^a New York survey data from Long Island, Finger Lakes region, Great Lakes shorelines, and Lake Champlain. Counts are not comparable to previous years due to wide variation in survey area.

^b Flyway totals are not comparable with totals from previous years because of lack of survey in Florida and Vermont. Totals for mottled ducks, whistling ducks, blue-winged teal, redheads, scaup, ringnecked ducks, and to a lesser extent, wigeon and shovelers are especially suspect.
