

# Plants and Trees

Maryland is home to many different species of plants and trees. Look at the types of trees below and match the pictures to the correct names. See how many of these trees you can find during your visit at the park.

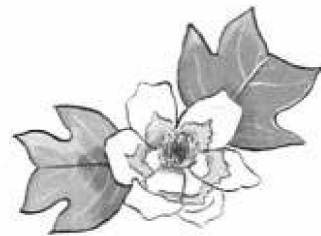

|      |           |              |              |
|------|-----------|--------------|--------------|
| Key: | white oak | maple        | black cherry |
|      | sassafras | tulip poplar | pine         |

Poison ivy and poison oak are often found in Maryland's forests, and can irritate the skin if touched. As you are exploring the park, beware of these two kinds of plants! Ask a ranger or park staff member what you should do if you happen to come in contact with one of these plants. Write their response below.
