changes in the age of a population will also modify the area's recreation needs. Age changes are illustrated by the change in the number of people in a specific age group. From 2000 to 2010:

- The numbers of teens, adults, and seniors increased in Harford County. The number of children and young adults decreased.
- Edgewood had the largest increase in number of children (age 0–9). Havre de Grace and Bel Air had the largest decreases.
- Most recreation council areas had an increased number of teens (age 10–19), with Bel Air, Dublin-Darlington, Jarrettsville, and Joppatowne experiencing a decrease.
- Belcamp also had the greatest increase in the number of young adults (age 20–39). Churchville had the greatest decrease in the number of young adults.
- Every recreation council area had an increased number of adults (age 40–64). Hickory-Fountain Green, Forest Hill, and Emmorton had the greatest increases.
- Every recreation council area had an increased number of seniors (age 65 and over). Emmorton and Forest Hill experienced the largest increases.
- The population of the Aberdeen Proving Ground (APG) has significantly different age characteristics than the remaining population of Harford County.

Age changes can be broadly identified by changes in the median age of a population. The median age is the “middle” age: exactly half of the population is older than the median, and half is younger. Generally, if the median age increases, the population is getting older. If the median age decreases, the population is getting younger. Generally, the age of the Harford County population has increased since the 2000 Census (Table 1.6). The recreation council areas with the highest median age are Dublin-Darlington, Churchville, Fallston, Norrisville. The areas with the lowest median age are Edgewood, Belcamp, and Emmorton. The difference in age between the population of the APG and the remainder of Harford County is evident in the median age: 26.8 for APG, 40.1 for the remainder of the County.

Table 1.6
Median Age
Harford County, 2000-2015

Recreation Council Area	Median Age			Change	
	2000	2010	2015	Years	Percent

Aberdeen Proving Ground *	23.0	24.3	26.8	3.8	16.5%
Total	35.2	39.4	40.1	4.2	11.9%

Source: U.S. Census Bureau, 2000 and 2010 and 2011-15 American Community Survey.

*Note: The population of Aberdeen Proving Ground resides and, largely, meets their recreation needs on the base.

Gender

Gender has traditionally been an important consideration in recreation. In recent years, both males and females are increasing participation in recreational activities. The proportion of females in both Harford County and the entire State increased slightly from 2000 to 2015 (Table 1.7). Harford has slightly larger proportion of males than other areas of the State.

Table 1.7
Gender, 2000 - 2015
Harford County and Maryland

Gender	Harford County						Maryland					
	2000		2010		2015		2000		2010		2015	
	Number	Percent	Number	Percent	Number	Percent	Number	Percent	Number	Percent	Number	Percent

Source: U.S. Census Bureau, 2000 and 2010; 2011-15 American Community Survey; Harford County Dept. of Planning and Zoning.

Housing

Housing stock is also growing in Harford County (Table 1.8). As expected, the recreation council areas that have the greatest population (Emmorton, Edgewood, Bel Air) also have the largest housing stock. Conversely, the recreation council areas with the smallest population (Norrisville, North Harford, Dublin-Darlington) also have the fewest housing units.

Housing stock has grown at a faster rate than population (Table 1.8). The number of housing units in the 15 recreation council areas, which encompass all of Harford County except the Aberdeen Proving Ground, rose by 14.9 percent from 2000 to 2015, compared to a 14.4 percent increase in population. The faster rise in housing stock leads to two conclusions:

- The number of persons per housing unit is decreasing; in fact, from 2.62 in 2000 to 2.53 in 2015.
- While land values have stabilized in conjunction with the overall recovery from the economic recession of the late 2000's, it remains more profitable for leading property owners to sell land for new residences and other developments rather than for less intense uses, such as parks, recreation, and open space.

Table 1.8
Housing Units, 2000 - 2015

Recreation Council Area	2000	2010	2015	Change: 2000-2015

Income

Income can affect ability to participate in specific types of recreation, as well as the ability of recreation councils to fundraise. The recreation councils set fees for organized programs to cover instructors, referees and basic equipment. However, some activities require more personal equipment than others which can be a prohibitive expense for lower-income residents. Areas of higher income in Harford County are Fallston, Hickory/Fountain Green, Forest Hill, Jarrettsville, and Churchville (Table 1.9). Recreation council areas of lower income are the Aberdeen, Joppatowne, Dublin-Darlington, and Edgewood.

Table 1.9
Harford County Median Household Income

Recreation Council Area	Median Household Income	Relative to County Median
Aberdeen	\$52,580	-\$27,885
Bel Air	\$80,850	\$385
Belcamp	\$80,483	\$18
Churchville	\$99,414	\$18,949
Dublin-Darlington	\$68,371	-\$12,094
Edgewood	\$61,123	-\$19,342

PLANNING FRAMEWORK

Introduced in the *1977 Harford County Master Plan*, the concept of the Development Envelope is the foundation for the planning policies of Harford County. The Development Envelope defined a geographic area for planned development—generally, the east-west corridor defined by I-95/ U.S. 40 and the MD 24 corridor north to Bel Air. Within the Development Envelope, public water and sewer services would be provided and more intense development focused. Other community facilities, such as roads, schools and parks and recreation would be constructed to serve the increased population. The concept was reinforced by the land use plans in 1988 and 1996, with minor modifications to the boundaries. The *2004 Master Plan and Land Use Element Plan* reconfirmed the Development Envelope as the Designated Growth Area and identified the need for revitalization and growth management efforts within the area. The *HarfordNEXT County Master Plan* identified an overall Plan, Goals and series of Guiding Principles. These Guiding Principles form the foundation for the Land Use Element Plan and in effect provide Harford County's vision for sustainability through growth management and resource conservation.

Outside the Development Envelope, preserving the rural character and the agricultural resources of the County has long been an integral part of the planning policies for Harford County. Agricultural preservation efforts coupled with agricultural economic development efforts have been a cornerstone of the master plan.

The County master plan and its functional elements integrate County policies regarding agricultural preservation, natural resource conservation, and parks/recreation to preserve community character. The plans establish the Development Envelope, focusing development within this area while preserving the rural character outside of the Development Envelope. Plan policies are written with a strong underlying environmental protection ethic and establish resource preservation as a high priority throughout the County. Furthermore, parks/recreation/ open space policies are critical to community desirability for the entire County population.

Chapter 2

RECREATION, PARKS, AND OPEN SPACE ANALYSIS

INTRODUCTION

Parks, recreation, and open space are key components of a community's quality of life. As part of the Baltimore, MD metropolitan area, Harford County has developed an outstanding parks and recreation system to serve its growing population. The Harford County Department of Parks and Recreation, along with the leadership of Harford County Government, a strong partnership of County, Public Schools, and municipal governments, local recreation councils and other public and private organizations, has developed a County-wide system to meet the leisure service needs and interests of residents. With the addition of private fundraising and volunteer assistance, as well as State and Federal funding programs, the recreation opportunities are far more extensive than those which could be provided by County resources alone. The County's park system and recreation programs, in partnership with local recreation councils, have provided residents with constructive, life-enriching leisure and educational activities. The following chapter comprises the Recreation, Parks and Open Space Element of the 2018 Land Preservation, Parks and Recreation Plan.

The Harford County public recreation system is comprised of sites owned by municipal, County, State, and Federal government, and the Harford County Board of Education (Map 2.1). The public system includes the following areas and facilities (Table A-1):

• 177 sites	• 117 playgrounds	• 246 boat slips
• 13,747.7 acres of land	• 51 sites with picnic facilities	• 7,665 feet of shoreline for fishing
• 8 Activity/Recreation Centers	• 34 pavilions	• 9.4 acres of ponds
• 2 Nature Centers	• 5 swimming pools	• 16 sites with water access
• 188 baseball/softball diamonds	• 8 volleyball courts	• 6,025 parking spaces
• 203 multisport fields	• 38 miles of trails	• 81 tennis courts
• 86 outdoor basketball courts	• 8 large boat ramps	• 1,500 feet of beach
• 96 indoor basketball courts	• 11 small boat ramps	

As discussed in Chapter 1, the land in Harford County is developed along two highway corridors (Map 1.5):

- I-95/U. S. 40, an east-west corridor through the southern part of the County
- MD 24, a north-south corridor from I-95 to the Bel Air area

The County has identified a "Development Envelope", anchored by the two corridors. County policy strongly encourages development to take place within the Development Envelope to make maximum, efficient use of public infrastructure, including water and sewer services, and roads. This development pattern has resulted in higher population density inside the Development Envelope.

The U. S. Census Bureau defines “urban” and “rural” areas in terms of population density:¹

- An “urban” area is a collective term referring to all areas that are urban. For Census 2010, there are two types of urban areas: urban clusters and urbanized areas. An “urbanized area” is an area consisting of a central place(s) and adjacent territory with a general population density of at least 1,000 people per square mile of land area that together have a minimum residential population of at least 50,000 people. An “urban cluster” is a densely settled territory that has at least 2,500 people but fewer than 50,000. The urban development pattern in Harford County is centered on the Development Envelope (Map 1.5).
- A “rural” area is any territory, population, and housing units not classified as urban.

Urban and rural areas typically have different recreation needs. Urban areas frequently have a sizeable population to participate in activities, but the denser development pattern makes land for recreation facilities much more scarce and valuable than in rural areas. In contrast, rural areas often have sufficient land for recreation facilities. However, the facilities often have only a small nearby service population, and many users must travel significant distances to use the facilities.

The population of Harford is more rural than in other parts of Maryland (Table 1.1). However, both Harford County and Maryland as a whole increased in urban population and decreased in rural population since 2000. In Harford, as elsewhere in the nation, the urban area continues to increase as the rural area decreases. One of the primary reasons for the increase in urban population is the location near to public services, such as recreation.

For purposes of the 2018 LPPRP level of service analysis concerning parks and recreation facility locations will focus most often on parks and facilities inside the Development Envelope and outside the Development Envelope. Within the Development Envelope a radius of 1/2-mile is used to indicate opportunities in the existing recreational system. This approach is consistent with State and HarfordNEXT goals encouraging walkable communities and strategic locations for parks and amenities in support of making these communities more desirable places to live, work, play and visit. Outside the Development Envelope a 5-mile radius is used to indicate opportunities in the existing recreational system. This radius coincides with a convenient 15-minute drive to specific locations.

Harford County is working to meet the changing needs for recreation facilities in the County. County priorities are discussed later in this chapter, which also includes a capital program for land acquisition, capital development, and facility rehabilitation.

Recreation Programs

Recreation programs in Harford County are provided through the 20 separate recreation councils and the County. The offerings cover a full range of programming and include:

- Above & Beyond
- Aerobics
- Archery
- Arts & Crafts
- Arts Camp
- Badminton
- Ballet, Tap, Jazz
- Baseball (Youth)
- Baseball (Adult)
- Basketball (Youth)
- Basketball (Adult)
- Baton
- Before/After School Program
- Board Games
- Bocce
- Bowling
- Bridge
- Card Games
- Canoeing
- Cheerleading
- Chesapeake Bay Programs
- Chess
- Christmas Celebration
- Community Band
- Computer Lab
- Concerts
- Dance (Ballroom)
- Dance (Clogging)
- Dance (Country, Square, Line)
- Drama
- Drop-in Basketball
- Easter Egg Hunt
- Eden Mill Tour
- Environmental Activities/Games
- Etiquette
- Fencing
- Festivals
- Field Hockey
- Fitness Camp (Youth)
- Fitness (Adult)
- Fitness Room
- Football
- Gymnastics
- Halloween Celebration
- Hiking
- Homeschool programming
- Horseback Riding Lessons
- Horseshoes
- Independence Day Celebration
- Indoor Soccer
- Jazercise
- Jump Rope Club
- Kayaking
- Lacrosse (Youth)
- Lacrosse (Adult)
- Martial Arts
- Model Airplane Flying Club
- Native American Programs
- Nature Center Exhibits
- Nature Programs
- Performing Arts
- Pointe
- Preschool programs
- Roller Hockey (In Line)
- Rugby
- Scrapbooking
- Scuba Diving
- Senior Citizen Clubs
- Ski Clubs/Trips
- Soccer (Youth)
- Soccer (Adult)
- Softball (Youth)
- Softball (Adult)
- Sports Conditioning
- Start Smart
- Step Aerobics
- Stream Studies
- Summer Recreation Center
- Swim (Youth)
- Swim (Adult)
- Teen Program
- Teen Youth Center
- Tennis (Youth)
- Tennis (Adult)
- Therapeutic Recreation
- Track & Field
- Volleyball (Youth)
- Volleyball (Adult)
- Water Aerobics
- Weightlifting
- Wrestling
- Yoga
- Youth Center

The Harford County Department of Parks and Recreation and the recreation councils offer programs for all ages and ability levels. Activities include programs that meet on a regular basis during a season/session, such as classes and team sports programs. Recreation council activities are offered to serve area residents, although all programs are open to all County residents (if, for instance, a desired program is not offered in the participant's home council). Other activities and events are operated by the professional staff of the Harford County Department of Parks and Recreation.

Most of the programs are run through the recreation councils, each of which is incorporated as a 501(c)(3) nonprofit corporation. Registration fees collected for the programs and other fundraisers must cover program costs, such as referees/umpires, instructors, and equipment. The recreation councils may also supplement departmental maintenance activities and do small capital projects.

RECREATION COUNCILS

Recreation councils are critical partners in the recreation system of Harford County. Recreation councils are independent nonprofit organizations that focus on assessing public needs, operating recreation programs, coordinating volunteer efforts, and identifying capital needs at recreation facilities throughout the County. Each council conducts fundraising, submits requests to the County for capital projects, and maintains its own officers and administrative structure. Council activities are coordinated through monthly meetings of the various recreation councils. The presidents of the recreation

councils meet as a group regularly to address common issues and provide input on department initiatives and the capital budget. The Harford County Department of Parks and Recreation sets rules and regulations as operating guidelines for the recreation councils.

Harford County has a total of 20 recreation councils. Fifteen of the councils are based geographically²—the council is responsible for operating programs and scheduling facilities in a specific geographic section of the County (Map 2.2). Five councils are based functionally—the council is responsible for operating programs and promoting a single, major, unique recreation site:

- Anita C. Leight Estuary Center (environmental education center)
- Eden Mill Nature Center (environmental education and industrial history center)
- Equestrian Center Committee (equestrian, agricultural, and other community-based events)
- ACPR Gymnastics Council (countywide gymnastics focused program)
- Tollgate Woodshop (countywide wood-working facility and programming)

The recreation councils have a significant impact on the leisure services offered to Harford County residents. In 2016, recreation councils accounted for 423 programs with more than 160,000 registrants (Table 2.1). Council budgets ranged from \$7,090 to a high of more than \$1 million.³ The Department also works in cooperation with community groups, such as the Ma & Pa Foundation, who provide volunteer services to the Department, but are not formal recreation councils. In 2016, 32 volunteers from the Ma & Pa Foundation provided 960 volunteer hours along the Ma & Pa trail segments. Additionally, some therapeutic recreation services are provided by the Department in conjunction with 540 volunteers, who provided 1,137 hours of services in 2016. All told, more than 20,000 volunteers logged over 598,000 hours of time to assist in recreation council activities. It is likely the figures in Table 2.1 understate the extent of council activity because of informal, and possibly inconsistent, volunteer registration. Clearly, volunteerism is alive and well in Harford County, and the recreation councils remain a vital part in meeting the leisure service needs of County residents.

² Council jurisdictions are general in nature. The boundaries shown on Map 2.2 are approximate and not legally defined. Furthermore, all programs are open to all County residents.

³ By comparison, the annual operating budget for the Harford County Department of Parks and Recreation is approximately \$9-10 million.

Map 2.2

RECREATION COUNCIL AREAS

- Recreation Council Boundaries
- Special Committee Locations

1. Eden Mill Nature Committee
2. All County Parks & Recreation Gymnastics
3. Equestrian Committee
4. Woodshop - Tollgate
5. Otter Point Creek Alliance

Edgewood	21	1,006	\$149,977.70	222	15,798
Emmorton	33	4,592	\$1,023,427.57	1,312	36,676
Equestrian Center	1	88,094	\$41,267.00	5,724	39,050
Fallston	35	11,672	\$1,085,024.24	1,303	52,040
Forest Hill	30	5,735	\$768,781.38	1,203	53,057
Havre de Grace	34	5,134	\$457,134.68	1,127	30,104
Hickory/Fountain Green	32	8,590	\$932,292.33	1,868	60,893
Jarrettsville	14	1,105	\$200,293.00	206	11,770
Joppatowne	20	2,072	\$253,869.35	428	15,395
Norrisville	10	676	\$94,538.04	79	5,546
North Harford	24	1,860	\$374,943.63	338	42,061
Parks and Rec Woodshop	1	119	\$7,090.00	69	2,303
TOTALS	423	160,209	8,019,046	20,902	598,916

Note: Information is reported by the individual recreation councils. Differences in the amount of revenue, volunteers, and volunteer hours are the result of the differences to the mission, structure, service area, and nature of activities offered by each council.

1 Recreation Council raised funds

Source: Harford County Department of Parks and Recreation

Comparing Recreation Council activity from FY 2015 to FY 2016, as evidenced in Table 2.2, the following observations can be made. While the overall number of programs offered by Recreation Councils declined from 477 in 2015 to 423 in 2016, the total number of registrants for the programs increased substantially. This 48% increase saw registrations rise from a total of 107,736 to 160,209. As a result of this increase, Recreation Councils also saw an increase of \$868,452 in the money they spend and raise for their program activities.

Table 2.2
Recreation Council Activity, 2015–2016

	FY2015	FY2016	Change, 2015 & 2016	
			Number	Percent

Role of Private Facilities

The provision of recreation facilities is not solely the responsibility of the government. Homeowners associations, private entrepreneurs, membership clubs, and nonprofit organizations are key components in recreational opportunities for the Harford County citizens. Community open space and facilities can address many of the needs for informal play areas, small playgrounds, neighborhood trails, and natural open space. Community swimming pools and tennis courts serve large residential neighborhoods and may partner with recreation councils for summer swim team programs. Swim and tennis clubs and athletic clubs provide facilities to members and may be operated as either nonprofit or for-profit enterprises. Semipublic and private entities meet much of the current recreation demand in Harford County. Public swimming pools and programs are offered at Edgewood, North Harford and Magnolia Middle Schools, the Aberdeen Family Swim Center, and Exelon Power owns and operates an outdoor swimming pool near the Conowingo Dam.

The private sector meets many recreation needs through daily fee facilities, such as the public golf courses and driving ranges, which are privately owned and operated. Private facilities often work with the department to offer programs such as Senior Olympics and Junior Golf. None of the private sector facilities are included as part of the Needs Analysis, the Proximity Analysis, and the Park Equity Analysis that begins on page 2-25.

The priority for public sector recreation is, and must continue to be, providing facilities and programs where economics do not allow incentives for private sector involvement. Examples include the outdoor recreation facilities for a wide range of group and individual

sports as well as sites for nature appreciation and the preservation of significant environmental resources.

Public Participation

The survey and other public participation in the preparation of the *2018 Harford County Land Preservation, Parks, and Recreation Plan* is described in Chapter 1. A summary of the Harford County Parks and Recreation User Survey is provided in the appendix. Highlights from the survey results include:

- Total of 1,227 respondents Countywide
- 56% of survey respondents have registered for Recreation Council programs in the past 5 years
- 49% of question respondents have attended a nature program in the County in the past 5 years
- 97% of respondents have visited a County park or facility in the past 5 years
 - 59% have visited a County park or facility 10 or more times
 - 33% have visited a County park or facility more than 25 times
 - The top activities while at a park include:
 - Use paved trails (53%)
 - Enjoy nature (49%)
 - Use nature trails (48%)
 - Hiking (42%)
 - Playgrounds (41%)
- The top additional facilities respondents want to see the County develop include:
 - Paved walking and biking trails (43%)
 - Unpaved nature trails (35%)
 - Activity/Recreation Centers (33%)
 - Ropes Courses/Climbing Walls (29%)
 - Canoe/Kayak Launches (28%)
- The top additional programs/activities respondents want to see the County develop include:
 - Youth Outdoor Adventure programs (38%)
 - Youth Environmental/Nature programs (37%)
 - Adult Environmental/Nature programs (37%)
 - Youth Summer Camps (34%)
 - Adult Outdoor Adventure programs (32%)
- The top priority areas for the Department of Parks & Recreation include:
 - Acquire additional land for future park and facility development (39%)
 - Develop trail systems within existing parks (37%)
 - Develop trails that connect neighborhoods and parks (33%)
 - Develop water trails along County rivers (32%)
 - Develop new Activity/Recreation Centers (32%)

PARKS AND RECREATION GOALS OF 2013 LAND PRESERVATION, PARKS, AND RECREATION PLAN

The 2013 *Harford County Land Preservation, Parks, and Recreation Plan* established the following goals for the Parks and Recreation portion of the plan:

- *PR-1 Acquire additional recreation land, including waterfront properties, to help meet the needs of current and future residents.*
- *PR-2 Develop integrated greenway/trail systems with both public and private segments.*
- *PR-3 Monitor usage trends and add recreational opportunities and facilities that meet the needs of all segments of the public.*
- *PR-4 Provide active and healthy lifestyle opportunities for Harford County residents.*
- *PR-5 Work with Recreation Councils to continue to address the safety of recreation program participants*
- *PR-6 Develop additional community centers in appropriate areas.*
- *PR-7 Incorporate sustainable development and conservation practices in all Parks and Recreation parks and facilities.*
- *PR-8 Improve existing facilities and develop complementary facilities in support of the destination recreation/sports tourism market.*

DEPARTMENT ACCOMPLISHMENTS

Since 2013, the Harford County Department of Parks and Recreation has worked diligently to implement the priorities set forth in the *2013 LPPRP*.

The department constructed the Churchville Recreation Center – Level Building, as the final phase of the Churchville Recreation Complex. This 24,000-square foot building includes a double gymnasium, a meeting room, a multipurpose room, and a publicly available fitness room. The construction of the building allowed the Churchville Recreation Council to relocate their programming to the new building. The construction also allowed the ACPR recreation council to utilize the entire Churchville Recreation Center – Glenville Building for their gymnastics programming. The two recreation councils continue to work cooperatively to maximize usage of the entire complex. This project addresses 2013 LPPRP goals PR-3, PR-4, and PR-6.

The Department constructed the Schucks Road Regional Sports Complex, a 72-acre park site located on the edge of the County's development envelope. The site, dedicated in Spring 2016, includes five baseball diamonds, three of which are 90-foot diamonds.

Three recreation council groups cooperatively utilize the site. The park also includes a multi-purpose field, over 2 miles of walking trails, two playgrounds, a picnic pavilion, and areas that allow for future expansion of park amenities. This project addresses 2013 LPPRP goals PR-3, PR-4, and PR-7.

In its effort to provide additional active space fields for the continuing local recreation demand, the Department constructed two additional fields at the existing Churchville Recreation Complex. The Department also added fields at the new Darlington Park. These projects address 2013 LPPRP goals PR-3 and PR-4.

Additionally, the Department continued its partnership in the County Administration's Synthetic Turf Field Initiative. This initiative, in conjunction with Harford County Public Schools, focused on replacement of natural grass high school stadium football fields with synthetic turf fields. Since 2008, 8 natural grass fields have been replaced with synthetic turf fields at County high schools. Through a memorandum of understanding with HCPS, these synthetic turf fields have been made available to local recreation councils outside of school use, adding fields which were previously not available. Grass fields at the two remaining high schools, Fallston and Patterson Mill, are under development and under consideration, respectively. These projects address 2013 LPPRP goal, PR-3.

The Department also completed an assessment of the existing synthetic turf fields at County park and high school sites. The Synthetic Turf Field Initiative began in 2008 and some of the fields are nearing the point where they need to be replaced. This assessment used consistent criteria to identify the priority order for replacement of the synthetic fields. Replacement of synthetic field at North Harford High School was actively under construction during the drafting of the 2018 LPPRP. This project addresses LPPRP goals, PR-3 and PR-5.

The development of the Ma and Pa Heritage Trail began in the mid-1990s. The 2.0-mile Phase 1 segment opened in 1999, the 1.75-mile Phase 2 segment opened in 2000, and the 1.25 mile third segment connecting the trail to Edgeley Grove Park opened in 2008. The trail remains extremely popular with residents of all ages, including walkers, joggers, and bicyclists. The Department is currently in design to complete the approximately 2-mile connecting section of the trail that will result in the trail connecting Edgeley Grove Park in Fallston, through the Town of Bel Air, to Blake's Venture Park and ultimately to Friends Park in Forest Hill. This project addresses 2013 LPPRP goals PR-2, PR-3, and PR-4.

The Department renovated the Broad Creek boat launch, a fresh water boat launch in the northeast area of the County. The renovation included improvements to the boat launch traffic pattern, installation of a new launch, construction of a new retaining wall at the site, and ADA improvements to the facility. This project address 2013 LPPRP goal PR-3.

The 2013 Land Preservation, Parks, and Recreation Plan identified the need to purchase additional land to serve both active and passive recreation needs (PR-1). The County acquired a total of 140.4 acres of land between 2012 and 2017 through purchase and donation. The most significant acquisition during that time was the 69-acre parcel that will become the Emily Bayless Graham Park. This property was a donation consistent with the wishes of the former property owner, Emily Bayless Graham. This property is located

in the Emmorton community, in the center of the Route 24/924 corridor in the center of that part of the County development envelope. It will be developed into a passive park site as a condition of the donation of the property to the County.

The County also acquired additional parcels to meet a variety of community recreation needs:

- Rock Glenn property acquisition – this 21.4-acre acquisition in Aberdeen was a cooperative effort using funding from Stateside Program Open Space, local-side Program Open Space, the County, and the City of Aberdeen.
- Ma & Pa Trail easement – Hooper property – While this acquisition is both small and an easement, it is critical to completing the alignment of the proposed connection of the Ma & Pa Trail between the Bel Air and Forest Hill trail heads
- Northern Regional Park acquisition – this 50-acre acquisition in Whiteford is proposed as a location for a future regional sports complex.

These acquisitions address 2013 LPPRP goals PR-1, PR-2, PR-3, PR-4, PR-6, and PR-8.

The Department implemented single stream recycling in all County parks, centers, offices, school sports fields, and special events in 2014. During 2014, 2015, and 2016, the Department has collected more than 192,000 pounds of recyclable materials. This project addresses 2013 LPPRP goal PR-7.

The Department addressed several safety issues since the 2013 LPPRP (PR-5):

- Working cooperatively with the County, the Recreation Council partners adopted the background screening standards of the National Alliance for Youth Sports (NAYS), among all the recreation council programs.
- The Department and its Recreation Council partners continue to address concussion awareness training and information in cooperation with Harford County Public Schools (HCPS) and the Harford County Department of Health and Mental Hygiene.
- The Department has installed automated external defibrillators (AED's) at all of its Recreation Centers.

The department continued to undertake numerous other small projects during the last five years to address a wide variety of recreation needs. With the cooperation and assistance of the Harford County Public Schools, the Department is working to replace outdated playground equipment at the County's elementary schools. Additionally, the Department works with HCPS to maintain and improve the outdoor tennis and multi-purpose/basketball courts at school sites, as well as, recreation sites throughout the County. These projects addressed 2013 LPPRP goals PR-3, PR-4, PR-7, and PR-8.

2018 LPPRP GOALS

- ***PR-1 Acquire additional recreation land, including waterfront properties, to help meet the needs of current and future residents.***

Harford County has done an excellent job of obtaining and developing recreation land in one of the fastest growing counties in the State. The pressure to add more parks and open space will only increase with growing population as the County continues to be a desirable location in the suburban Baltimore region. Waterfront property is especially high-value for many reasons. The estuarine environment—where land meets water—offers a unique perspective on natural resources and processes. The County should look for any opportunity to increase public use and enjoyment of its water resources through acquisitions and partnerships.

The County will continue to work towards meeting the HarfordNEXT County Master Plan goal of 30.0 acres of local parkland per thousand population (ac/000) with a baseline commitment of acquiring additional open space at a level that will maintain the current benchmark of 29.5 ac/000 residents. Land acquisitions should include regional park sites to serve countywide needs or multiple recreation council areas as well as community park sites to serve more localized needs. The anticipated development of the 71-acre Graham property as a passive park site in the Emmorton community is an example of an acquisition that will serve both local and countywide needs.

HarfordNEXT also established a goal of a $\frac{1}{4}$ mile walkability standard for resident access to Parks and Recreation facilities within the development envelope. This LPPRP document utilized a $\frac{1}{2}$ mile radius for a walkability standard for analysis based on the State expectation. This expectation level resulted in existing areas within the Development Envelope that currently do not meet the State expectation. Efforts should focus on meeting the $\frac{1}{2}$ mile walkability standard within the Development Envelope prior to looking to meet the HarfordNEXT stated goal. Outside the Development Envelope, the 2018 LPPRP utilized a 5-mile radius for the access standard based on the State expectation. This 5-mile radius establishes an approximate 15-minute drive for access to park site and facilities.

The Department will continue to strengthen the development review process to ensure that future land dedications from homeowners' associations are appropriate additions to the County system of parkland and open space. The development review process is an opportunity for the County to coordinate the need for public and private open space. Open space within new neighborhoods will generally serve the localized recreation needs of the residents, should be provided based on the housing types and anticipated demographics of the residents, as well as, generally be owned and maintained by the homeowners association. In limited circumstances, donation of land and/or facilities to the County may be the most appropriate option for fulfilling open space requirements and serving public recreation goals.

- ***PR-2 Develop integrated greenway, land and water trail systems with both public and private segments.***

Greenways and trails have proven to serve many vital and useful functions, including:

- Waterway preservation
- Habitat preservation
- Recreation
- Alternative transportation
- Community enhancement
- Parks interconnection

Harford County already has many potential components of a greenway system. The Ma and Pa Trail (both the North and South segments), Winters Run, Bynum Run, Deer Creek, the Lower Susquehanna Heritage Greenway, and the Little Gunpowder Falls should all be part of a countywide system of trails for alternative transportation, public enjoyment, and community enhancement. Efforts should focus on the development of shared use paths within existing communities with connections to destinations and Parks and Recreation facilities.

The County will continue to make improvements that will allow citizens to connect to, and experience nature. An example of this is the recent purchase of an easement on private property in Bel Air to extend the County's main trail / greenway, the MA and PA Trail. The easement will allow the connection of two existing sections of trail that will create a premier trail network stretching from Edgeley Grove Park in Fallston to Friends Park in Forest Hill. The existing Forest Hill section is approximately 1.7 miles long between Friends Park and Blake's Venture Park. The existing Fallston-to-Bel Air section is about 3.3 miles between Edgeley Grove/Annie's Playground and Bel Air's Williams Street. Once completed, the nearly eight-mile trail will be one of the finest rail-trails in Maryland, taking travelers between Fallston and Forest Hill through the vibrant Bel Air business district. The scenic Ma & Pa Trail attracts thousands of visitors each year and is Harford County government's most popular parks and recreation facility.

The systems should include connected sections with public access and accommodations to encourage biking, walking, hiking, horseback riding, and other fitness-related activities. In addition to the land appropriate for greenway/trail designation and development, Harford County also has many partners able to contribute to a unified greenway network, including land preservation organizations (such as the Harford Land Trust and the Lower Susquehanna Heritage Greenway), State and local agencies (including DNR, MDP, and the County departments of Planning/Zoning and Parks/Recreation), and homeowners' associations (HOAs). Lands within HOAs can be an integral part of a trail network to connect population concentrations within the County to activity centers, particularly within the development envelope.

However, public access need not be a requirement of all greenways. Some sections of greenway should be retained in a natural state, without public access, to preserve natural features, habitat, and community character. For example, previous County land preservation and recreation plans noted that the Bynum Run area from Bel Air southeastward has limited land for donation or acquisition, poor access points, and a lack of logical termini. Nevertheless, the segment should be considered an important component of a Bynum-Winters Run Greenway for its natural setting and connection within the system.

Development of water trail systems along various waterways in the County should also be pursued. These water trail systems should utilize existing public land and park sites to develop access points, particularly for canoes and kayaks. Such water trail systems would provide opportunities for County residents to enjoy otherwise inaccessible areas of the County without impacting natural areas that are ecologically sensitive.

Harford County's Department of Planning & Zoning recently completed its master plan, HarfordNEXT (NEXT). NEXT focuses not only on existing connections to existing

communities and parks but also potential future trail alignments. These future trail alignments may be realized as a result of development and/or capital funding projects. Some trail alignments can be adjacent to existing roads, for example, providing another means of mobility or recreation from one point to another. For example, connecting Harford Community College to Cedar Lane Park could be accomplished adjacent to a road but could also be incorporated into any future new development if that occurs.

This goal can also be implemented by incorporating these other strategies within NEXT:

- Evaluate standards for trails, connections, community gathering places and other community amenities for new residential projects.
- Ensure that pedestrian routes and sidewalks are integrated into continuous networks.
- Initiate a trail sponsorship program whereby individuals and business can support the upkeep and maintenance of the trail.

Although this is not all NEXT strategies these coupled with this overall Plan's strategies proves for a meaningful framework to enhance existing greenways and trails but also future trail development.

- ***PR-3 Monitor usage trends, improve existing facilities, develop complementary facilities, and add recreational opportunities and facilities that meet the needs of all segments of the public, as well as, support the destination recreation/sports tourism market.***

The County continues to support the creation of safe and convenient opportunities for outdoor recreational activity while providing adequate recreational services and facilities to accommodate year-round activity for a diverse population. Over time, the number and types of public recreation facilities must be modified in response to changes in public demand and popular trends in parks and recreation services. The demand for football, soccer, and lacrosse fields, as well as, basketball courts among youth sports continues to increase in recent years; while the demand for public tennis courts and smaller baseball diamonds has leveled off. Current population trends show a growing adult County population. Given this fact, the Department will work with individual Recreation Councils to address localized needs in the area of adult programming, as well as partnering with the Office on Aging for senior programming. Additionally, the Department will continue to address and improve accessibility for individuals with disabilities at both existing facilities and new construction projects.

The Department will continue efforts to expand opportunities that go beyond the traditional recreation council programming. The department will work in partnership with advocacy groups to expand the number and types of therapeutic recreation services available to the County's developmentally and physically challenged citizens and their families. The Equestrian Center, the Tollgate Woodshop, the Liriodendron and Swan Harbor Farm, as well as the two environmental education centers, offer alternative types of activities and programs. Additionally, the Department will pursue opportunities to

develop and provide sensory trails and playground amenities that are designed for use by developmentally and physically challenged citizens.

Currently, the Anita C. Leight Estuary Center works in partnership with Harford County Public Schools to support the Environmental Literacy graduation requirements for County students. The Center also provides teacher professional development in environmental literacy standards. The Department is also working with school teachers to align environmental literacy standards to a new Meaningful Watershed Educational Experience (MWEE) that will be implemented for all 7th graders in County public school. These efforts are consistent with the Maryland Project Green Classrooms program and the Department should continue to pursue and grow these efforts with Harford County Public Schools.

Surveys, interviews, anecdotal situations, and other indications suggest that the demand for public use of the waterfront in Harford County continues to increase. Public ownership (or control, through easements or other mechanisms) of waterfront property supports many public purposes, including watercraft launching, fishing, and even simple visibility. Public stewardship of water resources is integral to the long-term health of County waterways and the Chesapeake Bay.

The 2011 Harford County Destination Market Study completed for the Greater Baltimore Committee identified Ripken Stadium and Cedar Lane Sports Complex as significant contributors to Harford County as a sporting event destination. Additionally, efforts should be made to maximize the impact of existing Department assets in other tourism markets, including eco-tourism and heritage tourism. The Department should work in cooperation with private sector partners and other County agencies to enhance interest in travel to Harford County. Measurement of the successfulness of the Department's efforts in this area should be part of any follow-up study to the 2011 Harford County Destination Market Study.

- ***PR-4 Provide active and healthy lifestyle opportunities for Harford County residents.***

The Department places priority on providing options for residents of all ages, to play, enjoy and learn in the recreation environment. A primary recreation goal for the partnership of the Department and the Recreation Councils is to provide in-house recreation programs in a wide variety of sports so that all children in Harford County have the opportunity to learn sports skills and to participate in team and individual activities. The Department will continue to develop programming that is complimentary to the programming that is offered through our Recreation Council partners.

Parks and Recreation is dedicated to addressing the increased importance of a healthy community. Working closely with the Recreation Councils, Parks and Recreation actively assesses the recreation needs in accordance with current trends, as stated in PR-3, and the need for additional activities to reduce the health issues associated with a sedentary lifestyle. Empowering citizens to increase physical activity and make health a priority is crucial to changing societal attitudes toward maintaining healthy lifestyles and encouraging outdoor activity. These efforts include support for individual activities such as walking and for playgrounds at both parks and schools. The concept of community gardening also has been raised and the Department will continue to work to identify potential locations for community gardens at Parks and Recreation facilities.

Community centers in Harford County have been extremely successful in both usage and as examples of strong organizational partnerships. While multi-agency centers are preferred in many situations, specific community recreation needs may warrant a smaller facility. Harford County should build on the success of the current community centers and as also stated in the HarfordNEXT PHC Goal 1.4, assess the need for centers in other areas of the County.

Parks and Recreation promotes Healthy Harford Inc., and looks to identify opportunities to increase obesity awareness, and provide activities to address the issue. The Report of the Obesity Task Force included recommendations from Built Environment Subcommittee that encourage the development of facilities for individual and independent use in future parks as well as for sports fields. For instance, facilities that benefit active seniors, such as pickleball and fitness, as well as individual activities and sports such as skateboarding, archery and disc golf should be integrated. Strong support was given to the design and construction of future multi-use trails to connect parks with community destinations. Additional comments include increased public information efforts by the Department to promote the availability of recreation facilities at County parks and public schools. Many citizens are unaware of the fact that outdoor school facilities such as tracks and playgrounds can be used by the public when not needed for school activities. The Department will continue to work to implement the Task Force recommendations.

The Department will work with the healthcare community through local hospitals and doctors' offices to implement a "park prescription" program. Similar programs encourage doctors to prescribe time in a park for their patients, as part of the over health needs. This program could include specific activities for patients, such as walking a trail, or general time spent outside. Public outreach should advertise family activity programs at schools and recreation through a variety of outlets, including social media, websites, grocery stores and libraries. Additionally, the Department will work with the healthcare community to educate the public on health issues related to outdoor activities, such as Lyme's disease.

As mentioned in PR-2, Parks and Recreation will continue its efforts to complete the Ma & Pa Heritage Trail and other greenway/trails systems in support of the HarfordNEXT Master Plan efforts to create more walkable and bikeable communities. Furthermore, the Department will continue to add additional closed loop walking trails at park site to increase the hiking/walking fitness opportunities for Harford County citizens.

- ***PR-5 Work with Recreation Councils to continue to address the safety of recreation program participants***

The Department will continue to work with the Recreation Councils to ensure screening and formal background checks for council volunteers are based upon established standards for youth sports, in support of the paramount goal of participant safety. Where appropriate, The Department will continue to work with our Recreation Council partners as a conduit for discussions on community related issues.

In recent years, there have been improvements in the aftercare of sports head injuries. The Department follows Maryland State law regarding concussion awareness and

management at school sites and parks in conjunction with the Harford County Department of Health and Mental Hygiene, the Harford County Board of Education, and the local Recreation Councils. Increased awareness and appropriate medical actions for all injuries will continue to be a focus in County sports programs.

The Department will follow the Maryland Department of Agriculture guidelines concerning herbicide and fertilizer use and management in compliance with the Fertilizer Use Act of 2011.

- ***PR-6 Incorporate sustainable development and conservation practices in all Parks and Recreation parks and facilities.***

Great efforts have been made to integrate green practices in the operation of facilities and Recreation Council Programs. The Department supports the County's initiative in construction and renovation of facilities and promotes revitalization and reuse of old structures if possible and fiscally responsible. Additionally, Parks and Recreation strives to increase the use of green building technology, implement sustainable building practices and promote energy savings in construction of all of its buildings and facilities. Where feasible, the Department will minimize impervious surfaces at Parks and Recreation facilities.

Additionally, the Department and its affiliated Recreation Councils educate and empower Harford County citizens on the topics of environmental stewardship, water quality and watershed protection at the two County run environmental education centers, Eden Mill and the Anita C. Leight Estuary Center. The Department, consistent with the Partnership for Children in Nature, will integrate opportunities for environmental education and stewardship at individual project sites, as well as, promote access to natural areas at part sites in order to promote both formal and informal environmental education. These opportunities would include educational signage along site developments. These programs will continue to grow and expand to meet the needs of the Harford County citizenry. Where appropriate the Department will use design standards that emphasize maintaining of natural landscapes.

The Department will work with the Department of Planning and Zoning to identify sites within the Green Infrastructure network for demonstration projects. These projects could include tree plantings to mitigate forest gaps, establishment of low mow zones, use of flood mitigation best management practices, and development of Invasive Plant Management Plans for specific Parks and Recreation facilities.

The Department will follow the Maryland Department of Agriculture guidelines concerning herbicide and fertilizer use and management in compliance with the Fertilizer Use Act of 2011.

- ***PR-7 Incorporate technology as part of park sites and facility experiences.***

As technology changes and advances, the Department should look to utilize technology to improve the experience for park users. These efforts should include the use of the internet and social media to raise awareness and promote Department parks, programs,

amenities, and initiatives. Where demonstration projects, such as establishment of low mow zones, sensitive habitats or species exist, historical information, or other items of interest exist at Parks and Recreation facilities, the Department will look to utilize technology, such as QR codes, that allow visitors to gain additional information about the specific circumstances. Additionally, the Department will improve its internet presence in an effort to provide park users with ability to complete transactions, including registrations and reservations, online where appropriate.

GOALS OF STATE PLAN

As was the case with the previous LPPRPs, local plans must incorporate the following State goals for recreation and parks, in addition to other local goals as appropriate for each jurisdiction:

- Make a variety of quality recreational environments and opportunities readily accessible to all of its citizens, and thereby contribute to their physical and mental wellbeing.
- Recognize and strategically use parks and recreation facilities as amenities to make communities, counties, and the State more desirable places to live, work and visit.
- Use State investment in parks, recreation, and open space to complement and mutually support the broader goals and objectives of local comprehensive / master plans.
- To the greatest degree feasible, ensure that recreational land and facilities for local populations are conveniently located relative to population centers, are accessible without reliance on the automobile, and help to protect natural open spaces and resources.
- Complement infrastructure and other public investments and priorities in existing communities and areas planned for growth through investment in neighborhood and community parks and facilities.
- Continue to protect recreational open space and resource lands at a rate that equals or exceeds the rate that land is developed at a statewide level.

SUPPORT OF STATE GOALS AND STRATEGIC GUIDELINES

The 2017 Guidelines for State and Local Land Preservation, Parks and Recreation Planning require that the Recreation and Parks section of the LPPRP describe the principal implementing programs, how they help to achieve the State and County goals and how they are consistent with the Strategic Guidelines for Recreation and Parks. The local plan should focus on how it will achieve these goals through its spending priorities for acquisition, facility development, and rehabilitation.

The Strategic Guidelines note that the majority of funding should be targeted to neighborhoods and communities where population and growth are concentrated. Parks

and facilities should be provided in lands designated for agricultural and/or natural resource conservation only to serve needs of the existing population or to preserve significant natural resources. The plan should also describe how local parks and recreation efforts complement the resource conservation focus of stateside POS.

Land Acquisition

Harford County evaluates any potential acquisition for active recreation facilities regarding the location relative to population centers, such as the municipalities and the designated growth areas. In a perfect setting, acquisitions for active recreation would be focused within the designated growth areas, including the Rural Villages. However, sites located within the growth areas are scarce and very expensive. Sites lying just beyond the Development Envelope or on the edge of the Rural Villages have proven to be more appropriate opportunities for public acquisition. The “greenbelt effect” can provide an effective demarcation between the rural areas and the designated growth area. Additionally, these acquisitions on the edges of the Development Envelope also results in a 15-minute drive to most locations within the Development Envelope. Land acquisitions within the Priority Preservation Area are done to provide facilities for the existing residents of the area.

Many sites are acquired to preserve the natural resources on the property while providing active recreation facilities on suitable land. This can encourage passive recreation and environmental education and stewardship in partnership with sports facilities. Harford County has worked cooperatively with the Department of Natural Resources to identify and coordinate efforts regarding resource conservation acquisitions and additions to the State Parks.

Since 2012, Harford County has acquired 140.4 acres of land, with 90.4 acres located within the Development Envelope. The most significant acquisition during that time was the 69-acre parcel that will become the Emily Bayless Graham Park. This property was a donation consistent with the wishes of the former property owner, Emily Bayless Graham. This property is located in the Emmorton community, in the center of the Route 24/924 corridor in the center of that part of the County development envelope. It will be developed into a passive park site as a condition of the donation of the property to the County.

Development of Facilities

The Department of Parks and Recreation strives to protect natural and cultural resources and to complement surrounding communities. Harford County designs active and passive recreation facilities in accordance with programs and regulations of federal, State and local government. Sites are planned so that the impacts on natural resources, such as wetlands, are avoided or minimized. The Department of Parks and Recreation is subject to all regulations of the *Harford County Zoning Code*, including those beyond State minimums, such as the 75-foot buffer to nontidal wetlands. County facilities are reviewed through the Development Advisory Committee with notice to adjoining property owners. The department strives to address concerns of neighbors through buffering, location of driveways, and other design modifications, as needed. The department is always cognizant of the cultural and historic integrity of potential acquisitions.

Capital Improvement Programming

One of the most important ways local government makes existing communities and planned growth areas more desirable is to identify the community's priority for recreational land and facilities. The Departments of Harford County Government have sought additional citizen involvement through a variety of venues, including broad-based community councils, design workshops, and public outreach during the development of the numerous Element Plans.

Harford County acquires parkland and constructs recreation amenities through the Capital Budget and Capital Improvement Program. In addition to department initiatives based on needs identified in the Land Preservation, Parks and Recreation Plan, the Department receives requests for capital improvement and acquisition projects from the 20 recreation councils throughout the County, which include the recreation committees of the three incorporated municipalities (Bel Air, Aberdeen, and Havre de Grace). The Recreation Councils represent the thousands of families and volunteers actively involved in the organized recreation programs. The Department also requests and receives input from the Harford County Department of Planning & Zoning, Planning Advisory Board, Harford County Public Schools, Harford County Public Library, Parks and Recreation Advisory Board, and the Department of Parks and Recreation staff. Community surveys and contacts from HOAs, land trusts, or individual citizens may provide additional input.

The Department, with input from the committee of recreation council presidents, annually evaluate and choose capital projects based in large part on the following criteria that incorporate County goals and policies as well as individual needs:

1. Does the project support the goals and policies set forth in the *Harford County Land Preservation and Recreation Plan*?
2. Is the project included in the department's 5-year capital improvement program?
3. Is the project a priority for reasons of safety, maintenance, or environmental concerns?
4. Is the project a response to identified or expressed community needs or desires?
5. Is the project necessary to complete a previously approved project?
6. Should the construction be included with the initial phase of development for efficiency or practicality?

The Department formulates a proposed budget with input from the Recreation Council Presidents after reconciling the estimated costs of projects with the anticipated funding level. Both the Planning Advisory Board and the Parks and Recreation Advisory Board review the proposed budget and provide comments to the County Executive and County Council. The capital budget is incorporated into the County Executive's budget and forwarded to the Harford County Council for review, approval, and funding. The County

Executive and County Council both seek additional public input during the budget process.

FUNDING SOURCES

Funding is critical to meet day-to-day operational needs and to acquire and develop parkland. The Harford County Department of Parks and Recreation uses a variety of revenue sources (Table 2.3). The operating budget covers current expenses of the department, such as personnel, supplies, vehicles, and equipment. The Harford County General Fund provides the money for the operating budget from property and income taxes as well as fees and other miscellaneous sources of revenue. Two county facilities—the Emmorton Recreation and Tennis Center and Swan Harbor Farm—have special revenue accounts established within the County budget and generate significant revenue through the collection of user fees to offset expenses for each specific facility. Revenues and expenses for other Parks and Recreation facilities, such as the adventure programming and ropes course, are managed through a third section of the revenue account.

Acquiring land and developing facilities are very expensive initiatives, requiring thousands, and sometimes millions, of local, State, and federal dollars. Harford County has been fortunate for many years to have a dedicated revenue source at the local level. Recordation taxes are charged at a rate of \$3.30 per \$500 valuation on the property being recorded. Of the \$3.30, \$0.55 must be deposited in a fund to purchase parklands and develop recreation facilities. This funding source has been impacted over the past several years by the slowed real estate market.

Table 2.3
Parks and Recreation Budget, FY 2014–2017

	FY 2014	FY 2015	FY 2016	FY 2017
Operating Budget				
General Fund	\$9,910,840	\$9,783,470	\$8,916,552	\$9,312,063
Capital Budget				
Recordation Tax	1,700,255	1,960,000	1,705,000	1,655,000
Reappropriated	299,745	335,775	0	410,000
Bonds/Paygo	1,742,000	750,000	230,000	300,000
Program Open Space ¹	800,000	360,000	2,100,000	1,000,000
Federal Grants ¹	0	0	30,000	2,000,000
Other State ¹	849,000	50,000	698,000	200,000
Other funds ¹	890,000	370,000	925,000	1,020,000
<i>Total, capital budget</i>	<i>\$6,281,000</i>	<i>\$3,825,775</i>	<i>\$5,688,000</i>	<i>\$8,135,000</i>
Total, Operating and Capital Budgets	\$16,191,840	\$13,609,245	\$14,604,552	\$17,447,063

¹ Reflects the amount the County is authorized to accept (proposed funding) and does not reflect actual funding allocations, which may be less than the authorized amount.

Source: Harford County Department of Parks and Recreation

Other County revenue sources include “reappropriated” funds and bonds and “paygo” funds. Reappropriated funds are the funds remaining at the completion of a capital project. When a Parks and Recreation capital account is closed, the money reverts to the

unappropriated fund balance and is available for future allocation through the capital budget process. Bond and paygo funding are provided by the County administration for major land purchases and for large projects that meet a variety of community needs, such as enlarged gymnasiums. Paygo funding is an allocation of current revenues, while bond funds are generated when the County sells general obligation bonds. The bonds are repaid over a 20- to 30-year time period.

Since 1969, the Maryland Department of Natural Resources has provided funds for open space and recreation through Program Open Space (POS). Funded through the State transfer tax, POS funds are allocated to the counties and Baltimore City in accordance with a formula that reflects population and transfer tax collection. Half of POS funds allocated must be spent for acquisition of additional open space lands. The balance can be used for either acquisition or parkland development. The transfer tax was established as a dedicated fund source for Program Open Space, agricultural preservation, and other needs. Recent state-level budget decisions dedicated a portion of the local Program Open Space allocation to the Maryland Park Service operating budget, reducing the available funds for local projects. In addition, for part of the last several budget years, POS funds have been diverted into the State General Fund with State bonds having been used for re-payment. This repayment occurs over a period of 3 years after each fiscal year bond sale. As a result, the POS allocations for Harford County have fluctuated as follows:

FY 2014	475,916
FY 2015	796,555
FY 2016	858,479
FY 2017	848,213

However, recent State budget decisions to move to full funding of POS and the slowly recovering real estate market has resulted in steadily increasing funding. While recent State budget decisions have helped, POS funding remains below funding levels of the early 2000's. The resulting lower POS revenues to Harford County has significantly constrained the department's ability to acquire additional land. Land values have started to improve since 2013 in conjunction with the overall economic recovery and it remains more profitable for property owners to sell land for new residences and other developments rather than for less intense uses, such as parks, recreation, and open space.

Other funding sources include developers, recreation council contributions, and State waterway improvement funds, which are generated by boat registration fees. Waterway improvement revenues are used to develop facilities to serve the boating public, such as boat launching ramps. These funds have also been impacted by the slowed economy. Federal funds, such as the Transportation Enhancement Program, have provided significant resources but only for specific projects, such as trails. These non-County proposed funding sources, including Program Open Space, authorize the Department to accept proposed funding. However, the authorized amount does not necessarily reflect the actual final funding allocations, which may be less than the authorized amount.

NEEDS ANALYSIS

Land

HarfordNEXT identified 30 acres of local recreation acreage for every 1,000 County residents as a goal of the County Master plan. Previous LPPRPs used a State goal for Program Open Space (POS) to provide 30.0 acres of “local recreation acreage” for every 1,000 County residents (shown as “ac/000”)^{4,5} as a measure. In determining the land eligible to be considered against the local goal, Program Open Space guidelines recognize the following types of recreation land based on ownership and the presence and importance of natural features:

- 100% of local recreation acreage, which includes school sites counted as either 100% of community recreation acreage on the site or 60% of the total site
- 1/3 of local natural resource acreage
- 100% of State and federal recreation land above 60 ac/000, up to a maximum of 15 ac/000

For consistency and comparison purposes these same guidelines in determining the land eligible for the HarfordNEXT goal are used in this plan. The 19,893.8 acres of total recreation and resource land in Harford County includes 7053.5 acres of State land and 7369.1 acres of local recreation and natural resource land eligible for calculation against the County’s Program Open Space requirement (Table 2.4). The amount of State land is not sufficient to meet the State goal of 60.0 ac/000, so no credit is available against the local goal. With a 2015 population of 250,025, **Harford County has a total of 29.5 acres of local land per thousand population.** Projected population increases will require an additional 261.7 acres of land by 2020 simply to maintain the current service level of 29.5 ac/000 (Table 2.5). By 2025, the County will need 451.4 additional acres to maintain the current service level.

⁴ The 2013 Harford County Land Preservation and Recreation Plan identified 29.8 ac/000 for local recreation land.

⁵ POS regulations require that at least 50% of a County’s annual allocation be spent on land acquisition, as opposed to park/facility development, unless the County has met its local land acquisition goals.

Table 2.4
Recreation Land Classification and Need, 2015

Category	Size (ac.)		Ac/000	
	Total	Eligible	2015 Pop.:	257,020
State lands	7053.5	0.0	28.2	0.0
County parks	4,539.4	4,539.4	18.1	18.1
Municipal parks	310.4	310.4	1.2	1.2
Board of Education	1,844.4	1,106.6	7.4	4.4
Major Semipublic and Private	1,907.8	0.0	7.6	0.0
HOA land	3,638.5	1,212.8	14.6	4.9
Local natural resource	599.8	199.9	2.4	.8
Total	19,893.8	7,369.1	79.6	29.5

Note: Totals may not add due to rounding.

Table 2.5
Recreation Land Need, 2015–2030

	2015	2020	2025	2030
Population	250,025	258,670	265,100	273,120
Eligible acres	7,369.1	7,369.1	7,369.1	7,369.1
Acres per thousand (ac/000)	29.5	28.5	27.8	27.0
Acres needed to meet goal of 30.0 ac/000	-	390.9	583.9	824.5
Acres needed to meet current 29.5 ac/000	-	261.7	451.4	688.3

Note: Totals may not add due to rounding.
Source: Harford County Parks and Recreation

As part of the 2017 LPPRP process, the Department of Natural Resources has identified new factors in analyzing the level of service to County residents. Proximity analysis uses site locations to generally determine where the public can readily access parks and park amenities. While HarfordNEXT established a goal of a $\frac{1}{4}$ mile walkability standard for resident access to Parks and Recreation facilities within the development envelope, this LPPRP document utilized a $\frac{1}{2}$ mile radius for a walkability standard for analysis based on the State expectation. As shown in the analysis that follows, there are existing gaps using the $\frac{1}{2}$ mile State standard and the County should work towards the State standard first, as part of working towards the HarfordNEXT goal. Outside the Development Envelope, the 2018 LPPRP utilized a 5-mile radius for the access standard based on the State expectation. This 5-mile radius establishes an approximate 15-minute drive for access to park site and facilities.

Additionally, the Department of Natural Resources wanted Park Equity Analysis tools used to identify population centers and their access to parks and recreation sites and facilities. Existing census tracts were identified based on four categories; 1) High Concentration of Children 17 and Under, 2) High Concentration of Population Below the Poverty Line, 3) High Population Density, and 4) Proximity to Parks. This analysis can identify opportunities to improve park access to underserved populations.

Several other comments should be noted as they pertain to the Proximity and Park Equity Analysis that follow:

- The community areas discussed in the analysis correspond to Map 2.2- Recreation Council Areas
- Only County and Municipal park facilities that are noted in the overall Inventory, Appendix Table A-1, are included in the Proximity Analysis and Park Equity Analysis
- The Harford County Board of Education and Department of Recreation and Parks have had a joint use agreement for school recreation facilities since the 1960s. Recreation programs offered by the department and the recreation councils are given second priority (behind school use) for all school facilities
- Two County libraries, Abingdon and Whiteford, that are noted in the overall Inventory, Appendix Table A-1, are included **only in the Playground section** of the Needs analysis, as the Department of Parks and Recreation is responsible for the playgrounds located at those branches
- None of the State Park facilities that are noted in the overall Inventory, Appendix Table A-1, are included in the Proximity Analysis and the Park Equity Analysis
- None of the private sector facilities that are noted in the overall Inventory, Appendix Table A-1, are included in the Proximity Analysis and the Park Equity Analysis

The proximity analysis for the overall availability of parks and recreation facilities within the Development Envelope identify opportunities for future sites in several communities. Again, this analysis is based on a 1/2- mile radius for walkability standard (Map PM1). Communities areas that provide opportunities for future sites include Joppa, just north of I-95, Forest Hill, Hickory-Fountain Green, Emmorton, Belcamp/Perryman, Aberdeen, and Havre de Grace. Some of these areas, particularly portions of Belcamp/Perryman have been identified through HarfordNEXT and the comprehensive rezoning process for industrial uses and may be inconsistent with parks and recreation facilities.

Outside the Development Envelope, the proximity analysis using the 5-mile radius shows the entire area is within a 15-minute drive to a park or recreation facility (Map PM2). This 15-minute drive also includes the entire area inside the Development Envelope, which is partly the result of the effort by the County to identify and develop sites lying just beyond the Development Envelope or on the edge of the Rural Villages. In a perfect setting, acquisitions would be focused within the designated growth areas, including the Rural Villages. However, sites located within the growth areas are scarce and very expensive. Map PM3 shows the overall Parks and Recreation system for the County and uses the Development Envelope as the demarcation line between the 1/2-mile radius and the 5-mile radius areas of analysis.

Using the Park Equity Analysis mapping reveals the following observations. Map PEA1 identifies the County Parks and Recreation locations relative to those areas of the County

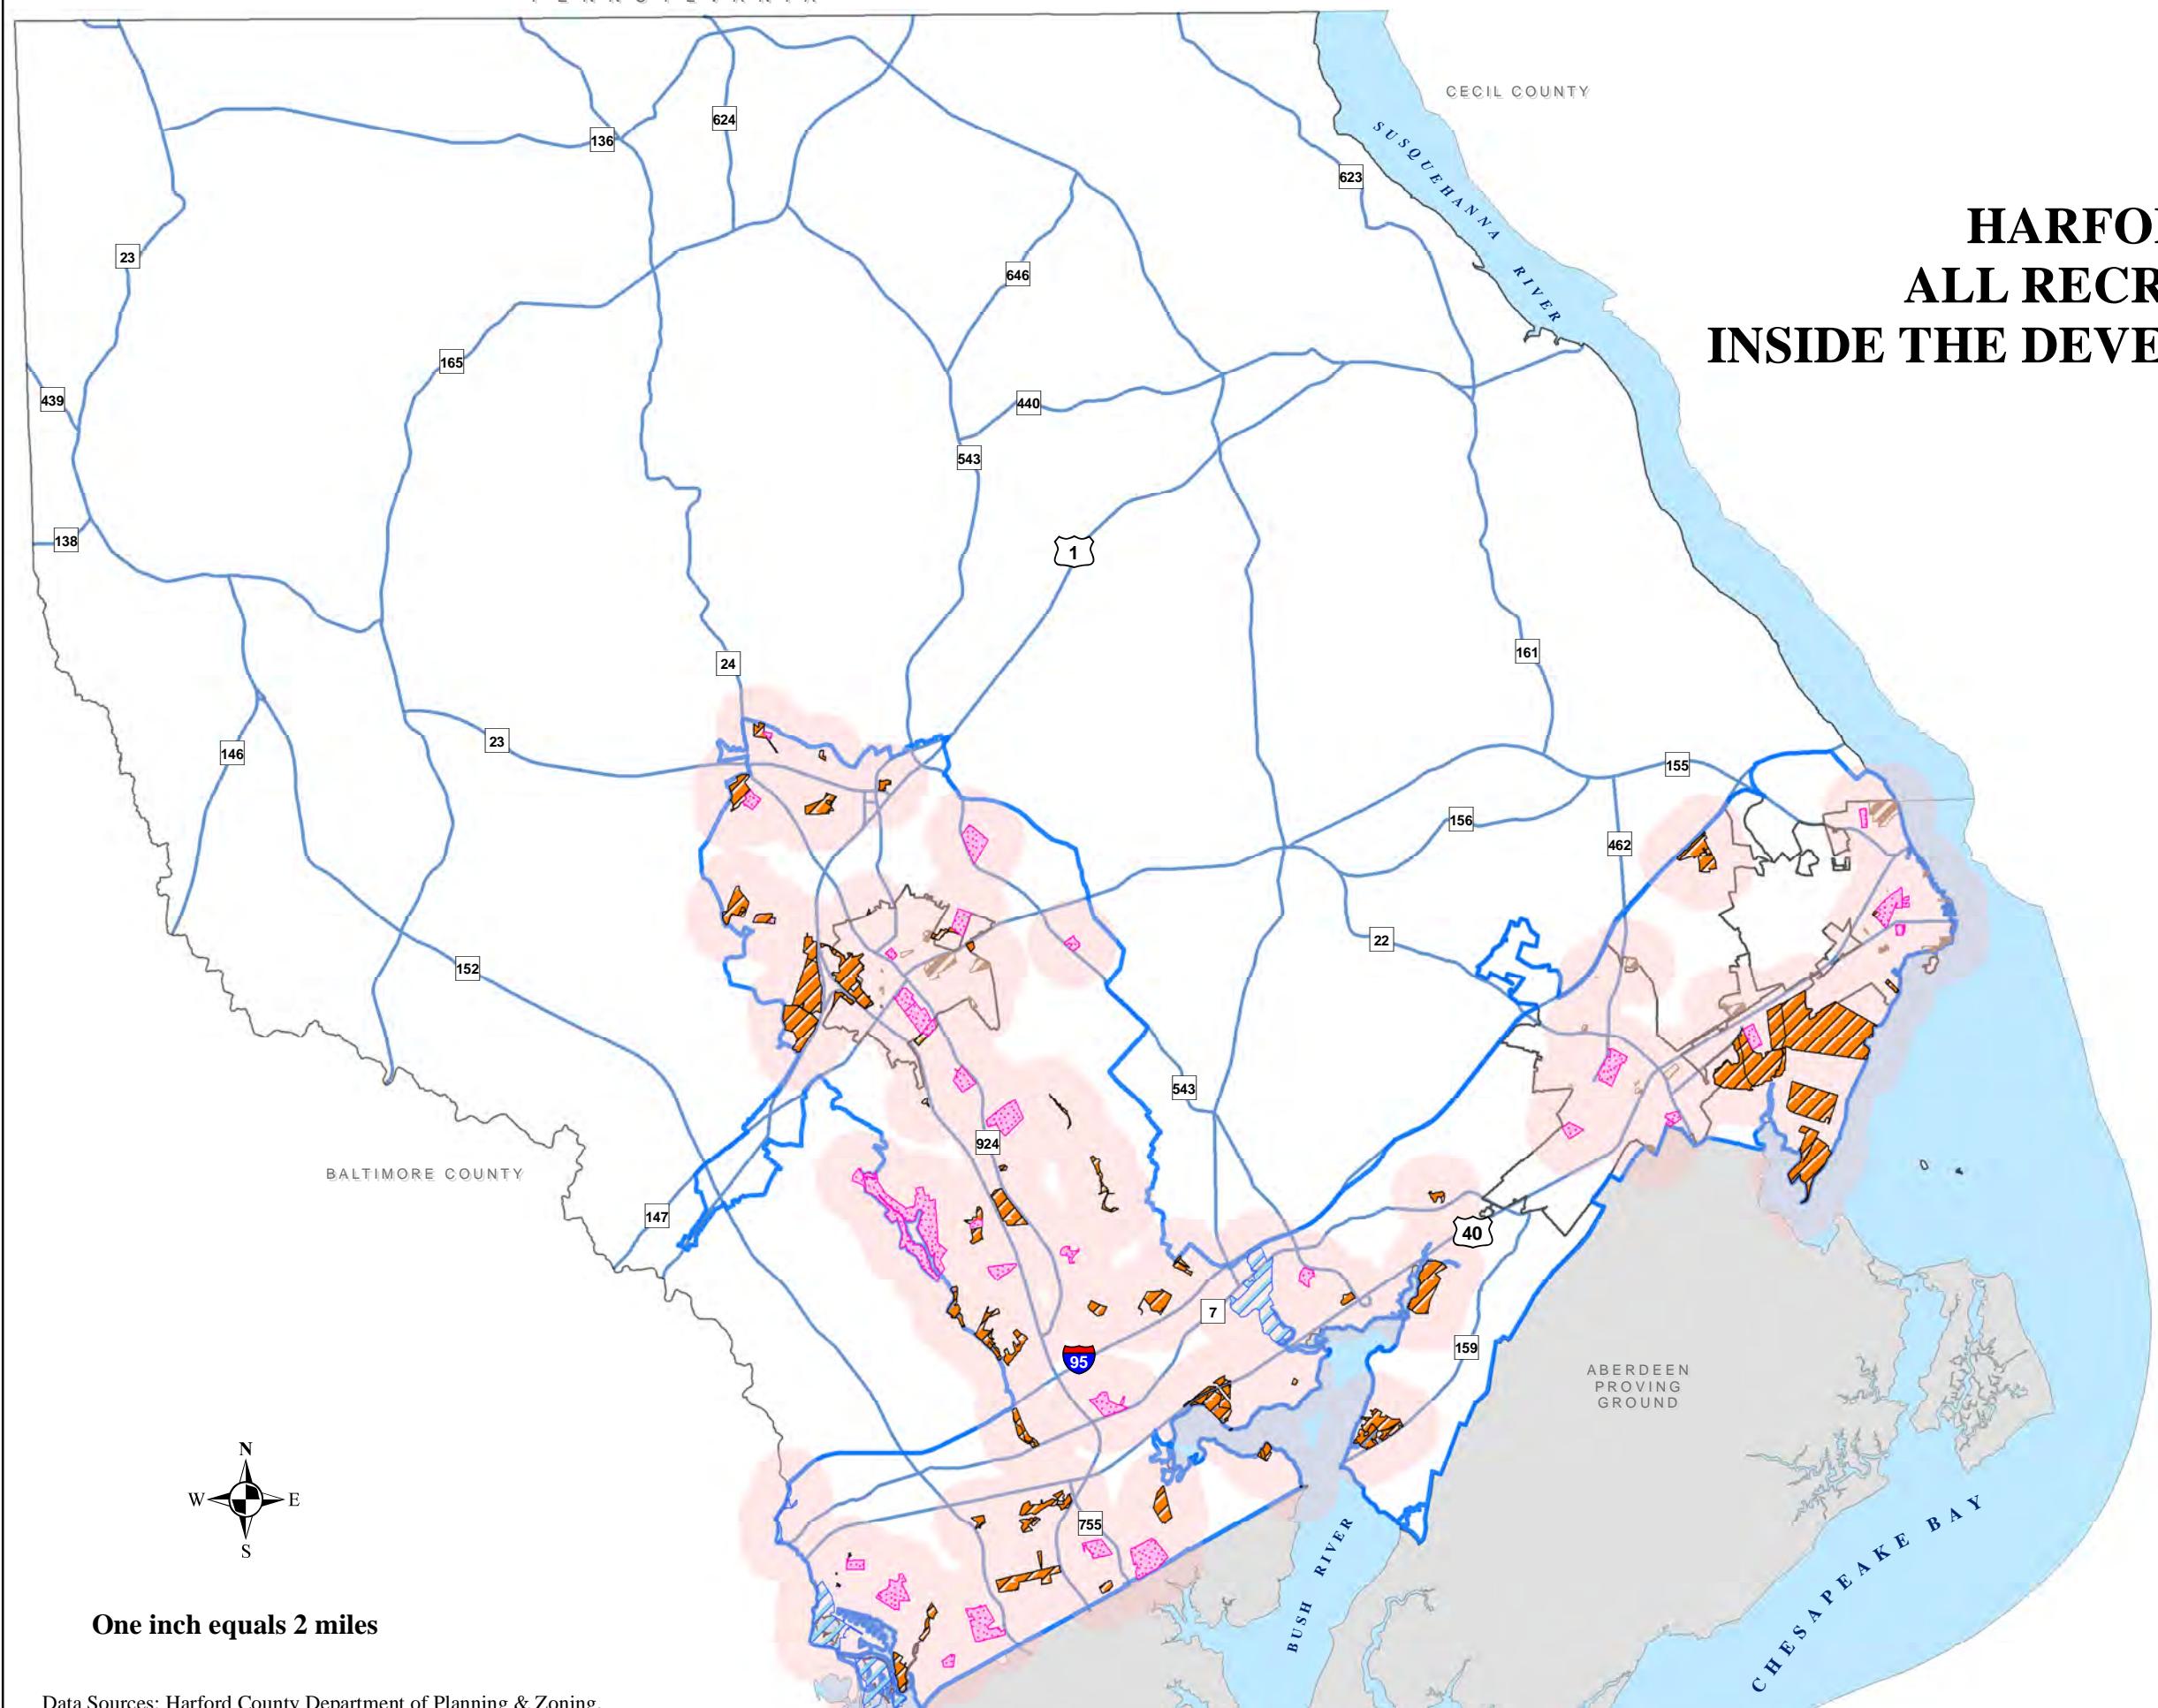

with a high concentration of children under 17. These communities include Edgewood, Forest Hill, Hickory-Fountain Green, Emmorton, Aberdeen, and Havre de Grace. Overall, all communities in the County have park facilities in convenient location to areas of the County with a high concentration of children, including Emmorton, Edgewood, Abingdon, Aberdeen, and Havre de Grace, among others. There are opportunities for future sites in communities including Forest Hill, Hickory-Fountain Green, Aberdeen, and Havre de Grace. It should be noted there are a couple of areas within Aberdeen Proving Ground (APG) on the south end of the County, that have a high concentration of children, but APG provides recreation services to its resident population.

Map PEA2 identifies the County Parks and Recreation locations relative to those areas of the County with a high concentration of population below the poverty line. These communities include Edgewood, Abingdon, Aberdeen, APG, and small pockets in Forest Hill, Emmorton, Belcamp, and Havre de Grace. Overall, all communities in the County have park facilities in convenient location to areas of the County with a high concentration of poverty, including Edgewood, Abingdon, Aberdeen, APG, and Havre de Grace, among others. There are small opportunities for future sites in communities throughout the Development Envelope, including northern Edgewood and northwestern Aberdeen. However, all the census tracts areas with high concentrations of poverty have some access to existing parks and facilities. It should be noted there are a couple of areas within Aberdeen Proving Ground (APG) on the south end of the County, that have a high concentration of poverty, but APG provides recreation services to its resident population.

Map PEA3 identifies the County Parks and Recreation locations relative to those areas of the County with high population density. Not surprisingly, these areas coincide with the Development Envelope and show patterns of development and opportunities for future sites like the areas with a high concentration of children under 17. Communities including Forest Hill, Emmorton, Aberdeen, and Havre de Grace have opportunities for future parks and recreation sites.

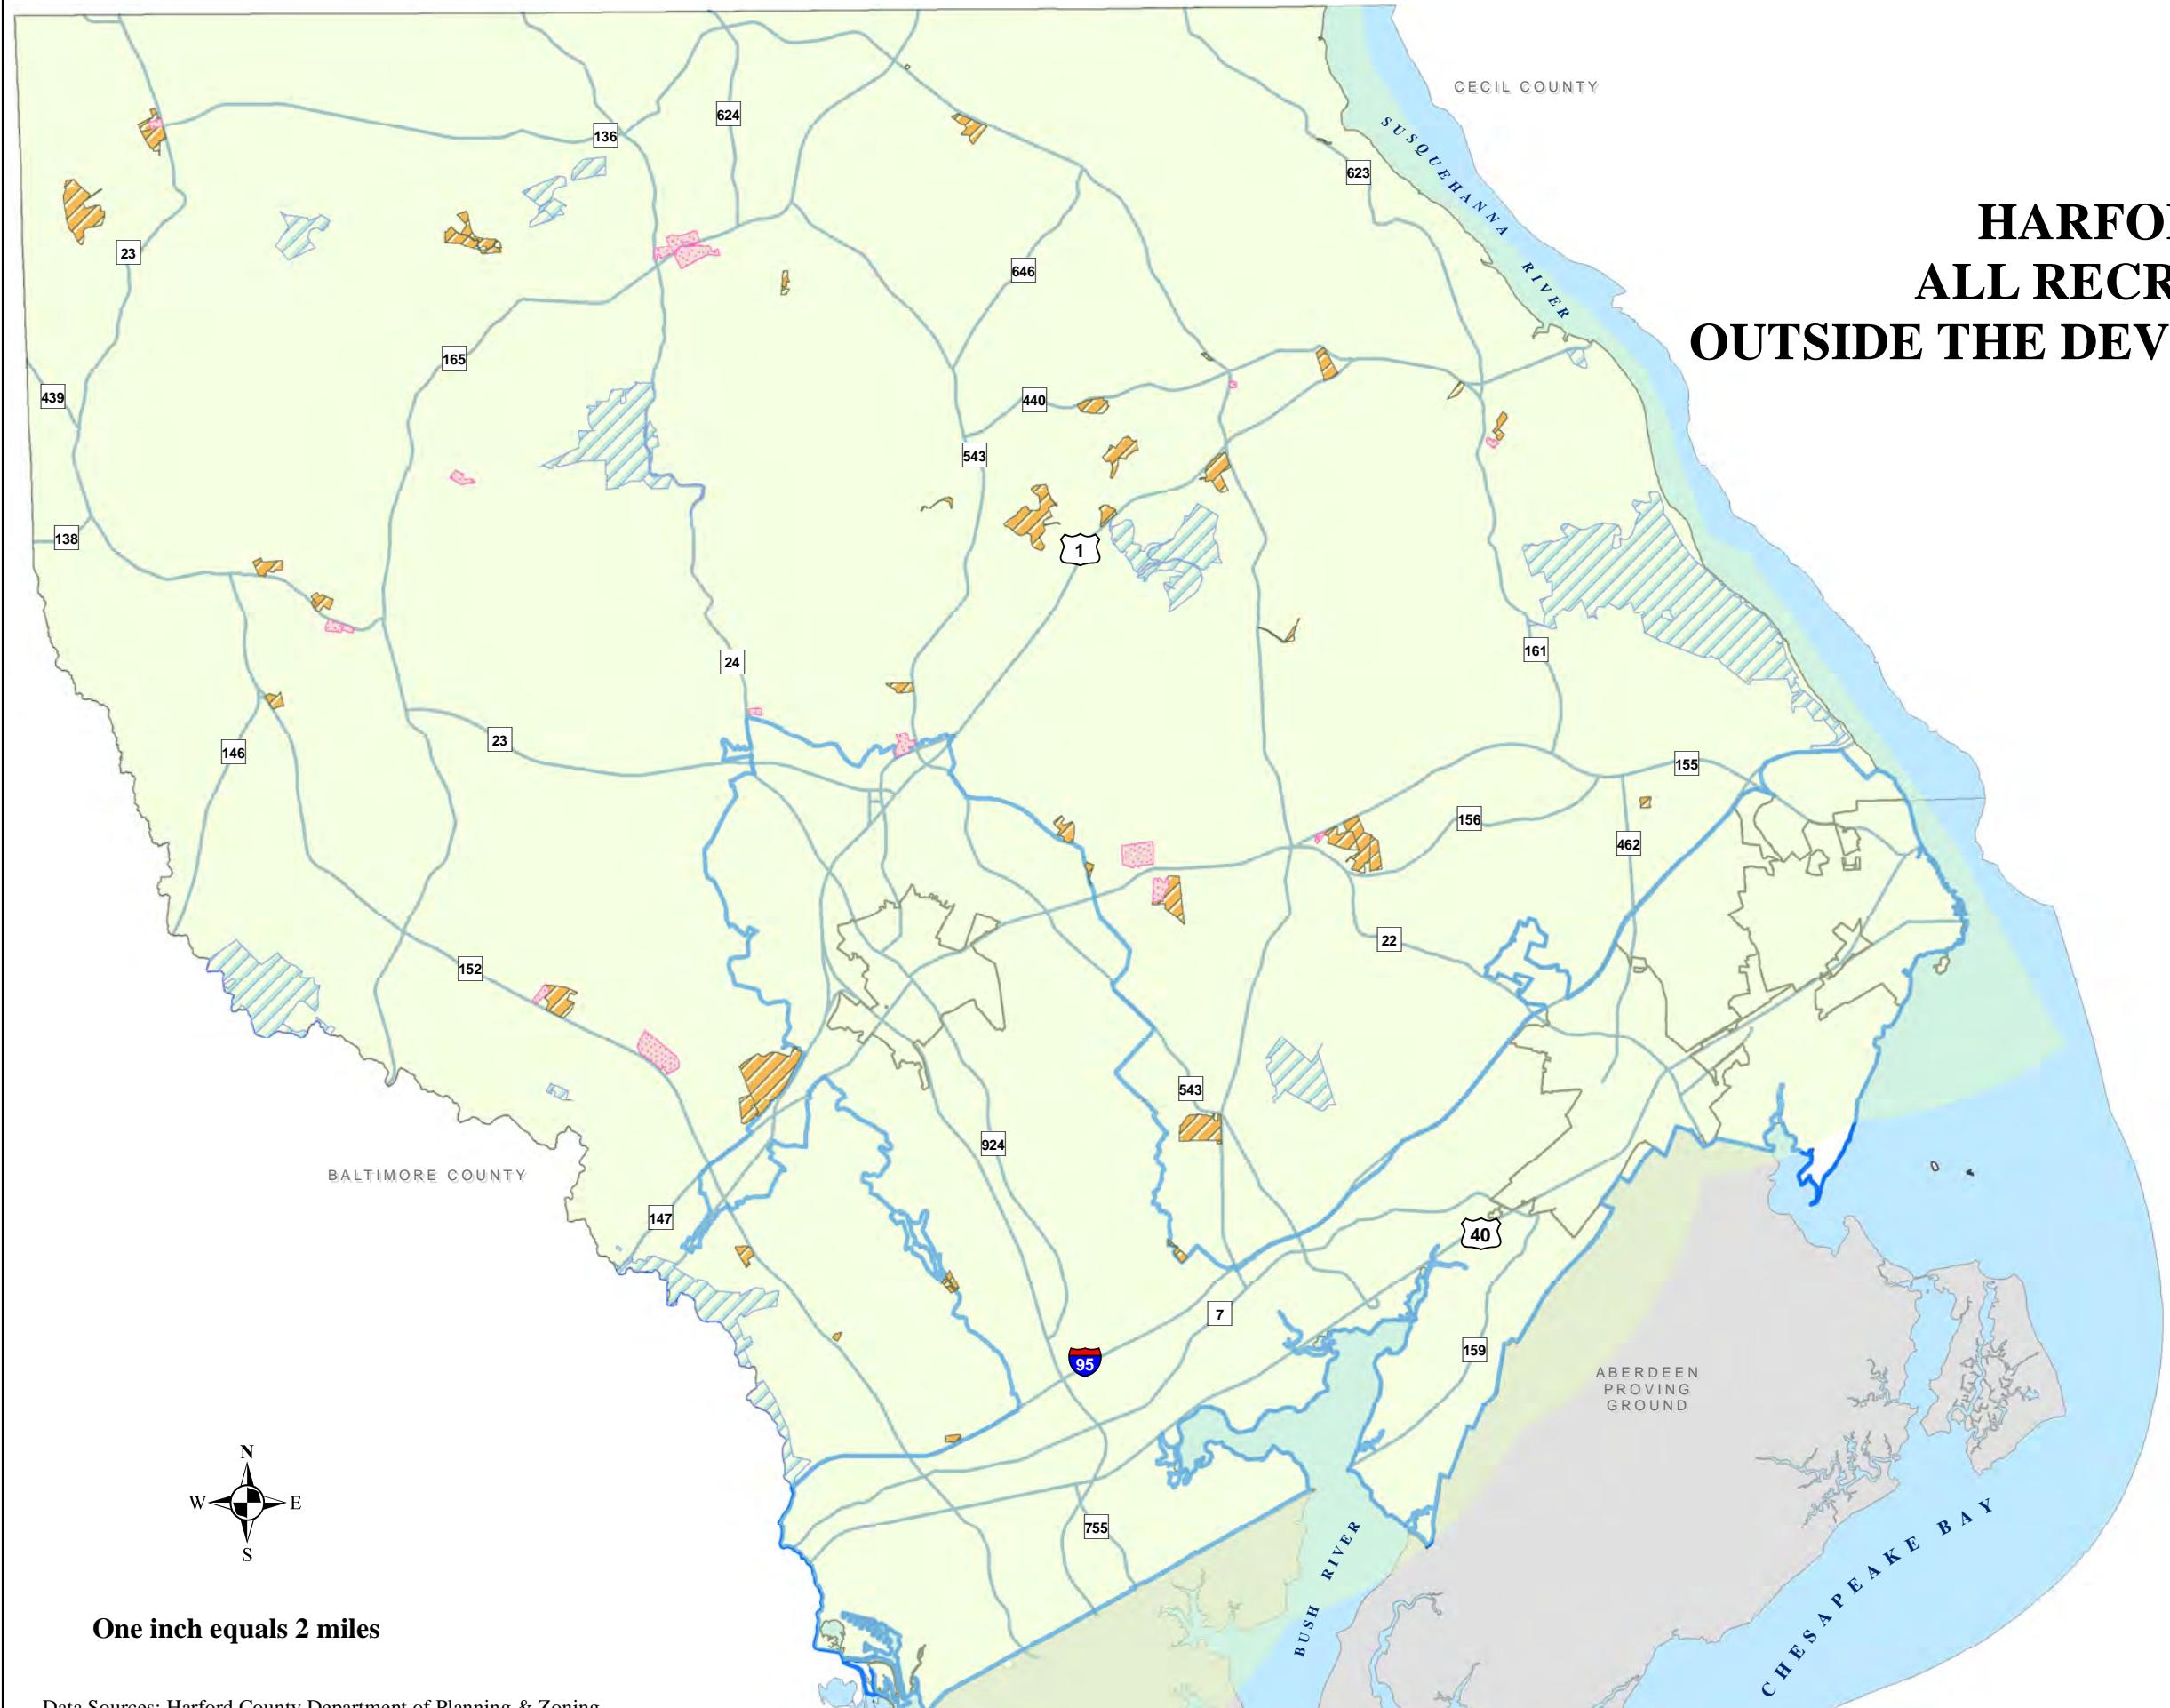

Map PEA4 identifies the County Parks and Recreation locations relative to their proximity to parks. Again, these areas coincide with the Development Envelope and show patterns of development and opportunities for future sites like the areas with a high concentration of children under 17. Communities including Forest Hill, Hickory-Fountain Green, Emmorton, Aberdeen, and Havre de Grace have opportunities for future parks and recreation sites.

Facilities

For the 2018 LPPRP, the analysis of recreation facilities in Harford County takes two major issues into consideration; 1) the results of the public survey, and 2) the existing partnership that exists between the Department of Parks and Recreation and the Harford County Public School system. The analysis examines facilities for the following activities, which represent the highest priority recreation facilities as determined by the department:

- Athletic Fields/Diamonds
- Recreation Centers/Gymnasiums
- Trails
- Fishing and Water Access
- Public Playgrounds

Sports Fields/ Ball Diamonds

Recreation Council partners are major users of existing sports fields and baseball and softball diamonds in the County parks and recreation system. This is the primary reason these facilities were chosen for analysis in the 2018 LPPRP. As part of the analysis there are several factors that need to be remembered concerning sports fields and diamond use. 68% of the diamonds (127 out of 188) in the County are located at school sites and 52% of sports fields (105 out of 203) are also located at school sites. These diamonds and sports fields are available for recreation councils in accordance with the joint use agreement, but school use takes priority.⁶ The same field shape (rectangle) is used for four different team sports—football, soccer, field hockey, lacrosse—which magnifies demand. Football fields located on natural grass fields are often dedicated to football, but soccer, field hockey, and lacrosse fields are typically shared. The County's public field inventory includes multi-purpose fields that are smaller than regulation size fields needed for games. While these smaller fields provide area for practice or clinics, they are not usable for game purposes. While Cedar Lane Park does provide dedicated field space for the Emmorton Recreation Council's football and baseball programs, the availability of remaining field space at the park to meet local recreation needs is impacted by the effort to attract larger out-of-county and out-of-state tournaments to this facility. Some field sports, which have historically been seasonal, are now operating through more than one season—in some cases, almost year-round. Soccer has traditionally been a fall sport, but spring soccer is gaining in popularity. Fields also need to be rested and rotated in their use to maintain safe playing surface for users. Additionally, sports such as football and lacrosse are more damaging to natural turf fields compared to baseball and softball.

Two additional trends are having a significant impact on the supply and demand for fields and diamonds in Harford County. Lacrosse continues to grow as a major spring sport for both boys and girls. A high percentage of Harford County's soccer/lacrosse fields are overlay fields and share the outfield of a baseball/softball diamond. Overlay fields have

⁶ The Harford County Board of Education and Department of Recreation and Parks have had a joint use agreement for school recreation facilities since the 1960s. Recreation programs offered by the department and the recreation councils are given second priority (behind school use) for all school facilities. Diamonds, fields, and courts at the schools are an integral part of the Harford County recreation system.

traditionally worked very well as an efficient use of land, since soccer was played in the fall and baseball and softball in the spring. The use of the field for lacrosse in the spring creates a conflict with the baseball/softball option for scheduling. Demand also is growing for sports during traditional off-seasons, such as spring soccer or fall baseball. Scheduling guidelines for Harford County facilities give priority to the traditional sports schedule. A few recreation councils have sponsored such programs when fields or diamonds were available. Growths in “off-season” programs and interest by other recreation councils in establishing such programs continue to generate demand for additional facilities.

The proximity analysis for the overall availability of parks with sports fields or diamonds within the Development Envelope identify opportunities for future sites in several communities. Again, this analysis is based on a 1/2- mile radius for walkability standard (Map PM4). Community areas that provide opportunities for future sports fields or diamonds include Joppa, Edgewood, Forest Hill, Hickory-Fountain Green, Emmorton/Abingdon, Belcamp/Perryman, Aberdeen, and Havre de Grace. Some of these areas, particularly portions of Belcamp/Perryman have been identified through HarfordNEXT and the comprehensive rezoning process for industrial uses and may be inconsistent with parks and recreation facilities. Outside the Development Envelope, the proximity analysis using the 5-mile radius shows the entire area is within a 15-minute drive to a park with a sports fields or diamond (Map PM5). This 15-minute drive also includes the entire area inside the Development Envelope, which is partly the result of the effort by the County to identify and develop sites lying just beyond the Development Envelope or on the edge of the Rural Villages.

Using the Park Equity Analysis mapping reveals the following observations. Map PEA5 identifies the County Parks and Recreation sports fields or diamonds relative to those areas of the County with a high concentration of children under 17. These communities include Edgewood, Forest Hill, Hickory-Fountain Green, Emmorton, Aberdeen, and Havre de Grace. Overall, all communities in the County have sports fields or diamonds in convenient location to areas of the County with a high concentration of children, including Emmorton, Edgewood, Abingdon, Aberdeen, and Havre de Grace. There are opportunities for future sites in communities including Forest Hill, Hickory-Fountain Green, Aberdeen, and Havre de Grace. It should be noted there are a couple of areas within Aberdeen Proving Ground (APG) on the south end of the County, that have a high concentration of children, but APG provides recreation services to its resident population.

Map PEA6 identifies the County Parks and Recreation sports fields or diamonds relative to those areas of the County with a high concentration of population below the poverty line. These communities include Edgewood, Abingdon, Aberdeen, APG, and small pockets in Forest Hill, Emmorton, Belcamp, and Havre de Grace. Again, overall, all communities in the County have sports fields or diamonds in convenient location to areas of the County with a high concentration of poverty, including Edgewood, Emmorton/Abingdon, Aberdeen, APG, and Havre de Grace, among others. There are some opportunities for future sites in communities throughout the Development Envelope, including northern Edgewood, Emmorton, Belcamp, and northwestern Aberdeen. However, portions of all the census tracts areas with high concentrations of poverty have some access to sports fields or diamonds. It again should be noted there are a couple of areas within Aberdeen Proving Ground (APG) on the south end of the County, that have

a high concentration of poverty, but APG provides recreation services to its resident population.

Map PEA7 identifies the County park sites with sports fields or diamonds relative to those areas of the County with high population density. Not surprisingly, these areas coincide with the Development Envelope and show patterns of development and opportunities for future field development in the areas with a high concentration of children under 17. Communities including Forest Hill, Emmorton, Aberdeen, and Havre de Grace have opportunities for sports fields or ball diamonds.

Map PEA8 identifies the County park sites with sports fields or diamonds relative to their proximity to parks. Again, these areas tend to coincide with the Development Envelope and show opportunities for development of future sports fields or diamonds similar to the areas with a high concentration of children under 17. Communities including Forest Hill, Hickory-Fountain Green, Emmorton, Aberdeen, and Havre de Grace have opportunities for future sports fields or ball diamonds.

Recreation Centers/Gymnasiums

Recreation Council partners also are major users of existing recreation centers and gymnasiums in the County parks and recreation system and it is for this reason these facilities were chosen for analysis in the 2018 LPPRP. As part of the analysis there are some factors that need to be remembered recreation centers and gymnasiums. While the County has added recreation centers to its inventory in the past, 89% of the gymnasiums (86 out of 96) in the County are located at school sites. These gymnasiums are available for recreation councils in accordance with the joint use agreement, but as with sports fields and diamonds, school use takes priority.⁷ Recreation Centers and gymnasiums are used year-round, not only for organized and casual basketball, but for indoor soccer, cheerleading, gymnastics, and other activities. Furthermore, while there are fewer sports during the winter season, when use of indoor facilities is higher, the supply of gymnasiums in the County recreation system is substantially lower than sports fields and diamonds. Coupled with this situation is a growing increase in indoor programs with the Recreation Councils. As a result, there is significant competition for and use of gymnasiums throughout the system.

The proximity analysis for the overall availability of recreation centers and gymnasiums within the Development Envelope identify opportunities for future sites in several communities. Again, this analysis is based on a 1/2- mile radius for walkability standard (Map PM6). As noted in goal PR-4, the Department will be assessing the need for locations for future centers or gymnasiums in the County. Some of these areas, particularly portions of Belcamp/Perryman have been identified through HarfordNEXT and the comprehensive rezoning process for industrial uses and may be inconsistent with parks and recreation facilities. Outside the Development Envelope, the proximity analysis using the 5-mile radius shows the entire area is within a 15-minute drive to a recreation or gymnasium (Map PM7). This 15-minute drive also includes the Route 24 corridor, north of Abingdon and a portion of the greater Aberdeen area inside the Development Envelope.

Using the Park Equity Analysis mapping reveals the following observations. Map PEA9 identifies the County Parks and Recreation centers or gymnasiums relative to those areas of the County with a high concentration of children under 17. These communities include Edgewood, Forest Hill, Hickory-Fountain Green, Emmorton, Aberdeen, and Havre de Grace. Overall, some communities in the County with a high concentration of children have centers or gymnasiums conveniently located, including Emmorton/Abingdon, Edgewood, and portions of Aberdeen. There are opportunities for future sites in communities including Forest Hill, Hickory-Fountain Green, portions of Edgewood, Havre de Grace, and Aberdeen. As noted in goal PR-4, the Department will be assessing the need for locations for future centers or gymnasiums in the County. It should be noted there are a couple of areas within Aberdeen Proving Ground (APG) on the south end of the County, that have a high concentration of children, but APG provides recreation services to its resident population.

⁷ The Harford County Board of Education and Department of Recreation and Parks have had a joint use agreement for school recreation facilities since the 1960s. Recreation programs offered by the department and the recreation councils are given second priority (behind school use) for all school facilities. Diamonds, fields, and courts at the schools are an integral part of the Harford County recreation system.

Map PEA10 identifies the County Parks and Recreation centers or gymnasiums relative to those areas of the County with a high concentration of population below the poverty line. These communities include Churchville, Darlington, Edgewood, Abingdon, Aberdeen, APG, and small pockets in Forest Hill, Emmorton, Belcamp, and Havre de Grace. Again, overall, all communities in the County have recreation centers or gymnasiums in convenient location to areas of the County with a high concentration of poverty, including Edgewood, Emmorton/Abingdon, Aberdeen, APG, and Havre de Grace, among others. There are some opportunities for future sites in communities throughout the Development Envelope, as noted in goal PR-4, the Department will be assessing the need for locations for future centers or gymnasiums in the County. However, portions of almost all the census tracts areas with high concentrations of poverty have some access to centers or gymnasiums. It again should be noted there are areas within Aberdeen Proving Ground (APG) on the south end of the County, that have a high concentration of poverty, but APG provides recreation services to its resident population.

Map PEA11 identifies the County recreation centers and gymnasiums relative to those areas of the County with high population density. Not surprisingly, these areas coincide with the Development Envelope and show patterns of development and opportunities for future development in areas similar to those areas with a high concentration of children under 17. As noted in goal PR-4, the Department will be assessing the need for locations for future centers or gymnasiums in the County.

Map PEA12 identifies the County recreation centers or gymnasiums relative to population proximity to parks. Again, these areas tend to coincide with the Development Envelope and show opportunities for development of future centers and gymnasiums similar to the areas with a high concentration of children under 17. As noted in goal PR-4, the Department will be assessing the need for locations for future centers or gymnasiums in the County.

Trails

In addition to the State wanting trails including in the proximity and equity analysis, the public survey shows there is significant interest in additional trails throughout Harford County. Trails are used for a variety of purposes (including fitness, environmental education, and quiet contemplation) and in several modes (such as walking, running, hiking, bicycling, horseback riding). The *2018 Harford County Land Preservation, Parks, and Recreation Plan* recognizes the value of trails and supports the creation of a countywide trail system, including connections between activity centers, residential developments, parks, schools, Harford Community College and employment/shopping centers. The plan also recognizes the need to provide and improve facilities with multi-use loop trails. These loop trail systems at park sites can provide access to specific park amenities, such as athletic fields, but can also provide opportunities for simply walking and enjoying the natural surroundings at park sites. Trails can be an integral part of the County's bicycle and pedestrian network, and working with the Department of Planning and Zoning, the Department of Parks and Recreation supports the trail initiatives put forth in HarfordNEXT and the Bicycle and Pedestrian Master Plan. Together, these plans will help to incorporate trail systems into the County's active transportation network, thus providing multiple benefits to the community.

As mentioned in PR-2, Parks and Recreation will continue its efforts to complete the Ma & Pa Heritage Trail and other greenway/trails systems in support of the HarfordNEXT Master Plan efforts to create more walkable and bikeable communities. The connection of two existing sections of the Ma & Pa trail that will create a premier trail network stretching from Edgely Grove Park in Fallston to Friends Park in Forest Hill. The existing Forest Hill section is approximately 1.7 miles long between Friends Park and Blake's Venture Park. The existing Fallston-to-Bel Air section is about 3.3 miles between Edgeley Grove/Annie's Playground and Bel Air's Williams Street. Once completed, the nearly 8-mile trail will be one of the finest rail-trails in Maryland, taking travelers between Fallston and Forest Hill through the vibrant Bel Air business district. The scenic Ma & Pa Trail attracts thousands of visitors each year and is Harford County government's most popular parks and recreation facility. Future connections to the Ma & Pa trail from other properties, such as Mt. Soma, should be considered in partnership with property owners and the State Highway Administration, as necessary.

Additionally, there are existing trail systems that are under development in the County including the Lower Susquehanna Heritage Greenway (LSHG), including the Captain John Smith National Historic Trail, the Star-Spangled Banner Nation Historic Trail and Byway and the Washington- Rochambeau National Trail all of which traverse the LSHG. Another major trail component passing through Harford County is the East Coast Greenway. The East Coast Greenway Trail Network is a multi-user trail network connecting urban centers along the East Coast of the United States. The trail will extend from Maine to Key West, Florida. The greenway route will consist of a series of locally managed segments. In Harford County, the proposed East Coast Greenway Trail will travel from the Susquehanna River at U.S. Route 40, then up along the river utilizing part of the LSHG trail network before going west across the County to connect with the Torrey Brown Trail in Baltimore County.

The proximity analysis for the overall availability of parks with trails within the Development Envelope identify opportunities for future sites in several communities. Again, this analysis is based on a 1/2- mile radius for walkability standard (Map PM8). Communities areas that provide opportunities for future trails are throughout the Development Envelope including Joppa, Edgewood, Forest Hill, Hickory-Fountain Green, Emmorton/Abingdon, Belcamp/Perryman, Aberdeen, and Havre de Grace. Outside the Development Envelope, the proximity analysis using the 5-mile radius shows most of the entire area is within a 15-minute drive to a park with trail (Map PM9). This 15-minute drive also includes much of the area inside the Development Envelope along the Route 24 corridor. This analysis used a 5-mile radius for the Ma & Pa trail as it is recognized as a County-wide amenity. Areas along the eastern edge of North Harford, including Level, Whiteford, and Delta-Cardiff are areas where opportunities for future trails exist, although the analysis only considered County sites and there are existing trail systems in Susquehanna State Park.

Using the Park Equity Analysis mapping reveals the following observations. Map PEA13 identifies the County parks with trails relative to those areas of the County with a high concentration of children under 17. These communities include Edgewood, Forest Hill, Hickory-Fountain Green, Emmorton, Aberdeen, and Havre de Grace. Communities in the County near the Ma & Pa Trail, including Bel Air and Forest Hill, are conveniently located relative to that trail. There are opportunities for future trails and trail sites in communities including Hickory-Fountain Green, Emmorton/Abingdon, Aberdeen, and Havre de Grace. As previously discussed, it should be noted there are areas within Aberdeen Proving Ground (APG) on the south end of the County, that have a high concentration of children, but APG provides recreation services to its resident population.

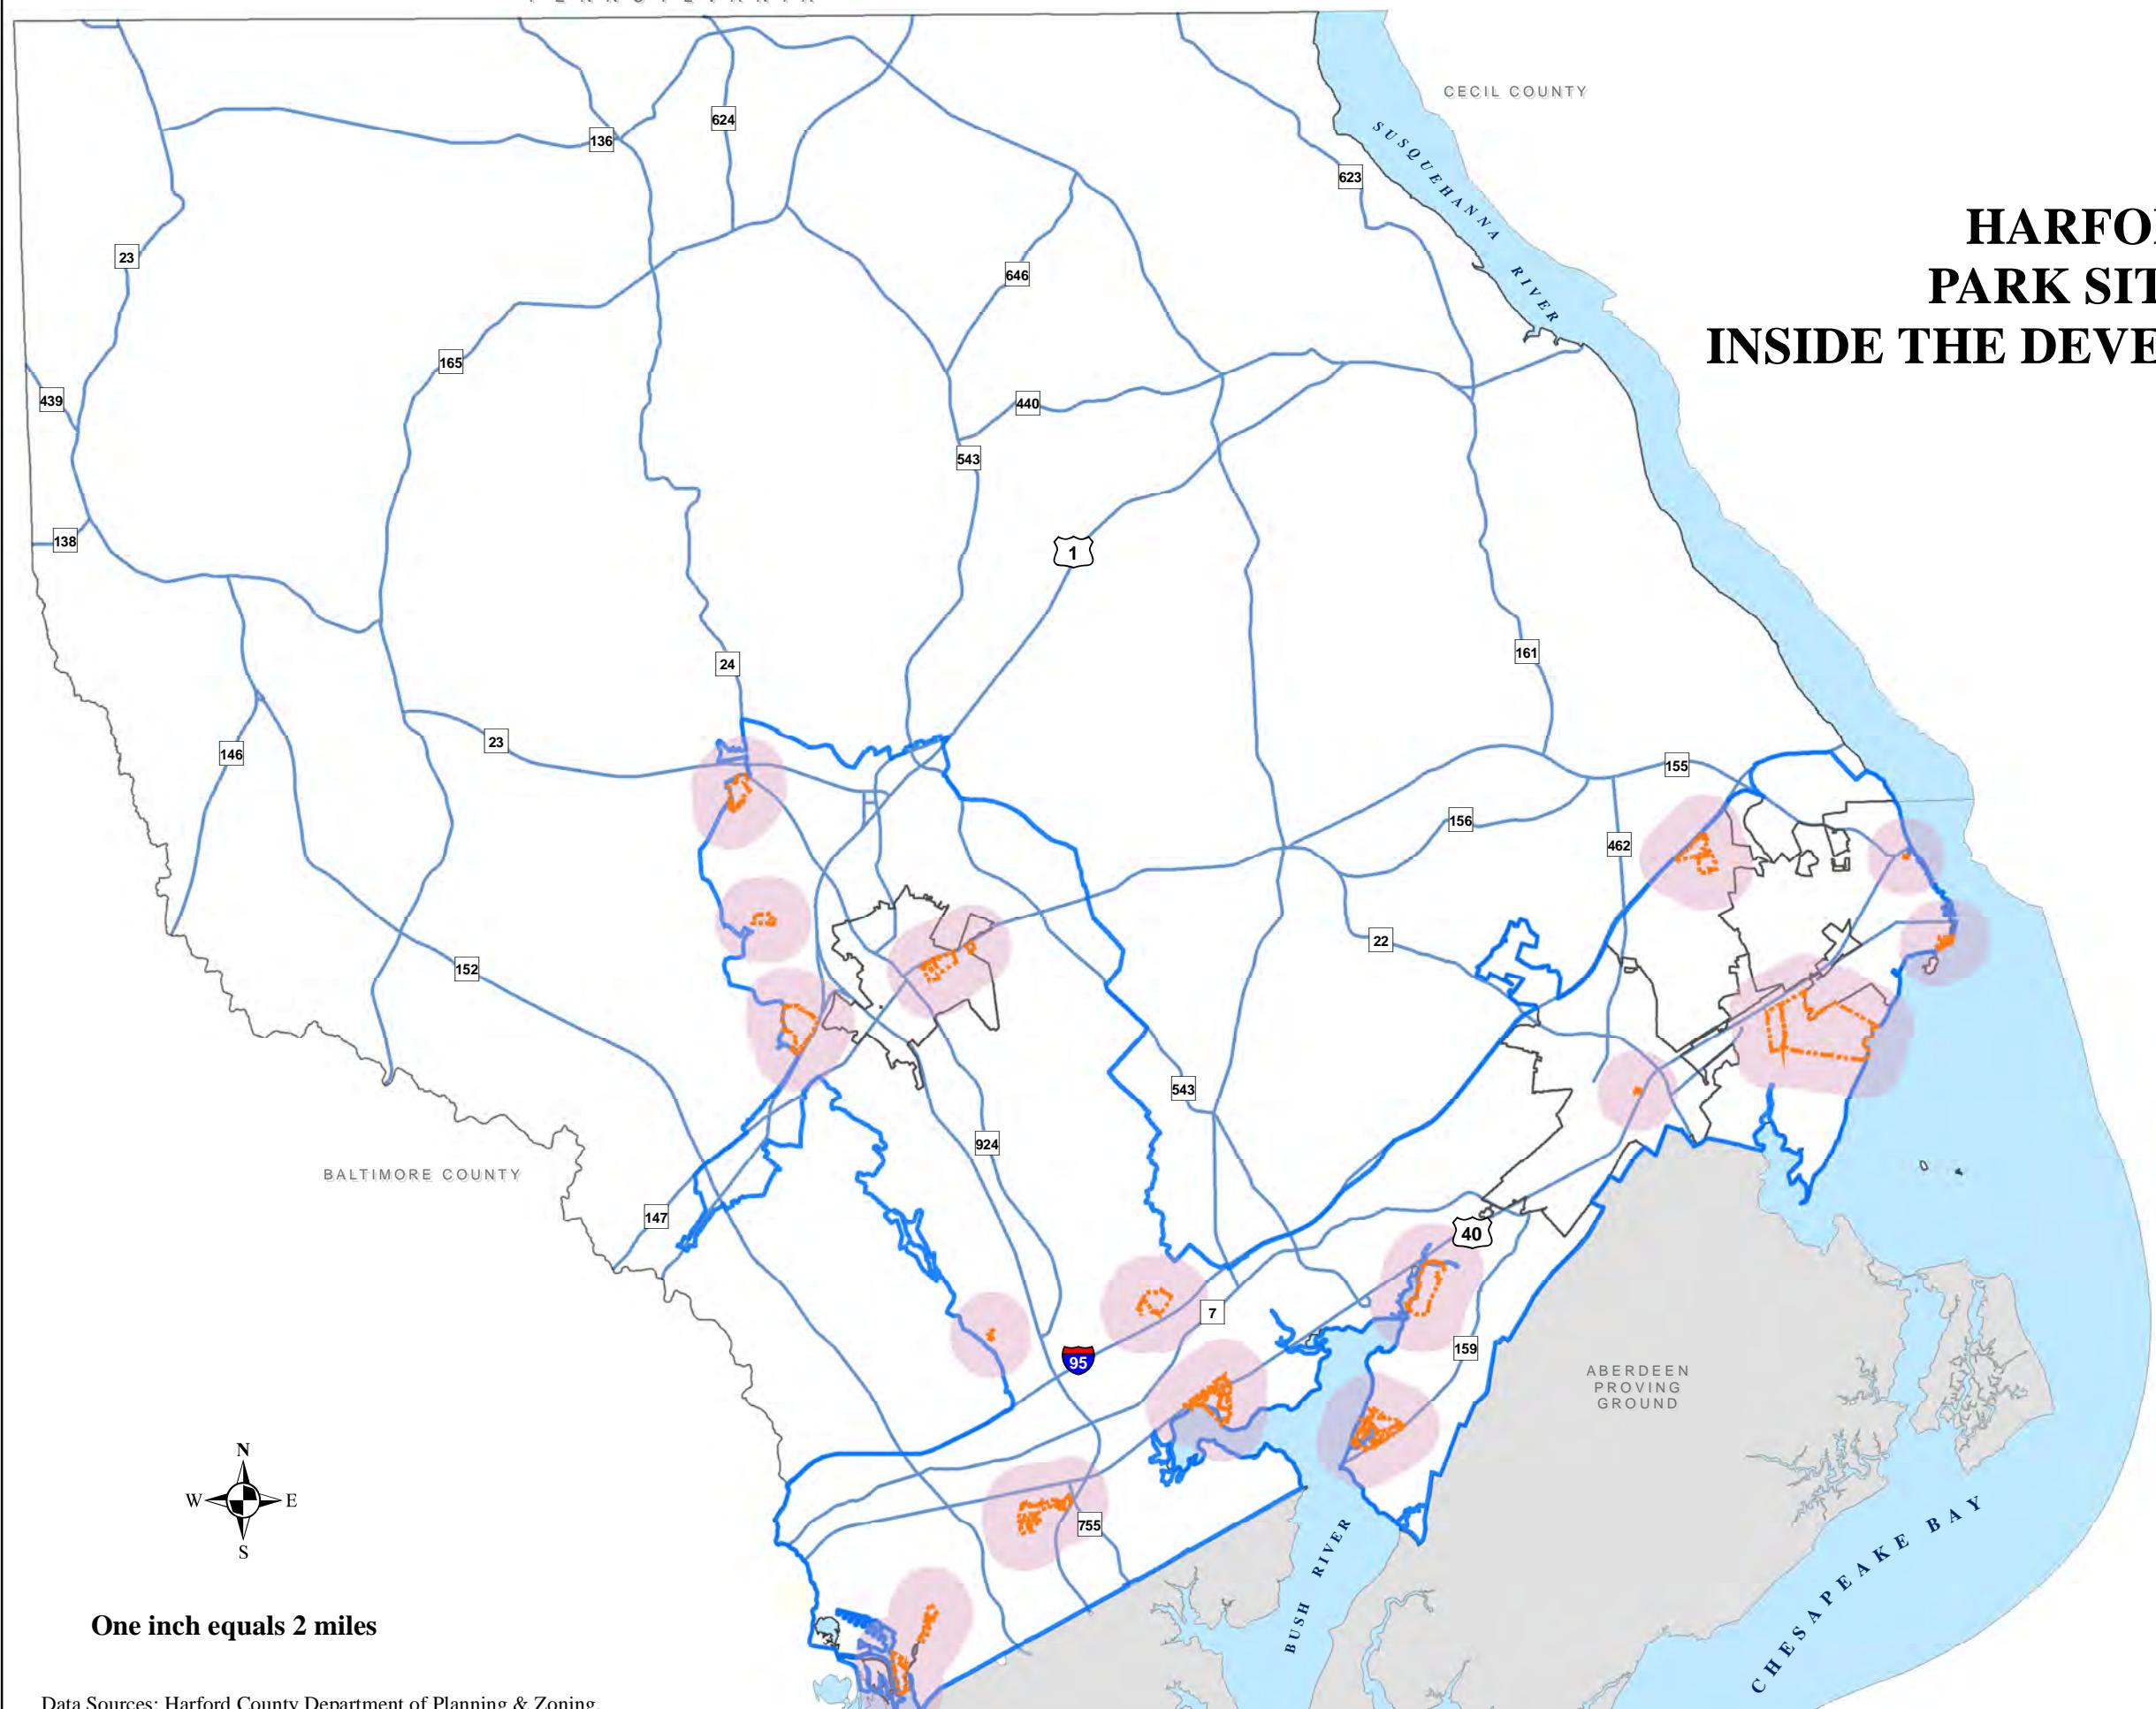

Map PEA14 identifies the County parks with trails relative to those areas of the County with a high concentration of population below the poverty line. These communities include Edgewood, Abingdon, Aberdeen, APG, and small pockets in Forest Hill, Emmorton, Belcamp, and Havre de Grace. There are opportunities for future trails and trail sites in communities throughout the Development Envelope, including northern Edgewood, Emmorton, Belcamp, and northwestern Aberdeen. Portions of many of the census tracts areas with high concentrations of poverty have some access to park sites with trails and the Ma & Pa trails. It again should be noted there are areas within Aberdeen Proving Ground (APG) on the south end of the County, that have a high concentration of poverty, but APG provides recreation services to its resident population.

Map PEA15 identifies the County park sites with trails relative to those areas of the County with high population density. Not surprisingly, these areas coincide with the Development Envelope and show patterns of development and opportunities for future trail development in the areas with a high concentration of children under 17. Communities including Forest Hill, Emmorton/Abingdon, Belcamp/Riverside, Aberdeen, and Havre de Grace have opportunities for trail development.

Map PEA16 identifies the County park sites with trails relative to their proximity to parks. Again, these areas tend to coincide with the Development Envelope and show opportunities for development of trails in areas similar to the areas with a high concentration of children under 17. Communities including Hickory-Fountain Green,

Emmorton/Abingdon, Belcamp, Aberdeen, and Havre de Grace have opportunities for future trail development.

Boating, Fishing and Water Access

As reflected in the State's requirements for the LPPRP and the public survey conducted as part of LPPRP process, public access to water, particularly for boating, remains an important issue in Harford County. Population increases have spawned a large increase in demand for boating access to the Chesapeake. There are twenty launch facility locations in Harford County. Some of these facilities can accommodate motorized boats, as well as, non-motorized boats. Others can only accommodate non-motorized boats. Ten of the facility locations—Anita C. Leight Estuary Center, Broad Creek Landing, Eden Mill, Eleanor and Millard Tydings County Park, Flying Point Park, Line Bridge Road, Mariner Point Park, Otter Point Creek, Swan Harbor Farms, and Willoughby Beach Landing—are owned and operated by the Harford County Department of Recreation and Parks. Three of the facilities—Havre de Grace Yacht Basin, Hutchins Memorial Park, and Jean S. Roberts Memorial Park—are owned and operated by the City of Havre de Grace. The State of Maryland has the Lapidum and Stafford Bridge access boat launches, as well as, Trestle Canoe Launch in Susquehanna State Park. Shuresville Landing and Glen Cove boat launches, both of which are available to the public, are owned by the Exelon Corporation.

Finding additional locations for boat ramps in Harford County is a difficult proposition for several reasons:

- The Federal government, through the Aberdeen Proving Ground, owns more than 70 percent of the County's shoreline.
- DNR requires a minimum of three acres of usable land to construct a motorized boat launch.
- Much of the Harford shoreline is inaccessible from the water because of submerged aquatic vegetation—vegetation below the water surface, which must be protected. Water depth is also a consideration in locating launch sites, and some estuarine areas in the Route 40 corridor are too shallow to permit motorized boat launching.

In addition to land based trails, the Maryland Department of Natural Resources is developing a series of blueways. These are water trails with routes along a river or across other bodies of water, such as a lake or salt water, for people using small beachable boats like canoes, kayaks or rowboats. As noted in PR-2, Harford County will work to develop water trails, including sites for non-motorized boating access. The Maryland Water Trails and Public Access Planning Program works with project partners (including state, local and federal governments) to develop and promote water trails and public waterway access sites that provide recreational boating opportunities for people to enjoy.

As a result of these circumstances, the proximity analysis for the overall availability of parks with fishing and water access uses the 5-mile radius, a 15-minute drive, for all sites in the County (Map PM10). Using this criterion, all of the southern and central areas of the County, as well as, much of the northern area of the County is within a 15-minute drive

of a park site with fishing or access to water. Areas along the western edge of the County, including Fallston, Jarrettsville, and Norrisville are areas where opportunities for future water access development exist, although the analysis only considered County sites and there are existing water access in Gunpowder State Park, along the Harford-Baltimore County border.

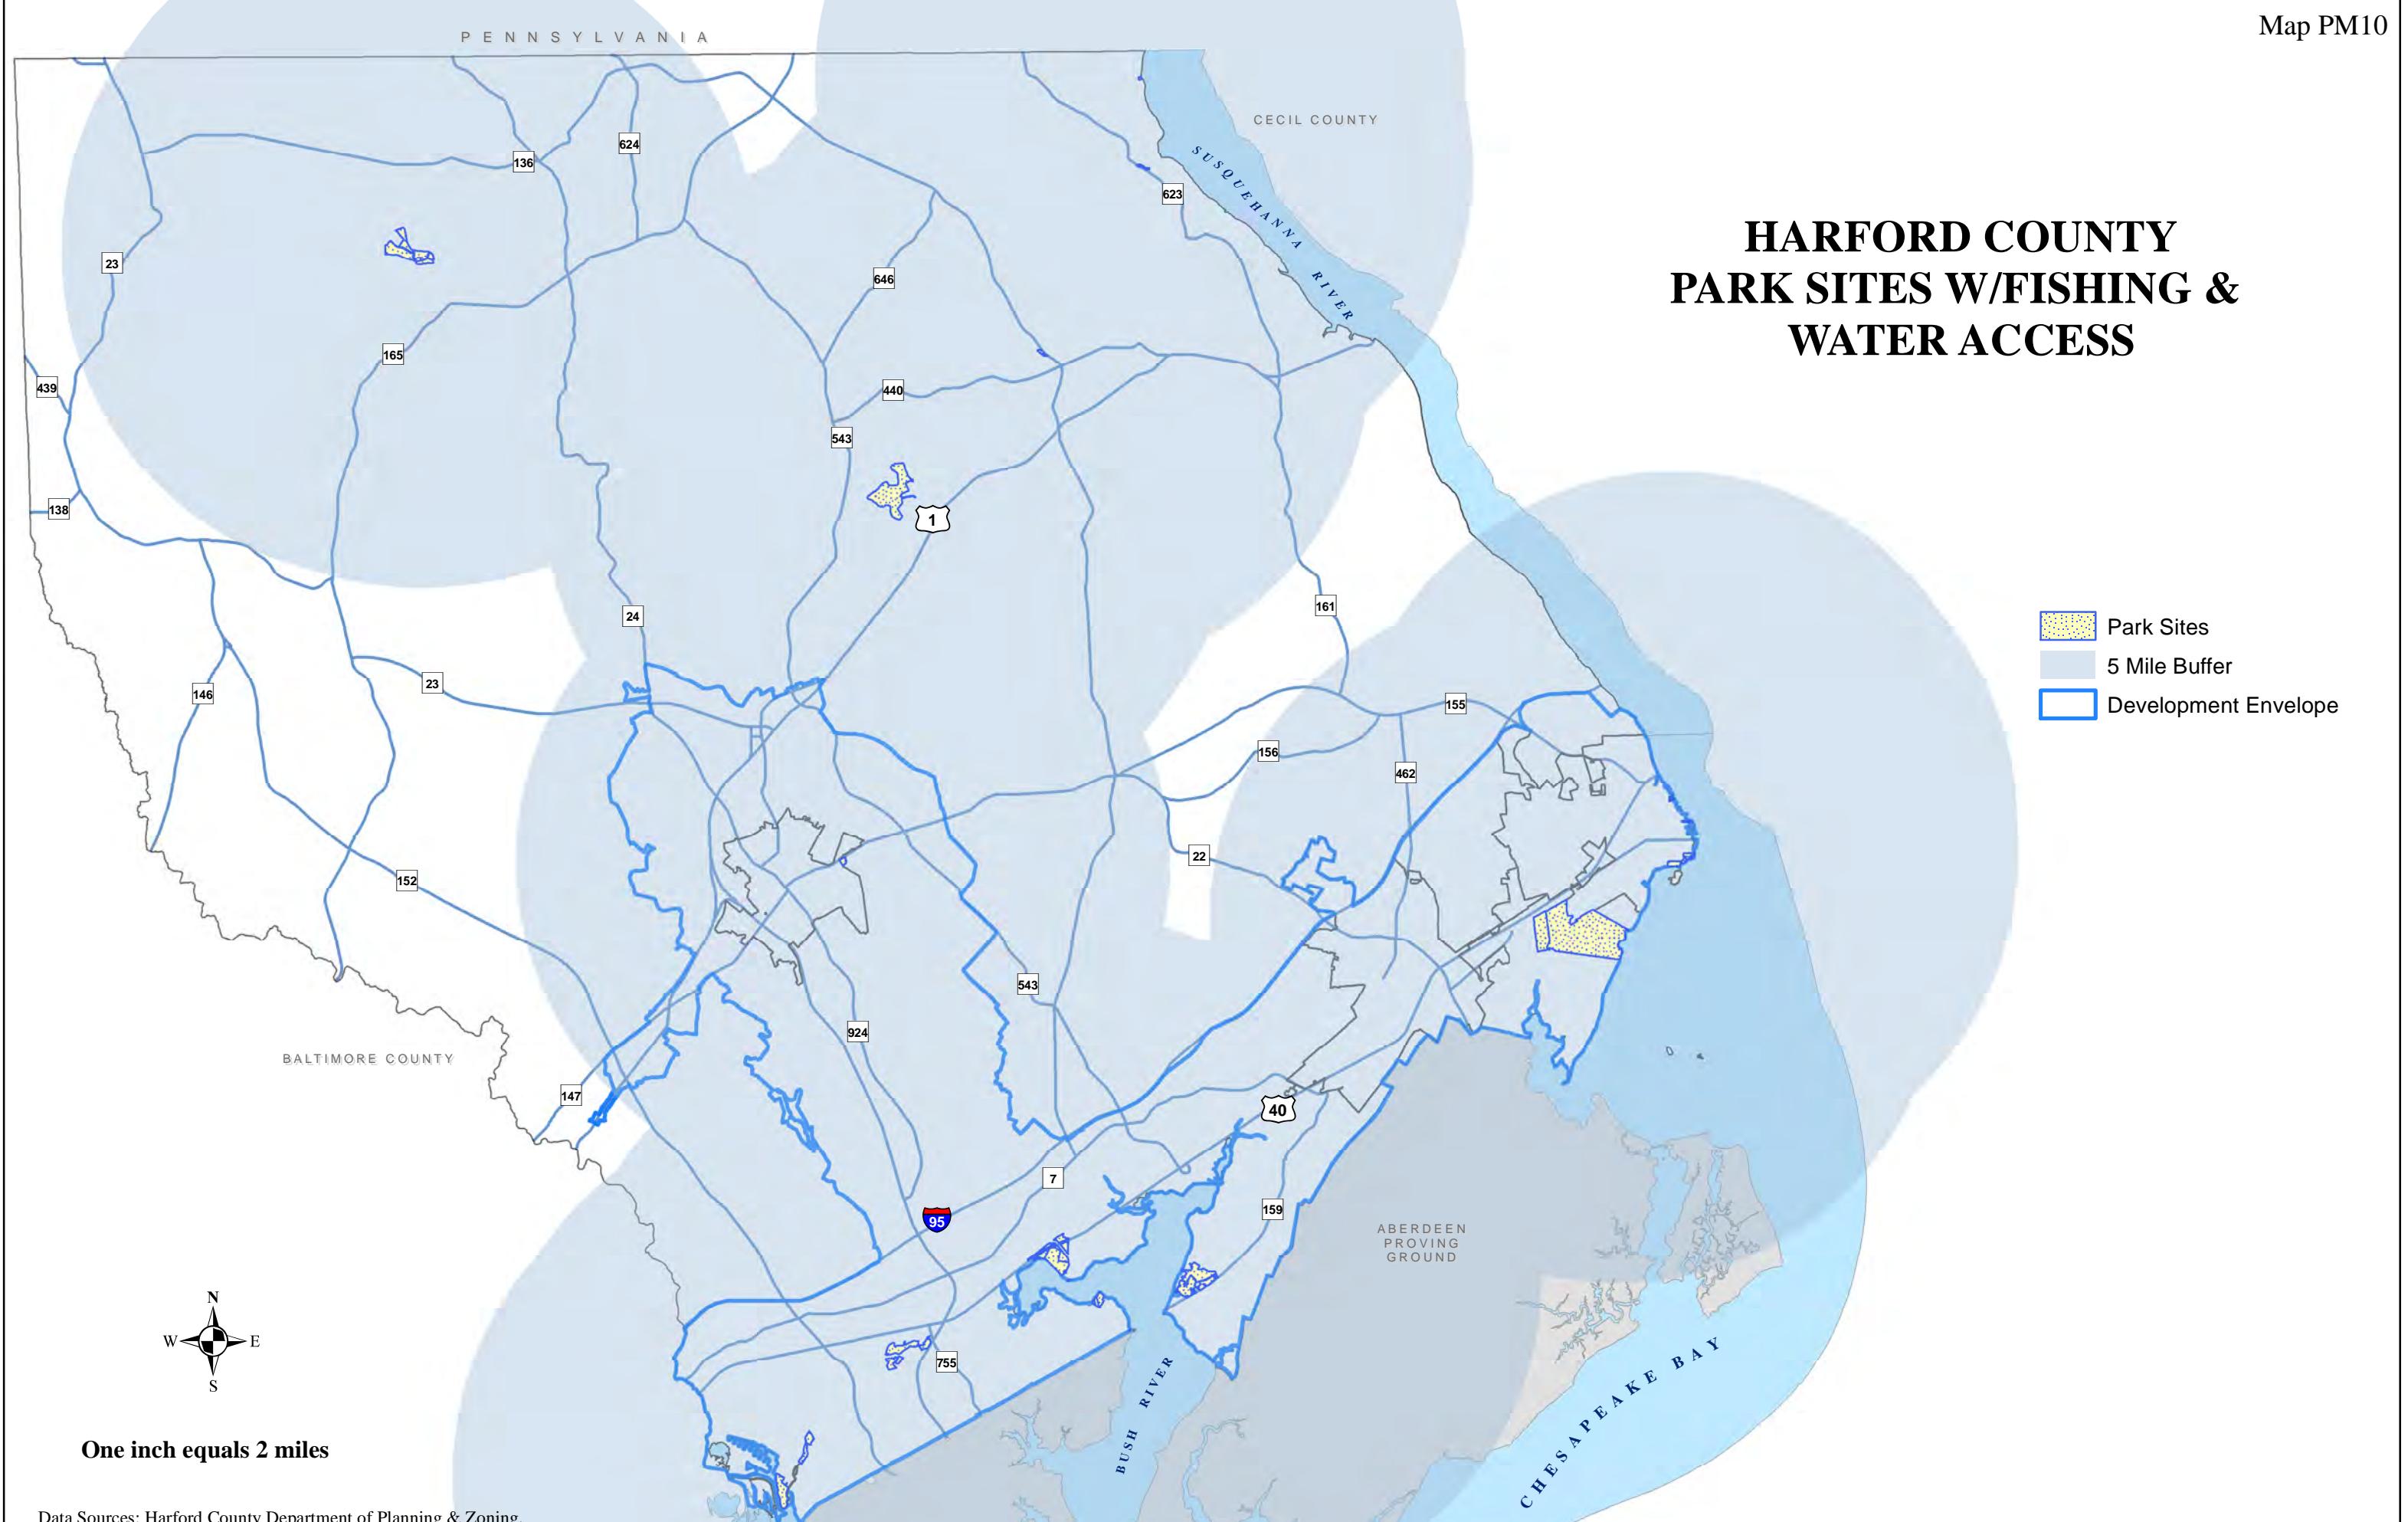

Using the Park Equity Analysis mapping reveals the following observations. Map PEA17 identifies the County parks with fishing or water access relative to those areas of the County with a high concentration of children under 17. These communities include Edgewood, Forest Hill, Hickory-Fountain Green, Emmorton, Aberdeen, and Havre de Grace. Based on the 15-minute drive criterion, virtually all communities with a high concentration of children under 17 have convenient access to park sites with fishing or water access. Only an area in the Jarrettsville community is outside of 5 miles from a County park site with fishing or water access.

Map PEA17 identifies the County parks with fishing or water access relative to those areas of the County with a high concentration of population below the poverty line. These communities include Edgewood, Emmorton/Abingdon, Aberdeen, APG, and small pockets in Forest Hill, Belcamp, and Havre de Grace. Again, based on the 15-minute drive criterion, all communities with a high concentration of population below poverty level have convenient access to park sites with fishing or water access.

Map PEA19 identifies the County park sites with fishing or water access relative to those areas of the County with high population density. Not surprisingly, these areas coincide with the Development Envelope. Again, based on the 15-minute drive criterion, all communities with a high population density have convenient access to park sites with fishing or water access.

Map PEA20 identifies the County park sites with fishing or water access relative to their proximity to parks. Again, these areas tend to coincide with the Development Envelope although there are some areas in the Jarrettsville community that are identified as medium-high to high need areas. Based on the 15-minute drive criterion, virtually all communities have convenient access to park sites with fishing or water access. Only the areas in the Jarrettsville community are outside of 5 miles from a County park site with fishing or water access.

Playgrounds

Based on survey results and informal observations, the availability of playgrounds for parents and children to gather informally adds significantly to the local quality of life. In response to the survey question asking about their top activities at County parks sites, more than 41% of respondents stated using playgrounds. Additionally, over the past 15 years, the Department has worked with Harford County Public Schools to upgrade playgrounds, particularly at County elementary school sites. As a result, more than 63 percent of playgrounds are on school sites, and school-based playtime may account for the vast majority of school playground usage. However, playgrounds at school sites are available for public use outside of school hours. Given this information, school sites were also included in the proximity and park equity analysis. Furthermore, general observations at sites such as Annie's Playground and the Lyn Stacie Getz Creative Playground suggest that the demand for playgrounds may be much greater than the analysis and survey results indicate. The department is aware of the need to continue developing creative play facilities and updating existing facilities. Playgrounds are also an important component in increasing active play among children.

The proximity analysis for the overall availability of sites with playgrounds within the Development Envelope identify opportunities for future sites in several communities. Again, this analysis is based on a 1/2- mile radius for walkability standard (Map PM11). Communities areas that provide opportunities for future playgrounds are throughout the Development Envelope including Edgewood, Forest Hill, Hickory-Fountain Green, Emmorton/Abingdon, Belcamp/Perryman, and Havre de Grace. Outside the Development Envelope, the proximity analysis using the 5-mile radius shows the entire area is within a 15-minute drive to a site with a playground (Map PM12). This 15-minute drive also includes much of the area inside the Development Envelope along the Route 24 and half of the Route 40 corridors.

Using the Park Equity Analysis mapping reveals the following observations. Map PEA21 identifies the County sites with playgrounds relative to those areas of the County with a high concentration of children under 17. These communities include Edgewood, Forest Hill, Hickory-Fountain Green, Emmorton, Aberdeen, and Havre de Grace. There are opportunities for future playgrounds in communities including Forest Hill, Hickory-Fountain Green, Emmorton/Abingdon, Aberdeen, and Havre de Grace. Outside the Development Envelope using the 5-mile radius shows the entire area is within a 15-minute drive to a site with a playground. As previously discussed, it should be noted there are areas within Aberdeen Proving Ground (APG) on the south end of the County, that have a high concentration of children, but APG provides recreation services to its resident population.

Map PEA22 identifies the County sites with playgrounds relative to those areas of the County with a high concentration of population below the poverty line. These communities include Edgewood, Emmorton/Abingdon, Aberdeen, APG, and small pockets in Forest Hill, Belcamp, and Havre de Grace. There are opportunities for playgrounds in communities throughout the Development Envelope, including Forest Hill, Emmorton/Abingdon, Edgewood, Belcamp, and northwestern Aberdeen. Portions of many of the census tracts areas with high concentrations of poverty have some access to County sites with playgrounds. Outside the Development Envelope using the 5-mile

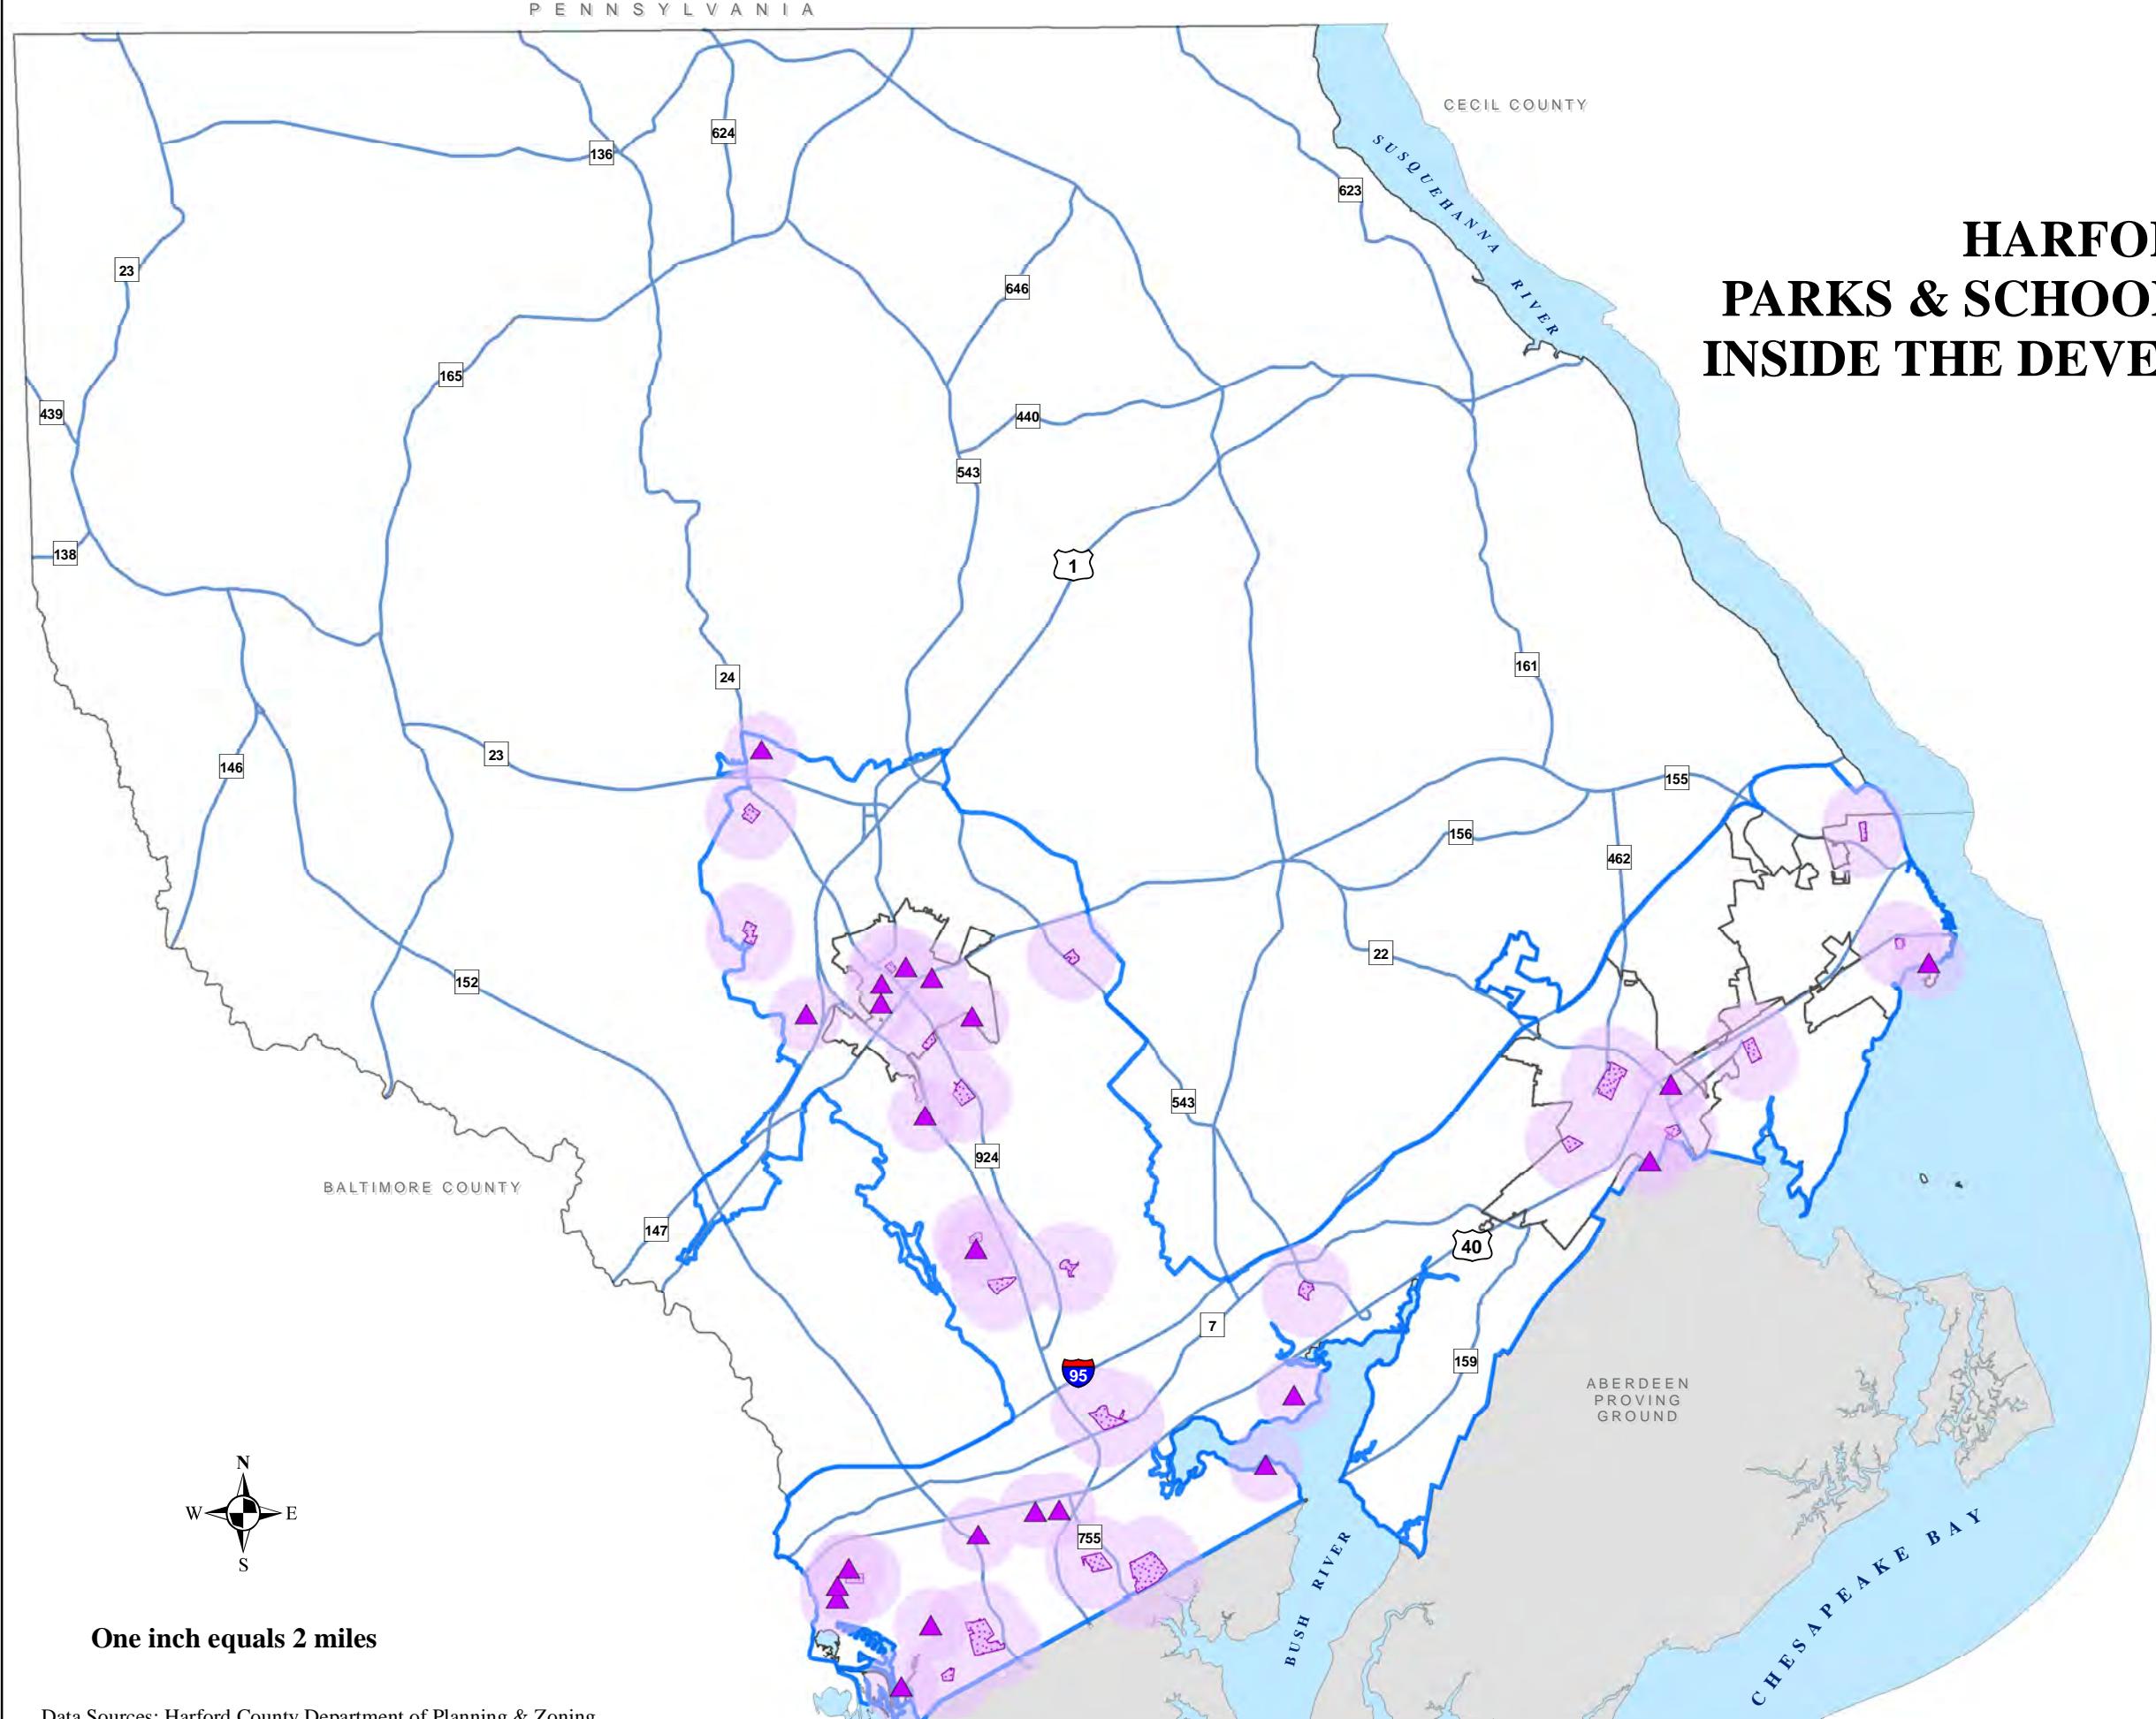

radius shows the entire area is within a 15-minute drive to a site with a playground. It again should be noted there are areas within Aberdeen Proving Ground (APG) on the south end of the County, that have a high concentration of poverty, but APG provides recreation services to its resident population.

Map PEA23 identifies the County park sites with trails relative to those areas of the County with high population density. Not surprisingly, these areas coincide with the Development Envelope and show opportunities for future playgrounds in areas similar to those areas in the County with a high concentration of children under 17. Communities including Forest Hill, Emmorton/Abingdon, Belcamp/Riverside, Aberdeen, and Havre de Grace have opportunities for playgrounds.

Map PEA24 identifies the County sites with playgrounds relative to their proximity to parks. Again, these areas tend to coincide with the Development Envelope and show opportunities for development of playgrounds in areas similar to the areas with a high concentration of children under 17. Communities including Forest Hill, Hickory-Fountain Green, Emmorton/Abingdon, Belcamp, Aberdeen, and Havre de Grace have opportunities for playgrounds.

Picnic Facilities/Areas

As part of the 2018 LPPRP process, the Department of Natural Resources required the inclusion of picnic facilities as part of the analysis of the County system. For purposes of this analysis, picnic facilities are considered areas within parks or recreation facilities that provide picnic benches and/or pavilions that can accommodate multiple individuals or user groups. This can also be considered consistent with the public survey results where 49% of respondents answered, “Enjoy nature” in response to the question about top activities during park visits.

The proximity analysis for the overall availability of park sites with picnic facilities within the Development Envelope identify opportunities for future sites in several communities. Again, this analysis is based on a 1/2- mile radius for walkability standard (Map PM13). Communities areas that provide opportunities for future picnic facilities are throughout the Development Envelope including Joppa, Edgewood, Forest Hill, Hickory-Fountain Green, Emmorton/Abingdon, Belcamp/Perryman, and Havre de Grace. Outside the Development Envelope, the proximity analysis using the 5-mile radius shows the entire area is within a 15-minute drive to a park site with picnic facilities (Map PM14). This 15-minute drive also includes much of the area inside the Development Envelope along the Route 24 and half of the Route 40 corridors.

Using the Park Equity Analysis mapping reveals the following observations. Map PEA25 identifies the County sites with picnic facilities relative to those areas of the County with a high concentration of children under 17. These communities include Edgewood, Forest Hill, Hickory-Fountain Green, Emmorton, Aberdeen, and Havre de Grace. There are opportunities for future picnic facilities in communities including Forest Hill, Hickory-Fountain Green, Emmorton/Abingdon, Belcamp, Aberdeen, and Havre de Grace. Outside the Development Envelope using the 5-mile radius shows the entire area is within a 15-minute drive to a site with picnic facilities. As previously discussed, it should be noted there are areas within Aberdeen Proving Ground (APG) on the south end of the County, that have a high concentration of children, but APG provides recreation services to its resident population.

Map PEA26 identifies the County sites with picnic facilities relative to those areas of the County with a high concentration of population below the poverty line. These communities include Edgewood, Emmorton/Abingdon, Aberdeen, APG, and small pockets in Forest Hill, Belcamp, and Havre de Grace. There are opportunities for picnic facilities in communities throughout the Development Envelope, including Forest Hill, Emmorton/Abingdon, Edgewood, Belcamp, Aberdeen and Havre de Grace. Portions of many of the census tracts areas with high concentrations of poverty have some access to County sites with picnic facilities. Outside the Development Envelope using the 5-mile radius shows the entire area is within a 15-minute drive to a site with picnic facilities. It again should be noted there are areas within Aberdeen Proving Ground (APG) on the south end of the County, that have a high concentration of poverty, but APG provides recreation services to its resident population.

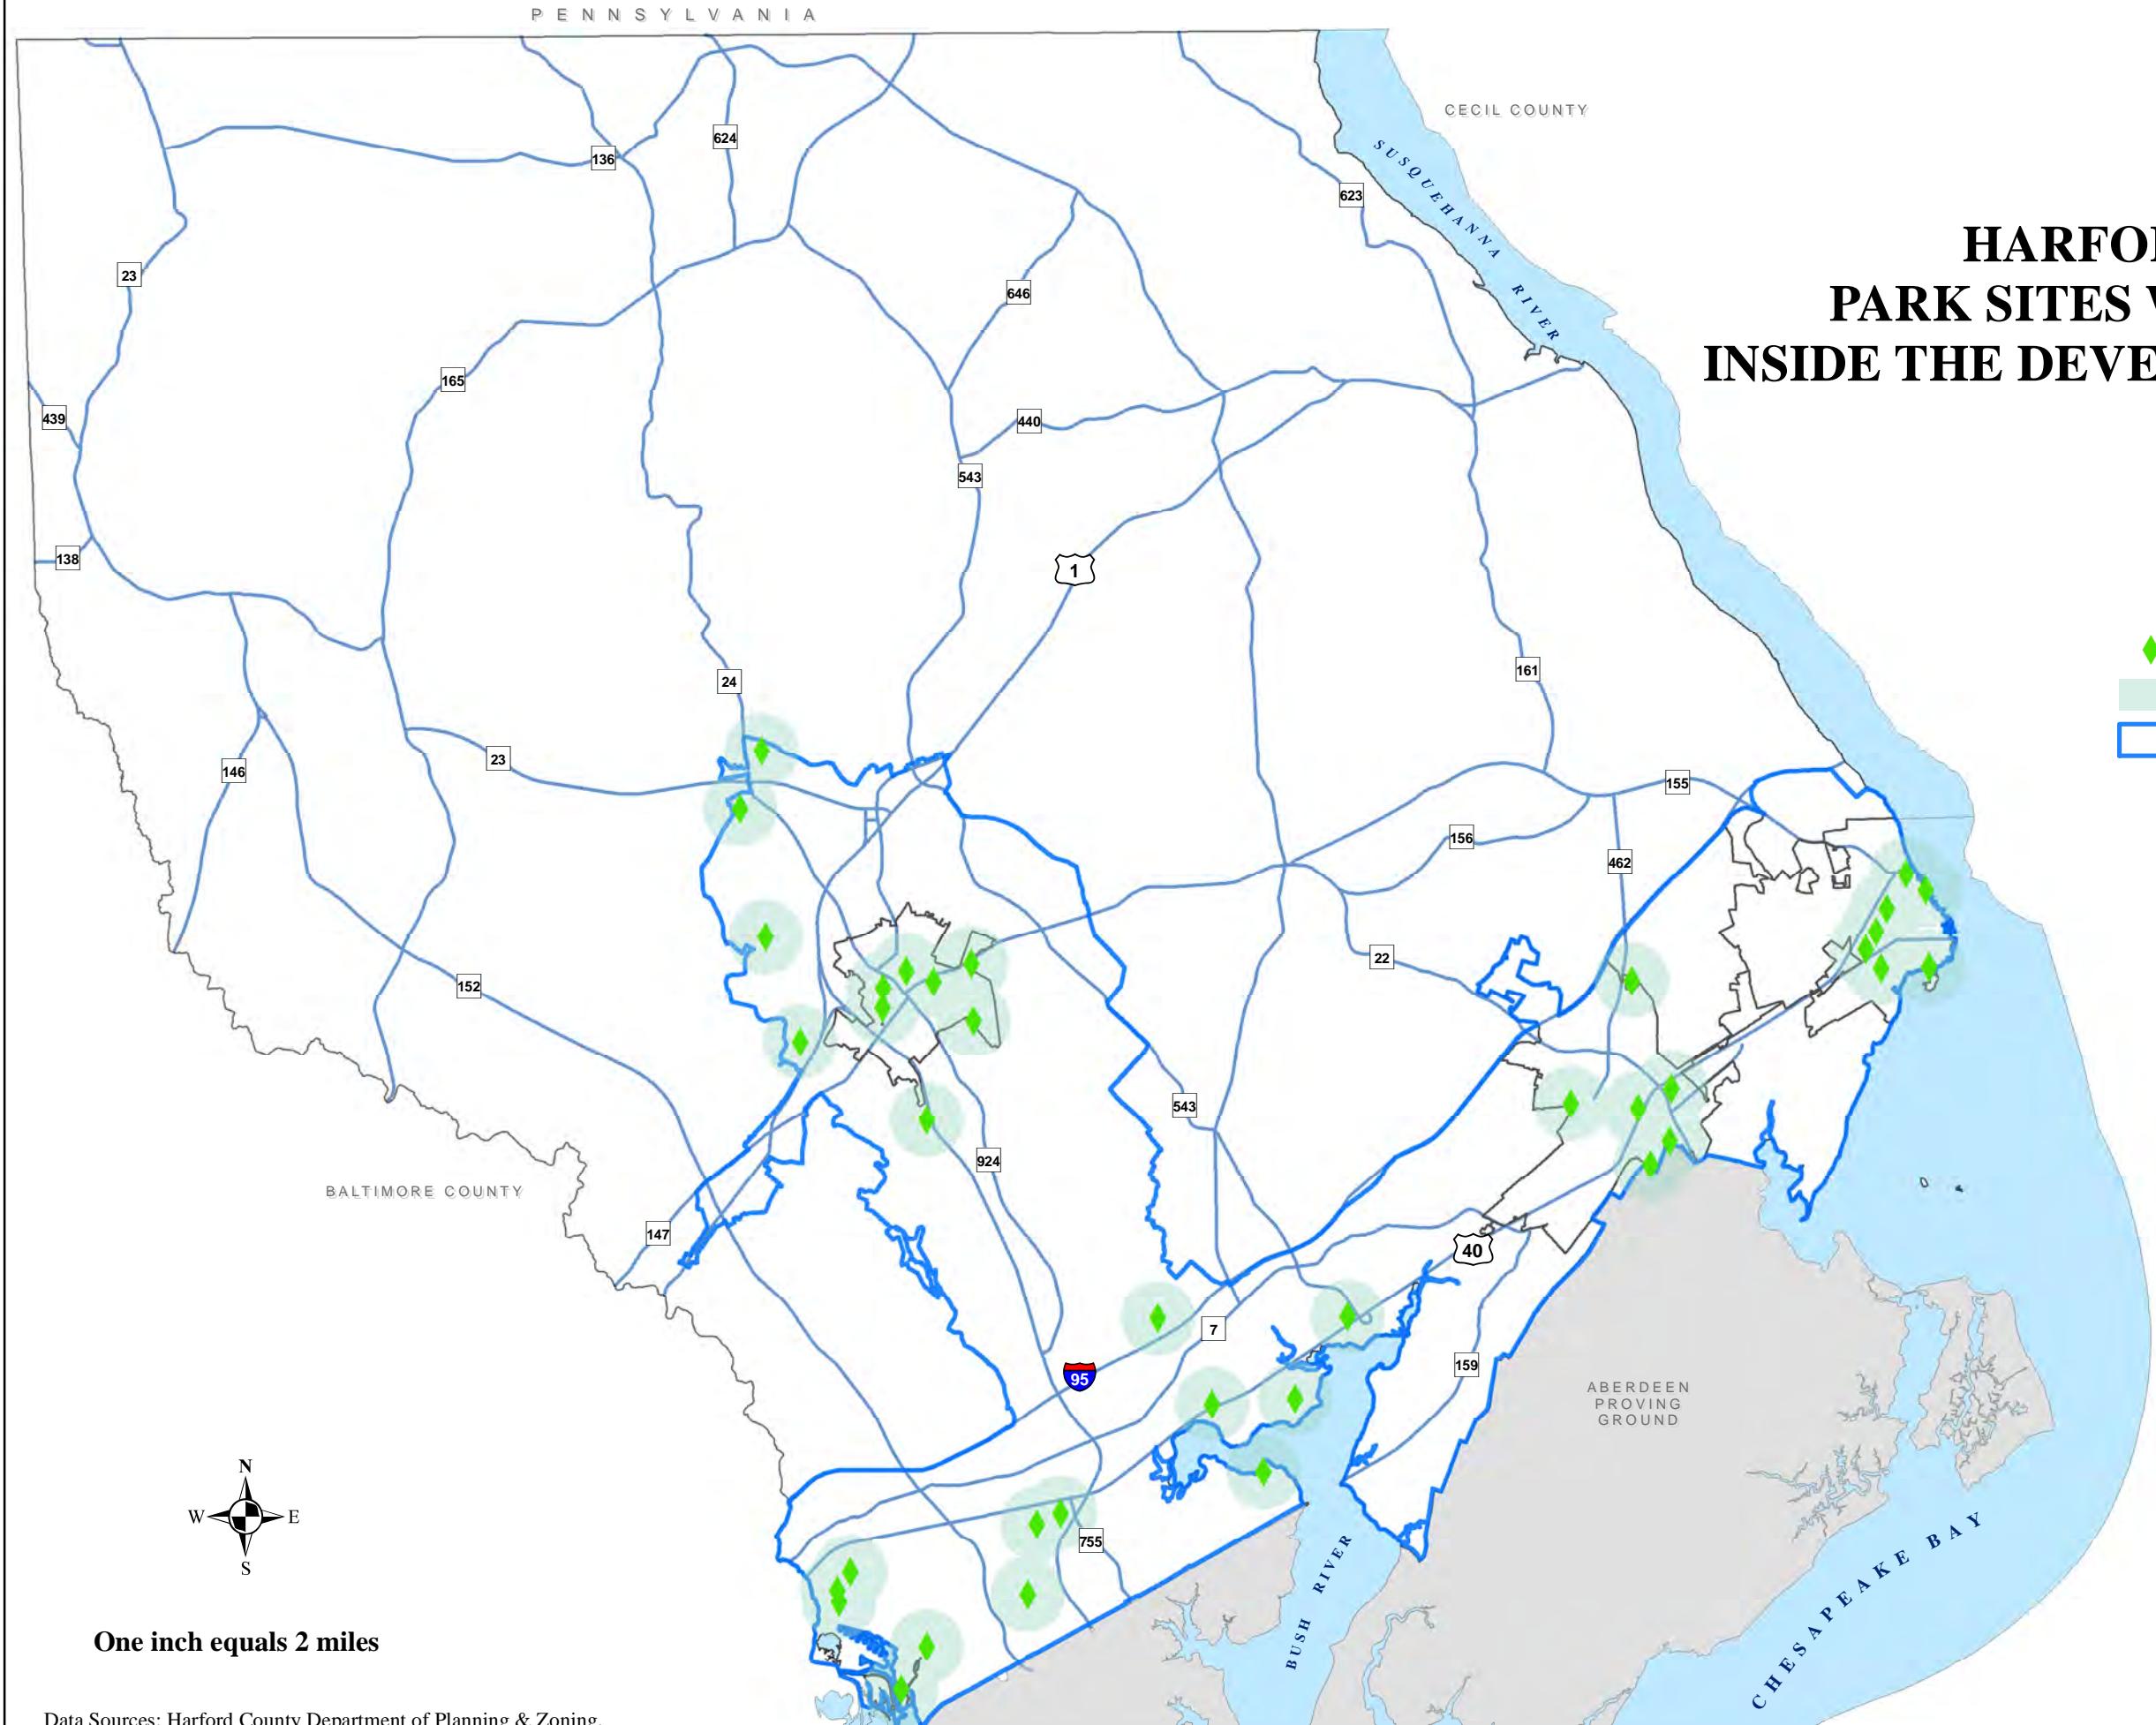

Map PEA27 identifies the County park sites with picnic facilities relative to those areas of the County with high population density. Not surprisingly, these areas coincide with the Development Envelope and show opportunities for future picnic facilities in areas similar

to those areas in the County with a high concentration of children under 17. Communities including Edgewood, Forest Hill, Emmorton/Abingdon, Belcamp/Riverside, Aberdeen, and Havre de Grace have opportunities for picnic facilities.

Map PEA28 identifies the County sites with picnic facilities relative to their proximity to parks. Again, these areas tend to coincide with the Development Envelope and show opportunities for development of playgrounds in areas similar to the areas with a high concentration of children under 17. Communities including Forest Hill, Hickory-Fountain Green, Emmorton/Abingdon, Belcamp, Aberdeen, and Havre de Grace have opportunities for picnic facilities. Outside the Development Envelope using the 5-mile radius shows the entire area is within a 15-minute drive to a site with picnic facilities.

CAPITAL RECOMMENDATIONS AND COUNTY PRIORITIES

To establish priorities for acquisition, facility development and rehabilitation, the Department of Parks and Recreation must balance the need to maintain and improve current infrastructure with the need to construct new facilities. Many existing park amenities were constructed in the 1970s and have been in service for more than 35 years. Major renovations and rehabilitation efforts are necessary to ensure that facilities meet safety standards and ADA compliance and respond to current recreation trends. Attractive, well-maintained recreation facilities are an important component of community character and livability. The County makes a significant investment each year to simply rehabilitate existing tennis courts, multipurpose courts, and backstops and to resurface parking lots. In addition, replacing playgrounds at schools and parks is a vital factor in the fight against childhood obesity and antisocial behavior and requires funding from the County, Parent Teacher Associations, and other community groups.

Harford County will continue to acquire both active and passive parkland through the planning period. Meeting the HarfordNEXT goal of 30 acres per 1,000 persons (ac/000) will require an additional 824 acres of parkland by 2030. The goal is desirable, but current funding limitations make the goal challenging. The *2018 Harford County Land Preservation, Parks, and Recreation Plan* sets a goal of acquiring 584 acres of land in the next 7 years. The goal provides 30 ac/000 for the additional 15,000 people expected in Harford County by 2025. To maintain the current ratio of 29.5 ac/000 countywide, an additional 451 acres is necessary. This proposed goal is ambitious, given the competition for and the price of the available land. In response to the results of the Proximity and Park Equity Analysis, the County will continue to focus acquisition efforts on land within the Development Envelope. In the Capital Improvement Plan (CIP), this will occur through the Parkland Acquisition project that will include at least 50% of the local-side Program Open Space funding for the duration of the CIP. In certain instances, the park sites may be located on the boundary of the Development Envelope due to the high price and limited availability of land within the Envelope. Additional passive recreation land is proposed along Deer Creek or the Susquehanna River.

Existing parks and school properties will be developed to full potential while maintaining sensitive environmental areas and adequate neighborhood buffers. New parks will be developed in phases, and the specific mix of facilities will be based on the programming needs of the community, as well as the Proximity and Park Equity Analysis. Specific examples on new parks in the CIP include; Emily Bayless Graham Park, whose development will include trails and picnic areas for the Emmorton/Abingdon area of the County; and Northern Regional Park, whose development will include fields, as well as, trails based on the trail analysis for the Whiteford area of the County.

To address the continued demand for active recreation facilities, additional diamonds (baseball/softball) and fields (football/soccer/lacrosse) must be constructed throughout or near the development envelope. In some instances, lighting of existing fields may be an appropriate method of addressing facility needs, provided surrounding neighborhoods can be protected. While the analysis is based on general survey information and existing facilities on a countywide basis, the current demand for facilities in specific recreation council service areas and trends in certain sports activities also will be a factor to the department in its development of park sites. As previously discussed, the surging

popularity of lacrosse as a spring sport for both boys and girls creates the need for separating lacrosse fields and baseball/softball diamonds, along with the growing popularity of year-round programs in both soccer and baseball. This will be addressed in the development of parks as well as community facilities. Trends in leisure activities and the mix of sport facilities will be addressed in the project design phase in conjunction with the affected recreation councils and other community users. Several proposed projects in the CIP will look to address factors that were identified as opportunities in the Proximity and Park Equity analysis for fields, trails, and/or picnic areas. Norrisville Park will address availability to trails for the area as part the proposed park development. Rock Glenn Park development in Aberdeen will help address access to field space and trails for the surrounding community. Vale Road Park will help address availability to trails for the west Bel Air area community.

Development of an integrated community trail systems, such as the Ma and Pa Heritage Trail, continues to be a Departmental priority. This is clearly reflected in CIP with the proposed funding in the Trails and Linear Parks project for the Ma and Pa Heritage Trail projects, as well as, other integrated community trail projects. Existing sites will also be improved with trail systems within the sites, including Fox Meadows in Jarrettsville and Francis Silver Park in Darlington. Additionally, opportunities for water trails and access along those trails is reflected in the proposed spending for the Canoe and Kayak Launch project.

The *2018 Harford County Land Preservation, Parks, and Recreation Plan* includes the County's detailed recommendations for acquisition, facility development, and rehabilitation (Table 2.6). Projects proposed in the FY 2019 and FY 2024 will be revised over time depending on recreation trends and financial constraints.

The program as shown in Table 2.6 includes 57 projects with a total cost of more than \$74 million. An additional 584 acres are proposed for acquisition. The 52 park and recreation projects (excluding the 5 waterway improvements) breakdown as follows:

- Acquisition: \$9,275,000 (13%)
- Capital Development: \$49,020,000 (68%)
- Rehabilitation: \$13,609,000 (19%)

Meeting the goals of the *2018 Harford County Land Preservation, Parks, and Recreation Plan* will require an investment of State, County and private resources. If fully funded by the State legislature, Program Open Space-Local side may yield \$1.5 – \$2.0 million dollars to Harford County each year, for a total of \$10.5–\$14 million over the planning period. Local recordation tax revenues are also based on property sales and have been yielding \$2.5–\$3 million per year, for a total of \$17.5–\$21 million over the planning period.⁸ The combined revenues from POS and the local recordation tax would provide approximately 39 to 49 percent of the funds needed recreation acquisition and development. An additional \$4 million could come from the Federal Highway Administration for the segments of the Ma and Pa Trail. The County must actively pursue other State and federal grants as well as private foundation grants where appropriate.

⁸ Estimates are based on a relatively stable and healthy real estate market with the increase in property values offsetting a decrease in new home construction.

Major land acquisitions may also be supported by paygo and/or bond funds as approved by the Harford County Executive and the Harford County Council, who will carefully balance available financial resources with the wide variety of public service needs.

TABLE 2.6 - CAPITAL IMPROVEMENT PLAN FY 2018 - FY 2024

Chapter 3

NATURAL RESOURCE CONSERVATION ELEMENT

Executive Summary / Overview of Natural Resource Land Conservation in Harford County

Preserving our natural resources and providing the County's citizens with access to these resources is essential to our quality of life in Harford County. As a County, we are striving to develop new access to our natural resources and waterfront areas, to ensure we are developing livable communities where people desire to live, work, and play. The County will continue to improve existing trails, and add new trails, greenways, or bikeways to enhance our livable communities.

The County is fortunate to have major State Parks: Gunpowder Falls State Park, Palmer State Park, Rocks State Park, and Susquehanna State Park. There are other important natural resource lands that are preserved, such as Eden Mill Park, the Bush Declaration Area, the Broad Creek Memorial Scout Reservation, Anita C. Leight / Izaak Walton League, Swan Harbor Farms, and Tydings Park. These parks are not only important for their natural resources, but provide invaluable outdoor recreation opportunities to Harford County citizens. These activities include but are not limited to fishing, kayaking, hiking, biking, tubing and picnicking.

The County realizes the importance of maintaining and enhancing the county's system of natural resource lands and associated recreation amenities. One of the County's "Big Ideas" that emerged during the writing of HarfordNEXT is the development of a Green Infrastructure Plan for the County. Green infrastructure is an interconnected network of green spaces that protects natural ecosystems and provides benefits to communities, such as clean air and water. It also adds value to private properties and maintains quality of life by providing recreational opportunities. Targeted Ecological Areas along with forested hubs and corridors will be the foundation of the future Green Infrastructure Plan for the County. Forested areas that provide habitat for wildlife are especially important for targeted acquisition, protection, and restoration efforts. It is also anticipated that with the development of the GI plan, additional opportunities to connect people to our natural areas will be identified.

GOALS FOR NATURAL RESOURCE CONSERVATION

Natural resource lands provide many environmental benefits citizens in Harford County. Streams, wetlands, floodplains, forests, rare habitats, steep slopes are natural areas that are worthy of preservation, as these areas are usually high in habitat value. Forests can be the most effective land cover in certain areas. Large forested areas that provide hubs and corridors for wildlife often have high wildlife and biodiversity values. These areas are especially important for targeting protection and restoration efforts.

The County is currently in the beginning stages of developing a Green Infrastructure Plan to help identify these areas. Ultimately, preserving these areas will serve to maintain and improve water quality to our local streams, rivers, and the Chesapeake Bay.

There are also many social benefits to protecting our natural resource lands. Natural resource areas provide citizens outdoor recreation opportunities. Hiking, kayaking, camping, fishing, and bicycling are just a few examples. Mature forest can provide shade to headwater streams and reduce sediment loads. Forested riparian buffers are important to maintaining or improving water and air quality, which translates into improved aquatic habitat and biodiversity. The quality of our streams and watershed is also important to the quality of life our citizens through improved and expanded recreational opportunities, such as swimming, fishing and boating.

County Goals

NR Goal 1 - Develop and nurture strong partnerships to protect sensitive resources through easements, acquisitions, and coordinated planning practices.

Harford County has many agencies and organizations that are concerned with natural resource conservation and the future of the county, including:

- Nonprofit organizations, such as Lower Susquehanna Heritage Greenway, the Isaak Walton League, Deer Creek Watershed Association, and the Susquehannock Wildlife Society.
- Land trusts, such as the Harford Land Trust, Manor Conservancy, Maryland Environmental Trust, and the Trust for Public Land.
- Government Boards and Commissions, such as the Harford Environmental Advisory Board and the Harford Historic Preservation Commission.
- Site-specific entities, such as the Deer Creek Watershed Association, Deer Creek Scenic River Board,
- Government agencies and entities, such as the Maryland Departments of Natural Resources and Planning and the Harford County Departments of Planning/Zoning and Parks/ Recreation.

Harford County should continue to be a strong, vocal advocate for land preservation, including lands that have sensitive resources. In addition to providing staff and funding for county projects, the county should serve as an information clearinghouse, staying abreast of land preservation activities throughout the county and alerting partners to appropriate land preservation opportunities.

NR Goal 2 - Strengthen the county focus on natural corridor preservation with an integrated approach to protect natural resources, habitat areas, and historic sites and to develop waterway trails. Develop the Harford County Green Infrastructure Plan.

The County has many linear linkages, such as the Ma and Pa Trail and the Lower Susquehanna Heritage Greenway. These corridors and linkages increase public awareness and enjoyment of natural resources, natural areas, habitats, and historic resources.

As previously mentioned, the County is developing a Green Infrastructure Plan that will identify high-value natural resource lands. Targeted Ecological Areas will be a priority for preservation or enhanced management. Connections between these lands, and where appropriate, people, will further enhance the County's approach to developing our corridor preservation efforts.

NR Goal 3 - Support the Lower Susquehanna Heritage Greenway.

The Lower Susquehanna Heritage Greenway (LSHG) lines the banks of the Susquehanna River in Harford and Cecil Counties from north of the Conowingo Dam to the head of the Chesapeake Bay—approximately 12,000 acres.¹ The county should support the work of LSHG in any way possible. Sample tasks include:

Assist in the acquisition, funding, and construction of trail segments.

- Work with LSHG and Exelon Power Company to identify trail and other recreational opportunities as Exelon moves through the federally-mandated re-permitting process.
- Provide any necessary and requested support in LSHG's applications to become part of the East Coast Greenway and to obtain federal heritage designation.
- Consider integrating LSHG projects into the county's capital improvements program.
- Establish a site for LSHG shuttle/transit service at Swan Harbor.

NR Goal 4 - Foster a strong working relationship between the county and the state in areas of mutual interest.

Harford County and the State of Maryland have many common land preservation goals and targets. The county—through the Harford County Departments of Parks/Recreation, Planning/ Zoning, and Economic Development should work closely to strengthen efforts in areas of mutual concern, such as:

¹ More information is available at www.lshgreenway.org.

- Forest protection
- Public access to water
- Tourism
- Control of invasive species
- Wetland protection
- Land preservation
- Transportation enhancements
- Trails

NR Goal 5 - Work to strengthen regulations to protect critical habitats.

Habitats of rare, threatened and endangered species are protected by 1) federal and state permit programs, such as the Joint 404 Wetlands Permit Program, and 2) local regulations in the Chesapeake Bay Critical Area. However, the programs and regulations often leave upland habitats unprotected. Harford County should work with the state to develop stronger regulations to protect critical upland habitats and biological communities. In addition, the county should strengthen the protection of critical habitats in the development of the County's Green Infrastructure Plan.

NR Goal 6 - Protect green infrastructure and contiguous forests or farmland by working with the state to support planning on a wider scale at both the state and county levels.

The geographic scope of planning reviews, practices, and procedures is often limited to a specific site even though the effects of land development are often felt far beyond parcel or municipal borders. The value of a reliable, safe water supply and the need to protect groundwater supply and quality and wellhead areas has made planning based on watersheds increasingly important. Harford County should encourage the state to continue and strengthen support for watershed planning.

With the development of County's Green Infrastructure Plan, important natural areas will be identified and prioritized to comprehensively target ecologically rich natural resource areas. Strategies and opportunities will be developed to afford these special areas additional protection. Farmlands that contain these natural resources will also play a large role in conserving these natural areas, and will be given additional consideration for conservation and protection.

Harford County should also consider the Rural Legacy and Forest Legacy areas a top priority for easement acquisitions. In addition, the county and state should maintain close communication and coordination regarding all lands to be added to state parks.

State Goals

Achieving the State's goals for the conservation of natural resource lands depends on cooperation and coordination among federal and local governments, citizens, conservation organizations, and the private sector:

- Identify, protect, and restore lands and waterways in Maryland that support important aquatic and terrestrial natural resources and ecological functions, through combined use of the following techniques:

- Public land acquisition and stewardship;
- Private land conservation easements and stewardship practices through purchased or donated easement programs;
- Local land use management plans and procedures that conserve natural resources and environmentally sensitive areas and minimize impacts to resource lands when development occurs;
- Support incentives for resource-based economies that increase retention of forests, wetlands, or agricultural lands;
- Avoidance of impacts on natural resources by publicly funded infrastructure development projects; and
- Appropriate mitigation response, commensurate with the value of the affected resource.
- Focus conservation and restoration activities on priority areas, according to a strategic framework such as GreenPrint (which is not to be confused with the former easement program also called GreenPrint).
- Conserve and restore species of concern and important habitat types that fall outside the green infrastructure: rock outcrops, karsts systems, caves, shale barren communities, grasslands, shoreline beach and dune systems, mud flats, non-forested islands, etc.
- Develop a more comprehensive inventory of natural resource lands and environmentally sensitive areas to assist State and local implementation programs
- Establish measurable objectives for natural resource conservation and an integrated State/local strategy to achieve them through State and local implementation programs.
- Assess the combined ability of State and local programs to:

Expand and connect forests, farmlands, and other natural lands as a network of contiguous green infrastructure;

Protect critical terrestrial and aquatic habitats, biological communities, and populations;

Manage watersheds in ways that protect, conserve, and restore stream corridors, riparian forest buffers, wetlands, floodplains, and aquifer recharge areas and their associated hydrologic and water quality functions;

Adopt coordinated land and watershed management strategies that recognize the critical links between growth management and aquatic biodiversity and fisheries production;

- Support a productive forestland base and forest resource industry, emphasizing the economic viability of privately owned forestland.

Summary

Overall, the County and State goals compliment each other. The identification of important natural resource lands to protect, restore or acquire is the central theme to both the State and the County goals. The County will be developing a Green Infrastructure Plan that will provide the basis of identifying the network of lands that are of the highest priority of protection and restoration.

Table 3.1 is the inventory of County properties with specific existing conservation easements, as well as, properties that are currently held by the Harford Land Trust. A list of homeowner's associations' open space property can be found in the LPPRP appendix.

PENNSYLVANIA

SUSTAINABLE GROWTH & AGRICULTURAL PRESERVATION ACT OF 2012

IMPLEMENTING ORDINANCES AND PROGRAMS

Harford County uses the following tool in its efforts to preserve natural resources.

- Harford NEXT – Environmental Stewardship / other Themes
- Local Regulatory Measures
- State and Federal Regulatory Measures

HarfordNEXT

HarfordNEXT is a forward-thinking plan and an exciting opportunity to address the evolving needs of the County. HarfordNEXT establishes the necessary framework for maintaining and enhancing our quality of life, both now and in the future. The six themes in HarfordNEXT represent a holistic perspective on broad planning topics. Implementation strategies identified in these themes and elsewhere in this document will help strengthen the sense of place of our diverse communities and our interactions with our vast natural resources. The two themes that are of particular importance to the LPPRP are the Environmental Stewardship and Promoting Healthy Communities themes. Implementation strategies in these themes provide measurable objectives for natural resource conservation.

Regulatory Measures – Harford County

The Natural Resources District (NRD) in the Harford County Zoning Code provides for orderly development and use of land while protecting the ecology of the area by minimizing the soil disturbance and loss of natural ground cover and vegetation in sensitive areas. Lands within this district are:

- A. Steep terrain (areas of land exceeding 40,000 square feet with a slope in excess of 25%);
- B. Areas adjacent to streams and rivers (minimum distance of 75 feet or 150 feet on both sides of the stream depending on the stream classification, or 50' beyond the 100-year floodplain); and
- C. Nontidal wetlands and their 75-foot buffers.

The Chesapeake Bay Critical Area Management Program and the Chesapeake Bay Critical Area Overlay District is administered by the Department of Planning and Zoning as part of a coordinated State effort to improve water quality and wildlife habitat throughout the Chesapeake Bay. The program manages lands within 1,000 feet of tidal waters and also includes some additional floodplain, park, and rare species habitat areas. The program protects natural resources within this area including: tidal and nontidal wetlands, shoreline buffer, rare species habitats, anadromous fish breeding habitat, colonial waterbird nesting sites, waterfowl congregation areas, hydric and erodible soils, and steep slopes.

The Floodplain Management Regulations restrict building in areas subject to periodic flooding from streams, rivers and the Chesapeake Bay. Floodplains are often described in statistical terms. The 1% annual flood is an area that has a 1% chance of being flooded in any given year; it is often referred to as the 100-year flood. Most of the floodplains with large drainage areas (greater than 400 acres) are mapped and subject to regulation, even though areas not identified on maps as floodplains may still flood. The areas subject to the County's floodplain management program are depicted on flood maps available at the Department of Planning and Zoning. FEMA has updated the County's floodplain maps which became effective in April 2016. The County updated its floodplain ordinance at that time. By encouraging sound land use practices, the exposure of property to flood losses may be minimized; human life and health can be protected; and public expenditures for flood protection and relief minimized.

Water Source Protection Districts have been established in the Zoning Code to provide a safe drinking water supply and to maintain public health, safety and quality of life. Regulations were established in the Perryman wellfield district, community water system districts and nontransient-noncommunity water system districts. Uses that are considered to pose a high risk to groundwater and surface water are prohibited in these areas and impervious surface limitations may apply in some districts.

The Forest and Tree Conservation Provisions of the Harford County Zoning Code have been in place since 1991 to protect forest resources in the County. During the development approval process, natural features within a proposed development site must be identified and delineated by an approved professional forester or landscape architect. A portion of the existing forest resources on-site must be retained and a measure of the forest resources which are lost as a necessary element of the development process must be replaced.

The Deer Creek Scenic River District was established in 1978 to highlight the importance of Deer Creek's scenic and natural features, and to ensure the protection of private rights and the scenic river in a compatible, harmonious manner. Deer Creek is designated as a Scenic River under the State's Scenic River program. The local Deer Creek Scenic River Advisory Board (composed of nine members appointed by the County Executive and confirmed by the County Council of Harford County) was established to initiate and recommend policies and regulations to the County Council to enhance and protect the quality of Deer Creek.

Stormwater Management Regulations in Harford County address water quantity and quality management, specifically for the 2-year and 10-year storms. There are also requirements for 100-year storm management for development above Reckord Road in the Little Gunpowder watershed, and above Business Route 1 in the Bynum Run watershed. These regulations involve calculating the amount of stormwater runoff that would be created during these major storm events, and ensuring that proper management techniques are installed to handle these storms.

The NPDES Program is a Federally mandated program under the Clean Water Act. Under the 1987 Amendments to the Clean Water Act, permit requirements were

established for stormwater discharges from municipal separate storm sewer systems (MS4s) or storm drain systems for municipalities with populations over 100,000 people. Harford County obtained its first municipal NPDES permit in 1994, with resubmittal and recertification required every five years. Components of the County's NPDES permit include stormwater management, erosion and sediment control, illicit discharge detection and elimination, road maintenance, and watershed assessment and planning. Once sources of pollutants are identified on a watershed basis, restoration projects are identified and implemented through the capital budget. Monitoring to determine the effectiveness of stormwater management and progress toward meeting water quality goals is an integral part of the NPDES program. Restoration of impaired waters is addressed through the development of Total Maximum Daily Loads (TMDLs) by Maryland Department of the Environment (MDE). MDE has determined that jurisdictions that implement the requirements of their municipal NPDES permit are controlling stormwater to the maximum extent practical, thereby meeting the waste load allocations specified in the TMDL. Continued monitoring and NPDES program assessment ensure that progress toward meeting water quality goals is achieved.

Watershed Implementation Planning (WIP) – Harford County remains committed to meeting water quality goals for the Chesapeake Bay. The County continues to set milestones and track best management practices implementations in each of the sectors for water quality improvements. The County is actively coordinating with State and Federal agencies in the Phase 3 WIP.

Regulatory Measures – State and Federal

State Wetland Regulations are administered by the State of Maryland to protect tidal and nontidal wetlands. The State Wetlands Act was enacted to protect Maryland's tidal wetlands. This Act (COMAR 08.05.07) made waters below mean high tide the property of the State of Maryland. In 1988, the State entered into a Memorandum of Understanding with the Army Corps of Engineers (ACOE) to create a Joint Permit Application for construction in any floodplain, waterway, or wetland area in the State of Maryland. The State Nontidal Wetlands Protection Act (COMAR 08.05.04) requires a State permit for clearing and/or construction in, discharge to, or dredging of nontidal wetlands or their 25 foot buffers. Joint Permit Applications are received at Maryland Department of the Environment and distributed among the cooperating agencies which review and comment on permit applications.

Federal Wetland Regulations are based on the Rivers and Harbors Act of 1899, and the Clean Water Act. Under Section 404 of the Clean Water Act, the Secretary of the Army, acting through the Chief of Engineers (Army Corps of Engineers or ACOE), is authorized to issue permits for the discharge of dredged or fill materials into wetlands, with program oversight by the Environmental Protection Agency (EPA). The EPA has the authority to make final determinations on the extent of the Clean Water Act. This authority covers regulation of tidal and nontidal wetlands. The ACOE also issues permits for filling, dredging, and other construction in certain wetlands under Section 10 of the Clean Water Act. Under authority of the Fish and Wildlife Coordination Act, the Fish and Wildlife Service and the National Marine Fisheries Service review applications

for these Federal permits and provide comments to the ACOE on the environmental impacts of the proposed work.

State Endangered Species Regulations were enacted in the State through the Maryland Endangered Species Act of 1971 (Article 66C, Section 125, Annotated Code of Maryland), which became the first piece of State legislation to protect endangered species in Maryland. This legislation prohibits the taking, transportation, possession, processing, or sale within the State of Maryland of any wildlife appearing on the Federal lists of endangered, foreign or native fish and wildlife. Secondly, it mandated the Secretary of DNR to develop a list of fish and wildlife deemed to be threatened with statewide extinction in Maryland and provides for full protection from taking and possession of those species. The DNR list includes all of the Federally listed species, and lists of species which are threatened or endangered within their range in Maryland. As of 2007, DNR tracks the status of over 1100 native plants and animals that are among the rarest in Maryland and in need of conservation efforts. DNR officially recognizes 607 species and subspecies as endangered, threatened, in need of conservation, or endangered extirpated in Maryland. Of these, 17 animals and 85 plants occur or once occurred in Harford County.

Federal Endangered Species Regulations, first enacted as the 1973 Endangered Species Act (ESA), provide a program for the conservation of endangered and threatened species and for the ecosystems upon which they depend. The U.S. Fish and Wildlife Service (FWS) shares responsibility for endangered and threatened species with the National Marine Fisheries Service of the Department of Commerce (NMFS). The FWS has jurisdiction over all terrestrial and freshwater species and a few marine mammals, while the NMFS is responsible for most marine species. Section 4 of the Endangered Species Act provided for the development and maintenance of an official list of endangered and threatened species. Three species on the Federal threatened and endangered species list occur, or once occurred, within Harford County. These are the Maryland darter, the shortnose sturgeon, and the bog turtle.

Presidential Executive Order 13508-Chesapeake Bay Protection and Restoration mandates a comprehensive plan to restore the Chesapeake Bay. The Order requires Federal agencies to provide reports which make recommendations for restoring and protecting the Chesapeake Bay. The Order mandates that these reports address the issues of water quality improvement, targeting resources to better protect the Bay and its tributaries, strengthening stormwater management practices at Federal facilities and on Federal lands, assessing the impacts of changing climates, expanding public access and conserving the landscapes, strengthening scientific support for decision making for this area, and developing focused and coordinated habitat and research activities. Overall, Executive Order 13508 seeks to protect the national treasure known as the Chesapeake Bay by restoring this ecological, economic and cultural resource.

Partnerships

Harford County is fortunate to have several, strong partners, in addition to the State and federal governments, in its efforts to conserve natural resources. In addition to State

and County professional staff, strong partners in Harford County's natural resource conservation efforts include:

- **Harford Land Trust** (www.harfordlandtrust.org) – The Harford Land Trust, founded in 1991, has protected more than 865 acres through ownership and stewardship. The trust's principal activities are purchasing open land to prevent development and offering private landowners information and confidential advice about various local and State programs to sell or donate development rights. The trust promotes a variety of tools to preserve land, including conservation easements, bargain sale, donation, or limited development
- **Lower Susquehanna Heritage Greenway, Inc.** (www.lshgreenway.org) – The Lower Susquehanna Heritage Greenway, Inc (LSHGI) is a private, nonprofit organization incorporated in 1997 and dedicated to the concepts of heritage tourism and greenway development in a 70-square mile area along the Susquehanna River in Cecil and Harford Counties. LSHGI is the area's lead organization for heritage tourism development under Maryland's Heritage Preservation and Tourism Areas Development Program. LSHGI works with area landowners, businesses, and other stakeholders to identify, enhance, develop, and promote the area's historic, architectural, cultural, archeological, recreational, and natural/environmental resources. LSHGI has a full-time executive director and small staff.
- **Otter Point Creek Alliance** and **Eden Mill Nature Committee** – Both the Otter Point Creek Alliance and the Mill Nature Committee conduct environmental education programs at County facilities. Both organizations are established recreation councils and have volunteer staff which supplements the paid County staff.

CHAPTER 4 - AGRICULTURAL LAND PRESERVATION ELEMENT

EXECUTIVE SUMMARY

Harford County has been a leader in agricultural land preservation since the 1st Agricultural Land Preservation Easement was recorded in 1977. Harford County has been a nationally recognized leader in efforts to permanently preserve valuable, productive farmland. Through a variety of preservation programs and tools, Harford County has preserved over 50,000 acres. Permanently protecting these large connected areas of farmland assures a stable land base for a wide variety of agricultural enterprises. This in turn helps retain local agricultural support businesses, decreases the costs of community services for the entire county and maintains the high quality of life that makes Harford County such a desirable location.

The Department of Planning and Zoning administers the Agricultural Preservation program. There are a variety of options for landowners to preserve their land on a competitive basis. The Harford Agricultural Land Preservation Program (HALPP) and Maryland Agricultural Land Preservation Foundation (MALPF) easement programs account for the bulk of land preserved. Basic eligibility for all programs require properties to be in agricultural or forest production, have at least one extra development right available and meet certain minimum soil productivity standards as determined by the USDA NRCS.

Rural Legacy easements and donated Maryland Environmental Trust (MET) easements are other key elements supporting the preservation program. Recently, Harford County and MALPF programs have begun accepting donated easements as well, which will further increase the number of farms and acreage preserved within the County.

In response to the Agricultural Stewardship Act of 2006, Harford County adopted a Priority Preservation Plan in 2008 which applied to the Lower Deer Creek Rural Legacy Area. In 2009, the Deer Creek Rural Legacy Area and the Priority Preservation Area (PPA) were expanded to include the majority of the upper Deer Creek watershed. To date over 34,000 acres have been protected within the PPA, and the County continues working toward an 80% preservation rate for the undeveloped lands within that area.

To enhance preservation efforts, the 2016 Priority Preservation Area Plan expands the PPA boundary to include all lands north of the 2009 boundary and the Harford County portion of the Manor Rural Legacy Area (INSERT MAP). This new PPA encompasses portions of several watersheds, and this designation is consistent with the goals of the Sustainable Growth and Agricultural Preservation Act of 2012 (SB 236). The area is designated

Agricultural on the County's 2012 Land Use Map and is located outside of the designated growth area.

COUNTY AGRICULTURAL LAND PRESERVATION PROGRAM IMPROVEMENTS AND CHALLENGES

Harford County's heritage is intimately linked to its agricultural traditions. For generations, farms and farmers have been the cornerstone of communities throughout the County, supplying a bounty of fresh produce, grain, milk and livestock while also providing local jobs, tax revenues, pastoral views and recreational opportunities. Historically, tobacco, grain, meat production and the harvesting of timber were the foundation of the industry. Later, dairy farms and vegetable canning operations emerged as farmers pursued higher value products. Today the agricultural industry continues to evolve as producers adopt new technologies and invest in capital improvements that aid in farming operations.

While the farming industry remains strong, farmland continues to be lost, threatening the future viability of agriculture in the County. Exurban development activity over the last several decades has caused the loss of productive farmland and natural resource areas. From 1959 to 2012, over 100,000 acres of agricultural farmland were converted to residential use. To ensure farming remains a viable industry, the County must adequately plan for a future that integrates sound land use planning with education, technology and promotion to preserve our valuable agricultural resources. A sustainable agricultural industry also offers many benefits to local communities; including convenient access to healthy foods and improved nutrition. Building resilient local food systems is critical to creating healthy communities and ensuring food security.

Agricultural preservation programs provide financial rewards and other benefits when a land owner sells or donates their development rights. Those who sell development rights receive an infusion of capital that can be used to improve or diversify farming operations, purchase additional land, pay off debt, or meet other financial obligations. Participation in these programs can also provide tax benefits. As of 2015, Harford County has successfully preserved over 50,000 acres through conservation easements. Harford County has set a goal of 75,000 acres to be placed under perpetual land preservation easements by the year 2040. In addition, a reimagined transfer of development rights program that is applied more strategically or surgically may enhance opportunities for preservation.

Maintaining the viability of agricultural uses and expansion of acreage under the land preservation programs requires continuing development of new approaches and enhancements to existing ones. Legislative, financial and educational

initiatives are always changing to strengthen Harford County's agricultural industry and land preservation goals. Harford County has implemented a number of the objectives from the latest County Master Plan "Harford Next" and the last 2013 LPPRP plan. The County expanded the Priority Preservation Area to encourage more preservation in the Broad Creek watershed and codify the already heavily preserved Manor Rural Legacy Area. Secondly the County updated agricultural use legislation for tightening the criteria for farmers as value adding and discouraging non-farmers. The County also passed legislation prioritizing the Creswell, Churchville, and Jarrettsville areas of the County for land preservation by creating additional incentives for land owners to come into the program.

Harford NEXT set forth the County's goal of preserving 75,000 acres by 2040. The County preserved 590 acres of land in 2013, 1,046 acres in 2014, 580 acres in 2015, 1,041 acres in 2016 and currently pending many farms in 2017. State and local real estate transfer taxes continue to fund the land preservation programs at the State and County level.

AGRICULTURAL PRESERVATION GOALS OF THE 2018 LPPRP

- Preserve 80% of the remaining undeveloped lands within the designated Priority Preservation Area
 - Continue to preserve a minimum of 1,000 acres per year in the PPA;
 - Investigate the possibility of designating the Broad Creek watershed as a Rural Legacy Area;
 - Continue to utilize the Harford County Agricultural Land Preservation Program, MALPF, and Rural Legacy to fund preservation efforts;
 - Work with the State to shorten the timeframe for MALPF settlements;
 - Maintain the County's MALPF certification to leverage state funds with County funds;
 - Work with local land trusts to seek alternative funding sources including state, federal, and private funds along with donations and match challenges to support preservation efforts;

- Investigate opportunities and programs to create additional incentives to preserve farmland;
- Continue to encourage the application of Conservation Development Standards for proposed residential development and include 75% of the parcel that is preserved in preservation totals.
- Monitor current preservation programs and residential development patterns to determine the impact on working farmland
 - Continue to track projects grandfathered by Sustainable Growth and Agricultural Preservation Act of 2012;
 - Continue to direct a minimum of 80% of all new development to the designated growth areas;
 - Continue to report preservation efforts and development impacts as part of the Annual Growth Report and determine if additional steps should be taken to further stabilize the agricultural land base.
- Ensure that within the Priority Preservation Area there is support for a range of agricultural enterprises and the potential to adapt to new markets
 - Promote community supported agriculture, farmer's markets, and other emerging local and regional markets and distribution systems;
 - Continue to support agricultural and rural based tourism;
 - Review and update the Agricultural Economic Development Initiatives to specifically support agriculture within the PPA;
 - Continue to review and revise zoning regulations to permit compatible agriculturally related uses in areas easily accessible to farm operators while also minimizing impacts to surrounding properties.

State Goals for Agricultural Land Preservation

Goals of the 2017 State of Maryland Land Preservation, Parks and Recreation Plan regarding Agricultural Preservation:

- Permanently preserve agricultural land capable of supporting a reasonable diversity of agricultural production;
- Protect natural, forestry and historic resources and the rural character of the landscape associated with Maryland's farmland;
- To the greatest degree possible, concentrate preserved land in large, relatively contiguous blocks to effectively support long-term protection of resources and resource-based industries;
- Limit the intrusion of development and its impacts on rural resources and resource-based industries;
- Ensure good return on public investment by concentrating state agricultural land preservation funds in areas where the investment is reasonably well supported by both local investment and land use management programs;
- Work with local governments to achieve the following:
 - Establish preservation areas, goals and strategies through local comprehensive planning processes that address and complement state goals;
 - In each area designated for preservation, develop a shared understanding of goals and the strategy to achieve them among rural landowners, the public-at-large and state and local government officials;
 - Protect the equity interests of rural landowners in preservation areas by ensuring sufficient public commitment and investment in preservation through easement acquisition and incentive programs;
 - Use local land use management authority effectively to protect public investment in preservation by managing development in rural preservation areas;
 - Establish effective measures to support profitable agriculture, including assistance in production, marketing and the practice

of stewardship, so that farming remains a desirable way of life for both the farmer and public-at-large.

Characteristics of the Harford County Priority Preservation Area

The newly defined PPA now encompasses over 110,000 acres of which 96,373 are zoned agricultural. Of the agriculturally zoned land, 47% (45,224 acres) has been preserved through a variety of measures. Preservation efforts in the PPA reflect a combination of easements and other protected lands. A mix of state parks and camps are located within the area; including Parker Conservation Area, Rocks, Palmer, and Susquehanna State Parks along with the Broad Creek Memorial Scout Reservation. The majority of the easements are held through Harford Agricultural Land Preservation Program (HALPP), Maryland Agricultural Land Preservation Foundation (MALPF), or Rural Legacy, with the Maryland Historical Trust and Maryland Environmental Trust holding the remainder. A portion of the 1,600 acre Broad Creek Memorial Scout Reservation has also been preserved.

According to the 2012 Census of Agriculture, there are 582 farms in Harford County, and a substantial portion of these farms are located in the PPA. The average producing farm is approximately 112 acres with many farmers owning or renting multiple parcels. The area is home to some of the County's largest grain and soy producers.

While traditional beef, dairy, and cash grain operations are the major agricultural enterprise, other sectors such as equine, orchards, vineyards, and commercial horticulture are expanding. Area farmers have also demonstrated their ability to adapt to changing demographics by moving to more value added products through direct marketing aimed at the County's growing population.

Area farmers participate in Farmer's Markets as well as operating roadside stands, "pick your own" fields, and Community Supported Agriculture (CSA) programs. The processing of their products into cheese, ice cream, and retail ready beef and lamb have given producers access to new markets. Many stores and restaurants actively promote their utilization of locally grown products on their shelves and farm to table menus.

The selection of the northern portion of Harford County as a PPA clearly supports the state's goals for land preservation. This area also includes the County's two designated Rural Legacy Areas, a Certified Heritage Area, and three Scenic Byways – Horses and Hounds, Mason and Dixon, and Lower Susquehanna. All of these programs promote and support tourism while retaining the rural and natural characteristics of the area.

The Master Plan and Land Use Element Plan

The Harford County Charter requires the development of a Master Plan, and it requires the inclusion of a series of elements or components which “further advance the purposes” of the Master Plan. In 2015, the Department of Planning and Zoning initiated the update to the 2012 Master Plan and Land Use Element Plan. The Department’s approach to the update is based on a thematic structure which incorporates the Transportation, Priority Preservation Area, Natural Resources, and Historic Preservation Element Plans into one cohesive and streamlined document known as HarfordNEXT.

The designation of the PPA is consistent with HarfordNEXT, as well as other County plans, policies, and programs. HarfordNEXT supports the continuation of agriculture and preservation of the rural quality of life that has been an important part of Harford County’s history. The PPA is consistent with the Grow With Purpose, Economic Vitality, Environmental Stewardship, Promoting Healthy Communities, and Preserving Our Heritage themes explored in HarfordNEXT. These themes serve as the common thread that provides continuity and consistency throughout HarfordNEXT. In addition, various County boards and programs help to implement these policies that are designed to protect the character of the rural area.

As a component of the County’s Master Plan – Harford NEXT, the PPA promotes an integrated approach to preservation efforts by establishing appropriate goals for the amount of land to be preserved, and by describing the kind of agricultural production this area will support along with the way the preservation goals will be accomplished.

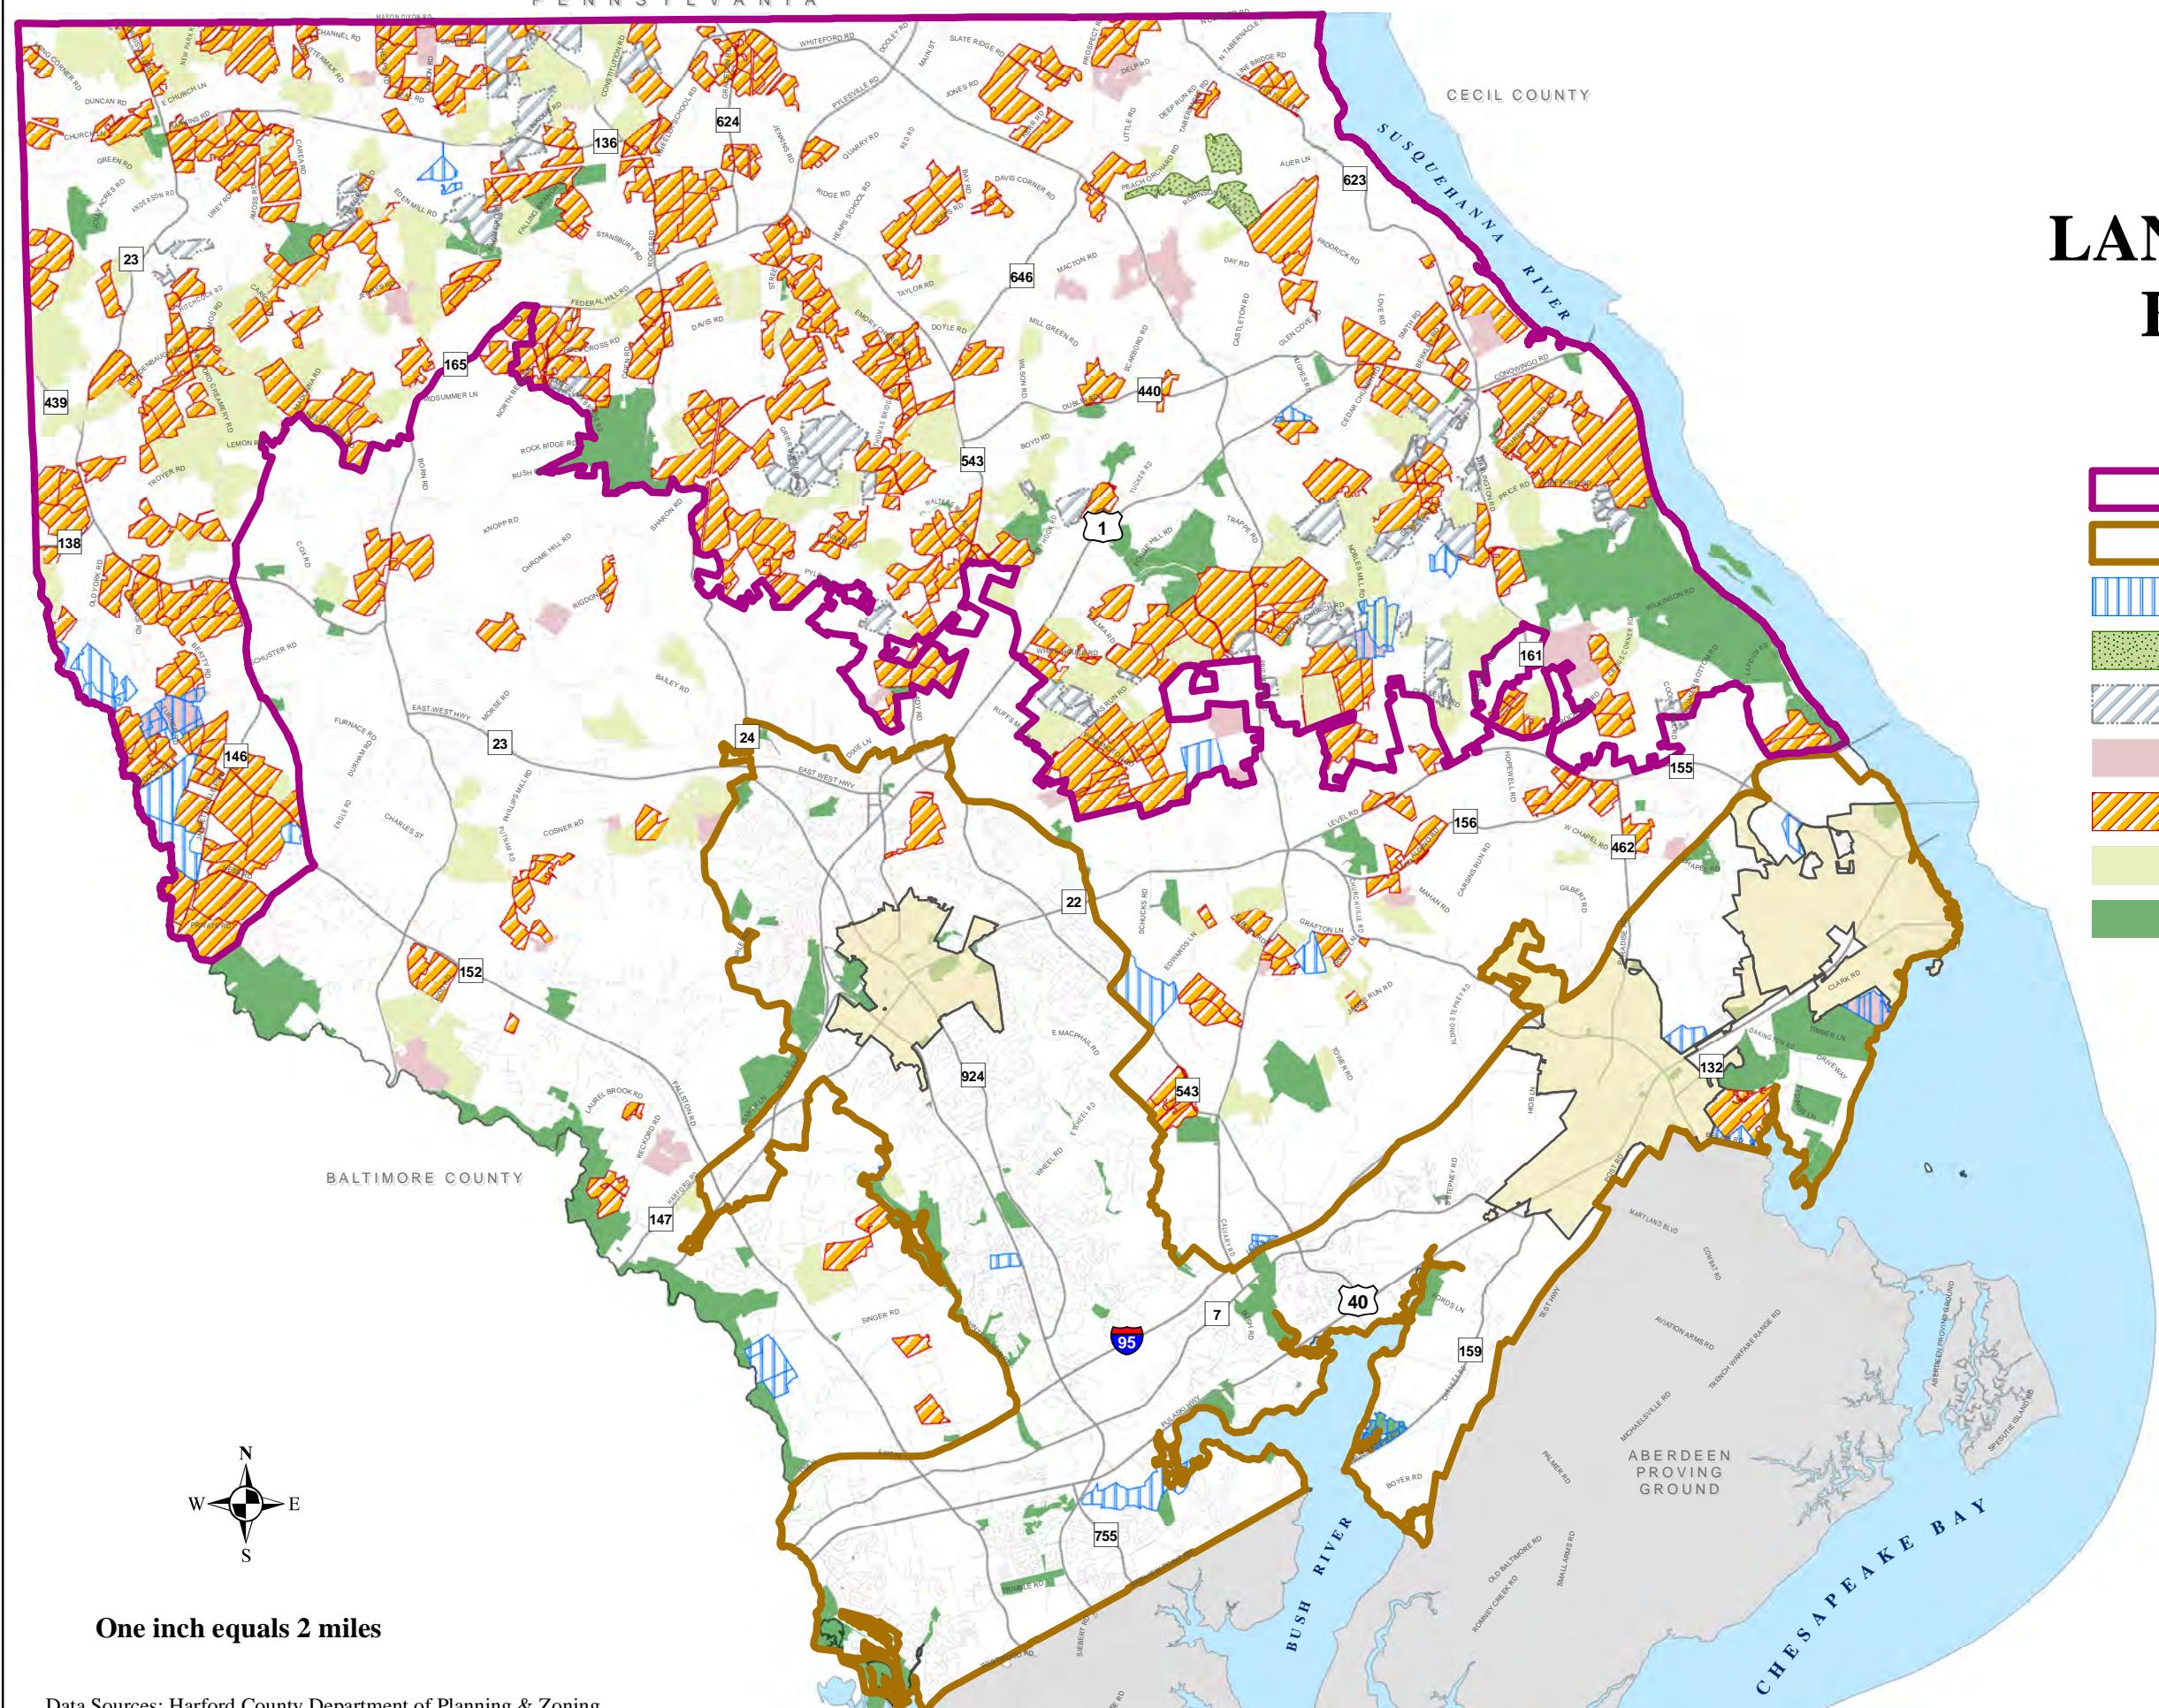

Countywide Preservation Program Evaluation

There are four major preservation programs used throughout the County; including the Harford County Agricultural Land Preservation Program (HALPP), Maryland Agricultural Land Preservation Foundation (MALPF), Rural Legacy, and Maryland Environmental Trust (MET). These programs have protected over 50,000 acres in the County. The Rural Legacy Program has protected over 3,400 acres while the County program has protected less than 30,000 acres. The state program has protected an additional 14,218 acres through December 2016. There are also 2,945 acres preserved through MET, and 539 acres of donated easements through MHT. A list of preservation programs and acreage preserved is found in Figure 1 and total easement acres in Figure 2. A complete list of individual easements can be found in the LPPRP appendix.

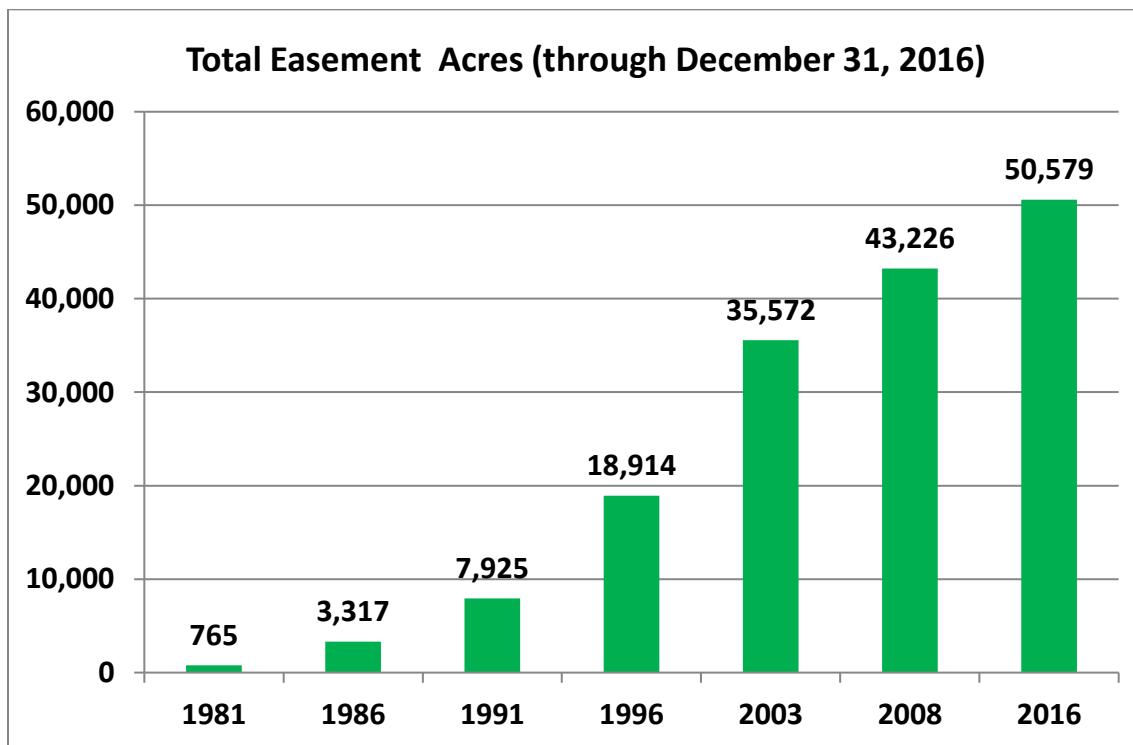

Figure 2

Preservation efforts in the PPA also include parklands owned by the state and County. The Maryland Department of Natural Resources (DNR) manages publicly owned lands in the County, overseeing approximately 4,100 acres of public land and protected open space including Susquehanna, Palmer, and Rocks State Parks. County parks in the PPA comprise nearly 800 acres.

Continued development pressure on areas outside of the Development Envelope as well as changing agricultural markets and practices have continued to impact the County's remaining farmland. The 2012 Census of Agriculture shows that between 2007 and 2012, the County lost 9,694 acres of farmland which is about 3,000 acres more than during the previous five year reporting period (Figure 3).

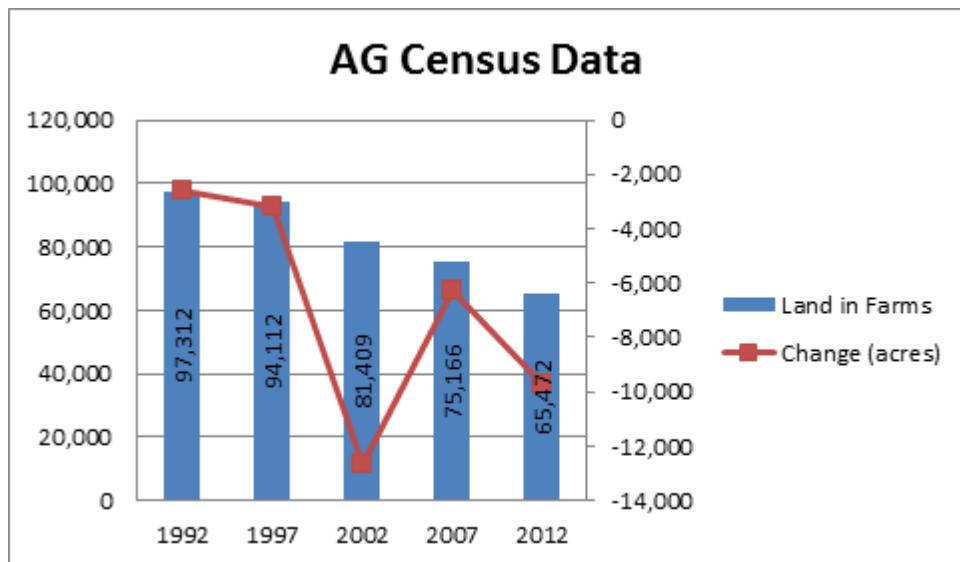

Figure 3

The Census of Agriculture statistics also reported that while the number of farms in the County declined between 2007 and 2012, the average farm size increased slightly (Figure 4).

Farm Number and Size	1997	2002	2007	2012
Number of Farms	651	683	704	582
Average size (acres)	145	119	107	112

Figure 4

ACCOMPLISHMENTS IN THE IMPLEMENTATION OF THE 2013 LPPRP GOALS

Harford County's accomplishments in achieving the agricultural preservation goals of the State Plan and the 2013 LPPRP are provided below:

Land Use

Policy: Guide future growth and development in a sustainable manner that maintains or enhances quality of life throughout the County.

Land Use Theme – Manage growth in a sustainable manner.

Implementation Strategies

1. Revise the County's Transfer of Development Rights Program to establish receiving areas within the County's designated growth areas and incentivize its use to the maximum extent possible.

The Department of Planning & Zoning continues to research the viability of the implementation of this strategy

2. Maintain the goal of preserving 500 acres per year within the Priority Preservation Area.

This goal is being met

3. Identify additional areas to be proposed for inclusion in the Priority Preservation Area.

Harford County has identified the Broad Creek Watershed and the Manor Rural Legacy Area as areas for inclusion

4. Continue to preserve agricultural and forested lands to meet the objectives of the Priority Preservation Area Program

Harford County continues to preserve agricultural and forested lands to meet objectives of the Priority Preservation Area Program

5. Maintain the County's Maryland Agricultural Land Preservation Foundation certification

Harford County continues to maintain the County's Maryland Agricultural Land Preservation Foundation certification
